Enacted in 1860, the Indian Penal Code is the longest serving and one of the most influential criminal codes in the common law world. This book commemorates its one hundred and fiftieth anniversary and honours the law reform legacy of Thomas Macaulay, the principal drafter of the Code. The book comprises chapters which examine the general principles of criminal responsibility from the perspective of Macaulay, and from more recent accounts by lawmakers and reformers. These are framed by chapters that examine the history and conceptual underpinnings of Macaulay's Code, consider the need to revitalize the Indian Penal Code, and review the current challenges of principled criminal law reform and codification. This book is a valuable reference on the Indian Penal Code, and current debates about general principles of criminal law for legal academics, judges, legal practitioners and criminal law reformers. It also promises to have wider scholarly appeal, of interest to legal theorists, historians and policy specialists.

This book explores the relationship of mutual trust and fundamental rights in the Area of Freedom, Security and Justice (AFSJ) of the European Union and asks whether there is any role for proportionality. Mutual trust among Member States has long been presumed by the Court in a manner that mutual recognition was prioritised in regard to, but to the detriment of, the protection of fundamental rights. After thoroughly reviewing this relationship, this book offers a comprehensive framework of proportionality and explores its impact on the protection of fundamental rights in a mutual trust environment. It applies a theoretical and a normative framework of proportionality to two case studies (EU criminal and asylum law) by reference to several fundamental rights, enabling a carefully constructed analysis with useful parallels. The book argues that such analysis, based on proportionality, is not always desirable and helpful for the protection of fundamental rights in this area and thoroughly explores its impact on the protection of fundamental rights vis-à-vis mutual trust.

People convicted of crimes are subject to a criminal sentence, but they also face a host of other restrictive legal measures: Some are denied access to jobs, housing, welfare, the vote, or other goods. Some may be deported, may be subjected to continued detention, or may have their criminal records made publicly accessible. These measures are often more burdensome than the formal sentence itself. In *Beyond Punishment?*, Zachary Hoskins offers a philosophical examination of these burdensome legal measures, called collateral legal consequences. Drawing on resources in moral, legal, and political philosophy, Hoskins analyzes the various kinds of collateral consequences imposed in different legal systems and the important moral challenges they raise. Can collateral legal consequences ever be justified as forms of criminal punishment or as civil measures? Hoskins contends that, considered as forms of punishment, such restrictions should be constrained by considerations of proportionality and offender reform. He also argues that they may in a limited range of cases be permissible as risk-reductive civil measures. Whether considered as criminal punishment or civil measures, however, collateral legal consequences are justifiable in a far narrower range of cases than we find in current legal practice. Considering just how pervasive collateral legal consequences have become and their dramatic effects on offenders' lives, *Beyond Punishment?* sheds valuable light on whether these restrictive measures are ever morally

justified.

In the aftermath of the financial crisis of 2008, Western societies entered a climate of austerity which has limited the penal expansion experienced in the US, UK and elsewhere over recent decades. These altered conditions have led to introspection and new thinking on punishment even among those on the political right who were previously champions of the punitive turn. This volume brings together a group of international leading scholars with a shared interest in using this opportunity to encourage new avenues of reform in the penal sphere. Justice is a famously contested concept and this book takes a deliberately capacious approach to the question of how justice can be mobilised to inform new reform agendas. Some of the contributors revisit an antique question in penal theory and reconsider the question of what fair or just punishment should look like today. Others seek to make gender central to understanding of crime and punishment, or actively reflect on the part that related concepts such as human rights, legitimacy and trust can and should play in thinking about the creation of more just crime control arrangements. Faced with the expansive penal developments of recent decades, much research and commentary about crime control has been gloom-laden and dystopian. By contrast, this volume seeks to contribute to a more constructive sensibility in the social analysis of penalty: one that is worldly, hopeful and actively engaged in thinking about how to create more just penal arrangements. *Justice and Penal Reform* is a key resource for academics and as a supplementary text for students undertaking courses on punishment, penology, prisons, criminal justice and public policy. This book approaches penal reform from an international perspective and offers a fresh and diverse approach within an established field.

PRAISE FOR THE BOOK: "This constitutes a work of impressive scholarship that will become a major reference point for future discourse on choice of court agreements. Dr Ahmed advances a firm thesis in a lucid manner that will satisfy both academics and practitioners. The discussion is supported by a monumental foundation of underpinning research. Ahmed's monograph throughout shows clear understanding of underlying substantive laws and in Chapter 11 displays a refreshing willingness to engage in intelligent speculation on the implications of Brexit." Professor David Milman, University of Lancaster "The book is an excellent attempt to understand the theoretical underpinnings of choice of court agreements in private international law ... Anyone with an interest in the theory and practice of choice of court agreements, in particular in mechanisms for their enforcement, should read this book. They will find much of value by doing so." Professor Paul Beaumont, University of Aberdeen (from the Series Editor's Preface) This book examines the fundamental juridical nature, classification and enforcement of choice of court agreements in international commercial litigation. It is the first full-length attempt to integrate the comparative and doctrinal analysis of choice of court agreements under the Brussels I Recast Regulation, the Hague Convention on Choice of Court Agreements ('Hague Convention') and the English common law jurisdictional regime into a theoretical framework. In this regard, the book analyses the impact of a multilateral and regulatory conception of private international law on the private law enforcement of choice of court agreements before the English courts. In the process, it both pre-empts and offers innovative solutions to issues that may arise under the jurisprudence of the emergent Brussels I Recast Regulation and the Hague Convention. The need to understand the nature and enforcement of choice of court agreements before the English courts from the perspective of the EU private international law regime and the Hague Convention cannot be understated. This important new study aims to fill an existing gap in the literature in relation to an account of choice of court agreements which explores and reconnects arguments drawn from international legal theory with legal practice. However, the scope of the work remains most relevant for cross-border commercial lawyers interested in crafting pragmatic solutions to the conflicts of jurisdictions.

This book seeks to reframe the normative narrative of the 'culpable person' in American criminal law through a more humanising lens. It embraces such a reframed narrative to revise the criteria of the current voluntarist architecture of culpability and to advance a paradigm of punishment that positions social rehabilitation as its core principle. The book constructs this narrative by considering behavioural and neuroscientific insights into the functions of emotions, and socio-environmental factors within moral behaviour in social settings. Hence, it suggests culpability notions that reflect a more contextualised view of human conduct, and argues that such revised notions are better suited to the principle of personal guilt. Furthermore, it suggests a model of 'punishment' that values the dynamic power of change of individuals, and acknowledges the importance of social relationships and positive environments to foster patterns of social (re)integration. Ultimately, this book argues that the potential adoption of the proposed models of culpability and punishment, which view people through a more comprehensive lens, may be a key factor for turning criminal justice into a less punitive, more inclusionary and non-stigmatising system.

Have you ever been frustrated that arbitration folk aren't more numerate? The

Guide to Damages in International Arbitration is a desktop reference work for those who'd like greater confidence when dealing with the numbers. It is designed to help all participants in the international arbitration community to discuss damages issues more effectively and communicate them better to tribunals, with the aim of producing better awards. Over the past fifty years, American criminal justice policy has had a nearly singular focus – the relentless pursuit of punishment. Punishment is intuitive, proactive, logical, and simple. But the problem is that despite all of the appeal, logic, and common sense, punishment doesn't work. The majority of crimes committed in the United States are by people who have been through the criminal justice system before, many on multiple occasions. There are two issues that are the primary focus of this book. The first is developing a better approach than simple punishment to actually address crime-related circumstances, deficits and disorders, in order to change offender behavior, reduce recidivism, victimization and cost. And the second issue is how do we do a better job of determining who should be diverted and who should be criminally prosecuted. *From Retribution to Public Safety* develops a strategy for informed decision making regarding criminal prosecution and diversion. The authors develop procedures for panels of clinical experts to provide prosecutors with recommendations about diversion and intervention. This requires a substantial shift in criminal procedure as well as major reform to the public health system, both of which are discussed in detail. Rather than ask how much punishment is necessary the authors look at how we can best reduce recidivism. In doing so they develop a roadmap to fix a fundamentally flawed system that is wasting massive amounts of public resources to not reducing crime or recidivism. For the first time, an English-written book collects the most salient opinions of Judge Paulo Pinto de Albuquerque (European Court of Human Rights). Contributors to this unique book explain and compare major theories drawn from several academic fields to uncover the root causes of deviance. • Addresses classical theory in relationship to deviance • Interprets, integrates, and synthesizes classical theory regarding deviance from different disciplines • Examines the etiology of pedophilia • Discusses competency and culpability *Punishing the Other* draws on the work of Zygmunt Bauman to discuss contemporary discourses and practices of punishment and criminalization.

Bringing together some of the most exciting international scholars, both established and emerging, this book engages with Bauman's thesis of the social production of immorality in the context of criminalization and social control and addresses processes of 'othering' through a range of contemporary case studies situated in various cultural, political and social contexts. Topics covered include the increasing bureaucratization of the business of punishment with the corresponding loss of moral and ethical reflection in the public sphere; punitive discourses around border control and immigration; and exclusionary discourses and their consequences concerning 'terrorists' and other socially and culturally defined outsiders. Engaging with national and global issues that are more topical now than ever before, this book is essential reading for academics and students of involved in the study of the sociology of punishment, punishment and modern society, the criminal justice system, philosophy and punishment, and comparative criminology and penology.

This book traces the history of the EU competence, EU policy discourse and EU legislation in the field of criminalisation from Maastricht until the present day. It asks 'Why EU Criminal Law?' looking at what rationales the Treaty, policy document and legislation put forth when deciding whether a certain behaviour should be a criminal offence. To interpret the EU approach to criminalisation, it relies on both modern and post-modern theoretical frameworks on the legitimacy of criminal law, read jointly with the theories on the functions of EU harmonisation of national law. The book demonstrates that while EU constitutional law leans towards an effectiveness-based, enforcement-driven, understanding of criminal law, the EU has in fact in more than one instance adopted symbolic EU criminal law, ie criminal law aimed at highlighting what values are important to the EU, but which is not fit to actually deter individuals from harming such values. The book then questions whether this approach is consistent or in contradiction with the values-based constitutional identity the EU has set for itself.

The European Union and Deprivation of Liberty examines the EU legislative and judicial approach to deprivation of liberty from the perspective of the following fundamental rights and principles: the principle of legality and proportionality of penalties; the right to liberty; and the principle that criminal penalties must aim for the social reintegration of the offenders. The book measures the relevant EU law against those rights; this constitutes the very core of the relationship between public powers and individual liberty. The analysis shows that the ultimate goal of the Union is the creation and preservation of the EU as a borderless area. The holistic approach adopted in the book explains how different legal phenomena connected to deprivation of liberty have come into being in EU law. It also shows that those phenomena call for solutions suitable for the peculiarities of the EU legal order.

Immigration detention is considered by many states to be a necessary tool in the execution of immigration policy. Despite the apparently key role it plays in immigration enforcement, the law on immigration detention is often vague, especially in relation to determining the circumstances under which prolonged detention remains lawful. As a result, the courts are frequently called upon to adjudicate these matters, with scant legal tools at their disposal. Though there have been some significant judgments on the legality of detention at the constitutional level, the extent to which these judgments have had an impact at the lower end of the judiciary is unclear. Indeed, it is the lower courts

which are tasked with judging the legality of detention through habeas corpus or judicial review proceedings. This book examines the way this has occurred in the lower courts of two jurisdictions, the UK and the US, and contrasts this practice not only in those jurisdictions, but with judgments rendered by the Court of Justice of the European Union, a constitutional court at the other end of the judicial spectrum whose judgments are applied by courts and tribunals in the EU Member States. Although these three jurisdictions use similar tests to evaluate the legality of detention, case outcomes significantly differ. Many factors contribute to this divergence, but key among them is the role that fundamental rights protection plays in each jurisdiction. Through a forensic evaluation of 191 judgments, this book compares the laws on detention in the UK, US and EU, and makes recommendations to these jurisdictions for improvement.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this convenient resource provides systematic information on how Finland deals with the role religion plays or can play in society, the legal status of religious communities and institutions, and the legal interaction among religion, culture, education, and media. After a general introduction describing the social and historical background, the book goes on to explain the legal framework in which religion is approached. Coverage proceeds from the principle of religious freedom through the rights and contractual obligations of religious communities; international, transnational, and regional law effects; and the legal parameters affecting the influence of religion in politics and public life. Also covered are legal positions on religion in such specific fields as church financing, labour and employment, and matrimonial and family law. A clear and comprehensive overview of relevant legislation and legal doctrine make the book an invaluable reference source and very useful guide. Succinct and practical, this book will prove to be of great value to practitioners in the myriad instances where a law-related religious interest arises in Finland. Academics and researchers will appreciate its value as a thorough but concise treatment of the legal aspects of diversity and multiculturalism in which religion plays such an important part.

This is the first book to offer an extensive cosmopolitan, cross-cultural insight into the perennial controversy over the use of improperly obtained evidence in criminal trials. It challenges the conventional view that exclusionary rules are idiosyncratic of Anglo-American law, and highlights the 'constitutionalisation' and 'internationalisation' of criminal evidence and procedure as a cause of rapprochement (or divergence) beyond the Anglo-American and Continental law divide. Analysis focuses on confessional evidence and evidence obtained by search and seizure, telephone interceptions and other means of electronic surveillance. The laws of England and Wales, France, Greece and the United States are systematically compared and contrasted throughout this study, but, where appropriate, analysis extends to other Anglo-American and Continental legal systems. The book reviews exclusionary rules vis-à-vis the operation of judicial discretion, and explores the normative justifications that underpin them. It attempts to reinvigorate the idea of excluding evidence to protect constitutional or human rights (the rights thesis), arguing that there is significant scope for Anglo-American and Continental legal systems to place a renewed emphasis on it, particularly in relation to confessional evidence obtained in violation of custodial interrogation rights; we can locate an emerging rapprochement, and unique potential for European Court of Human Rights jurisprudence to build consensus in this respect. In marked

contrast, remaining divergence with regard to evidence obtained by privacy violations means there is little momentum to adopt a reinvigorated rights thesis more widely. The Supreme Court Economic Review (SCER) is a faculty-edited, peer-reviewed, interdisciplinary law and economics series. The journal has a particular focus on economic and social science analysis of judicial decision-making, institutional analysis of law and legal structures, political economy and public choice issues regarding courts and other decision-makers, and the relationship between legal and political institutions and the institutions of a free society governed by constitutions and the rule of law. The series also publishes special symposium issues that build on SCER's traditional focus on the intersection between law and economics. The contributors include renowned legal scholars, economists, and policy-makers, and consistently ranks among the most influential journals of law and economics.

Predictive Sentencing addresses the role of risk assessment in contemporary sentencing practices. Predictive sentencing has become so deeply ingrained in Western criminal justice decision-making that despite early ethical discussions about selective incapacitation, it currently attracts little critique. Nor has it been subjected to a thorough normative and empirical scrutiny. This is problematic since much current policy and practice concerning risk predictions is inconsistent with mainstream theories of punishment. Moreover, predictive sentencing exacerbates discrimination and disparity in sentencing. Although structured risk assessments may have replaced 'gut feelings', and have now been systematically implemented in Western justice systems, the fundamental issues and questions that surround the use of risk assessment instruments at sentencing remain unresolved. This volume critically evaluates these issues and will be of great interest to scholars of criminal justice and criminology.

"...an institution for those who practise public law...it has the authority that comes from being compiled by an author of singular distinction". (Lord Woolf, from the Foreword to the Fifth Edition) The new edition of this Handbook remains an indispensable source of

reference and a guide to the case-law in judicial review. Established as an essential part of the library of any practitioner engaged in public law cases, it offers unrivalled coverage of administrative law, including, but not confined to, the work of the Administrative Court and its procedures. Once again completely revised and up-dated, the seventh edition approximates to a restatement of the law of judicial review, organised around 63 legal principles, each supported by a comprehensive presentation of the sources and an unequalled selection of reported case quotations. It also includes essential procedural rules, forms and guidance issued by the Administrative Court. As in the previous edition, both the Civil Procedure Rules and Human Rights Act 1998 feature prominently as major influences on the shaping of the case-law. Attention is also given to impact of the Supreme Court. Here Michael Fordham casts an experienced eye over the Court's work in the area of judicial review, and assesses the signs from a Court that will be one of the key influences in the development of judicial review in the modern era. The author, a leading member of the English public law bar, and now has been involved in many of the leading judicial review cases in recent years and is the founding editor of the *Judicial Review* journal.

The Routledge Handbook of Irish Criminology is the first edited collection of its kind to bring together the work of leading Irish criminologists in a single volume. While Irish criminology can be characterised as a nascent but dynamic discipline, it has much to offer the Irish and international reader due to the unique historical, cultural, political, social and economic arrangements that exist on the island of Ireland. The Handbook consists of 30 chapters, which offer original, comprehensive and critical reviews of theory, research, policy and practice in a wide range of subject areas. The chapters are divided into four thematic sections: Understanding crime examines specific offence types, including homicide, gangland crime and white-collar crime, and the theoretical perspectives used to explain them. Responding to crime explores criminal justice responses to crime, including crime prevention, restorative justice, approaches to policing and trial as well as post-conviction issues such as imprisonment, community sanctions and rehabilitation. Contexts of crime investigates the social, political and cultural contexts of the policymaking process, including media representations, politics, the role of the victim and the impact of gender. Emerging ideas focuses on innovative ideas that prompt a reconsideration of received wisdom on particular topics, including sexual violence and ethnicity. Charting the key contours of the criminological enterprise on the island of Ireland and placing the Irish material in the context of the wider European and international literature, this book is essential reading for those involved in the study of Irish criminology and international and comparative criminal justice.

Divided into 15 chapters, this book provides the reader with an insight into certain representations of mothers and motherhood in history and today's societies in some areas of the world, notably in Britain and Asia. Key facts about the history of motherhood are presented, together with the use of very recent notions and phrases portraying 'good' and 'bad' mothers. An analysis of the concepts of naming and blaming, along with regret with respect to mothers in 21st century societies, provides food for thought. Other issues addressed are varied and numerous: the politics of early intervention, feminist critique, mothers with disabilities and mothers of disabled children, incarcerated mothers, surrogate mothers, teenage mothers, lesbian mothers, and mothering in Eastern Asia, namely in China, Japan, and Korea. Interestingly, both

visual arts and literature play a crucial role in this analysis. The publication will appeal to students, academics, researchers, and the general public interested in and seeking to comprehend the shifts that have occurred over time in connection with the vast and inexhaustible subject of motherhood and mothers – a private and public matter. Readers are also provided with a rich reference section dealing with the latest publications on the issues tackled by prominent academics and researchers in human geography, women's studies, sociology, gender studies, contemporary history, and the arts.

Research on prisons prior to the prison boom of the 1980s and 1990s focused mainly on inmate subcultures, inmate rights, and sociological interpretations of inmate and guard adaptations to their environment, with qualitative studies and ethnographic methods the norm. In recent years, research has expanded considerably to issues related to inmates' mental health, suicide, managing special types of offenders, risk assessment, and evidence-based treatment programs. The Oxford Handbook of Prisons and Imprisonment provides the only single source that bridges social scientific and behavioral perspectives, providing graduate students with a more comprehensive understanding of the topic, academics with a body of knowledge that will more effectively inform their own research, and practitioners with an overview of evidence-based best practices. Across thirty chapters, leading contributors offer new ideas, critical treatments of substantive topics with theoretical and policy implications, and comprehensive literature reviews that reflect cumulative knowledge on what works and what doesn't. The Handbook covers critical topics in the field, some of which include recent trends in imprisonment, prison gangs, inmate victimization, the use and impact of restrictive housing, unique problems faced by women in prison, special offender populations, risk assessment and treatment effectiveness, prisoner re-entry, and privatization. The Oxford Handbook of Prisons and Imprisonment offers a rich source of information on the current state of institutional corrections around the world, on issues facing both inmates and prison staff, and on how those issues may impede or facilitate the various goals of incarceration.

The need to understand the theories and applications of economic and finance risk has been clear to everyone since the financial crisis, and this collection of original essays proffers broad, high-level explanations of risk and uncertainty. The economics of risk and uncertainty is unlike most branches of economics in spanning from the individual decision-maker to the market (and indeed, social decisions), and ranging from purely theoretical analysis through individual experimentation, empirical analysis, and applied

and policy decisions. It also has close and sometimes conflicting relationships with theoretical and applied statistics, and psychology. The aim of this volume is to provide an overview of diverse aspects of this field, ranging from classical and foundational work through current developments. Presents coherent summaries of risk and uncertainty that inform major areas in economics and finance Divides coverage between theoretical, empirical, and experimental findings Makes the economics of risk and uncertainty accessible to scholars in fields outside economics

Winner of the 2017 British Society of Criminology Book Prize The penal voluntary sector and the relationships between punishment and charity are more topical than ever before. In recent years in England and Wales, the sector has featured significantly in both policy rhetoric and academic commentary. Penal voluntary organisations are increasingly delivering prison and probation services under contract, and this role is set to expand. However, the diverse voluntary organisations which comprise the sector, their varied relationships with statutory agencies and the effects of such work remain very poorly understood. This book provides a wide-ranging and rigorous examination of this policy-relevant but complex and little studied area. It explores what voluntary organisations are doing with prisoners and probationers, how they manage to undertake their work, and the effects of charitable work with prisoners and probationers. The author uses original empirical research and an innovative application of actor-network theory to enable a step change in our understanding of this increasingly significant sector, and develops the policy-centric accounts produced in the last decade to illustrate how voluntary organisations can mediate the experiences of imprisonment and probation at the micro and macro levels. Demonstrating how the legacy of philanthropic work and neoliberal policy reforms over the past thirty years have created a complex three-tier penal voluntary sector of diverse organisations, this cutting-edge interdisciplinary text will be of interest to criminologists, sociologists of work and industry, and those engaged in the voluntary sector.

The Routledge International Handbook of Legal and Investigative Psychology explores contemporary topics in psychological science, applying them to investigative and legal procedures. Written by recognized scholars from around the globe, this book brings together current research, emerging trends, and cutting-edge debates in a single comprehensive and authoritative volume. Drawing from both research and practice, this handbook highlights many important issues such as: how to investigate and prosecute rape; the value of

emotional affect in homicide investigations; and factors affecting jurors' and suspects' decision making. By considering current research, the authors inform both legal and investigative professionals of findings that are of direct relevance to them, and the steps that can be taken to improve efficiency. This collection will inform investigative and legal professionals, advanced psychology students, academics, researchers, and policy makers. It will also be of great interest to researchers from other disciplines, including criminology, policing, and law. This classic best seller, commonly referred to as *The Eagle*, helps students discover the challenges of pursuing justice in our society and identify the roles individuals play in the criminal justice system. Using an interdisciplinary lens, *THE AMERICAN SYSTEM OF CRIMINAL JUSTICE*, 15th Edition, presents elements from criminology, sociology, law, history, psychology, and political science. This approach challenges students to ask important questions and recognize contemporary problems as the means to build their understanding of the system's components and stages as well as its human consequences and policy challenges. The text offers a comprehensive introduction to the field with solid scholarship and approachable writing, and holds student attention with current, compelling events and cases. The combination of these elements helps prepare students to participate in the system as citizens and future criminal justice practitioners.
