This book traces the history of English education in the People's Republic of China from 1949 to the present day. It uses the junior secondary school curriculum as the means to examine how English curriculum developers and textbook writers have confronted the shifting ambiguities and dilemmas over five distinct historical periods. The study of the processes of curriculum development and the products such as syllabi and textbooks offers insights into the construction of an 'official' English, as well as what was considered as acceptable content in English. This book addresses fundamental and significant questions concerning the English promoted in China, namely its characteristics; its changes over time and explanations for such changes; and the kind of content that has been viewed as appropriate for textbooks. To investigate these issues, the analysis draws on qualitative and quantitative data, such as interviews with principal stakeholders and analysis of the syllabus and recommended textbooks. Specifically, it looks at the choice and organization of linguistic components, and the orientation and messages of the curriculum. "Language education in China during the second half of the twentieth century might arguably be called the world's largest language engineering project. In this comprehensive study, Dr Adamson examines a part of that project by charting the twists and turns of English language education from the pre-revolutionary period to the present. He successfully illustrates how tensions in China's massive educational system are negotiated from center to periphery, how textbook writers adapt to the socio-political mandates of their time to construct formal school curricula. Adamson also raises significant questions regarding the contradictions inherent in Chinese globalization." —Heidi Ross, Professor, Department of Educational Leadership and Policy Studies, School of Education, Indiana University at Bloomington "Bob Adamson has provided in this book one of the first detailed studies published in English of the history of a school subject in the PRC. The study provides fascinating insights into the changing nature of the English curriculum, the shifting socio-political context of the PRC and their complex inter-relationships." —Paul Morris, President, The Hong Kong Institute of Education "The learning of English is a crucial aspect of China's opening up to the world and increasingly prominent global role. This welcome volume provides an in-depth historical perspective on this important subject, including the recent periods of modernization (1978–1993) and globalization (1993 to the present). It should be compelling reading for all those involved with contemporary China across a wide spectrum of areas." —Ruth Hayhoe, University of Toronto; President Emerita, The Hong Kong Institute of Education

An excellent book with thorough coverage for MA and BA classes, also very helpful for the students preparing for various competitive and professional examinations.

This book explores a virtually untapped, yet fascinating research area: television dialogue. It reports on a study comparing the language of the American situation comedy "Friends" to natural conversation. Transcripts of the television show and the American English conversation portion of the "Longman Grammar Corpus" provide the data for this corpus-based investigation, which combines Douglas Biber's multidimensional methodology with a frequency-based analysis of close to 100 linguistic features. As a natural offshoot of the research design, this study offers a comprehensive description of the most common linguistic features characterizing natural conversation. Illustrated with numerous dialogue extracts from "Friends" and conversation, topics such as vague, emotional, and informal language are discussed. This book will be an important resource not only for researchers and students specializing in discourse analysis, register variation, and corpus linguistics, but also anyone interested in conversational language and television dialogue."

While intermediate level and above is recommended, these dialogues can also be used to challenge beginners into improving their reading and pronunciation skills. The 10 dialogues in volume 3 feature over 200 Aussie English expressions which can give students planning to go to Australia, or those who have recently arrived, a quick crash course on common Aussie Lingo. This volume also features a bonus glossary with a brief explanation of what the Australian English words, phrases and idioms mean. Normally a glossary is not included as most native English speakers from Australia would know the meanings of the expressions used in the dialogues in the series, and would be able to explain them to students, but in an effort to help people to understand Australian English, even those native English speaking tutors and teachers who are not Australian would be able to quickly understand these dialogues and be able to teach them to others, with help from the glossary. These dialogues have been tested in private tuition lessons hundreds of times and have received great feedback from students new to Australia who are struggling to understand Australians. It is recommended that tutors add to the enjoyment of the lesson by using a strong Australian accent when reading their part of the dialogue. This series of dialogues and conversations has been released to fulfil a demand in the ESL industry for more mature style conversations for use in private tuition as well as pair or group work in the adult classroom. Present-day globalization, migration, and the spread of English have resulted in a great diversity of social and educational contexts in which English learning is taking place. A basic assumption of this book is that because English is an international language, effective pedagogical decisions cannot be made without giving special attention to the many varied contexts in which English is taught and learned. Its unique value is the combination of three strands – globalization, sociolinguistics, and English as an international language – in one focused volume specifically designed for language teachers, providing explicit links between sociolinguistic concepts and language pedagogy. International English in Its Sociolinguistic Contexts: fully recognizes the relationship between social context and language teaching describes the social and sociolinguistic factors that affect the teaching and learning of English examines how the social context is influential in determining which languages are promoted in schools and society and how these languages are taught is unique in directly relating basic constructs in sociolinguistics to English language teaching features case studies that illustrate the diversity of English teaching contexts Directed to a wide TESOL and applied linguistics professional readership, this text will be particularly useful and effective for pre-service and in-service professional development in TESOL for K-12 and higher education levels.

This volume takes the positive view that conversation between persons with dementia and their interlocutors is a privileged site for ongoing cognitive engagement. The book aims to identify and describe specific linguistic devices or strategies at the level of turn-by-turn talk that promote and extend conversation, and to explore real-world engagements that reflect these strategies. Final reflections tie these linguistic strategies and practices to wider issues of the "self" and "agency" in persons with dementia. Thematically, the volume fosters an integrated perspective on communication and cognition in terms of which communicative resources are recognized as cognitive resources, and

communicative interaction is treated as reflecting cognitive engagement. This reflects perspectives in cognitive anthropology and cognitive science that regard human cognitive activity as distributed and culturally rooted. This volume is intended for academic researchers and advanced students in applied linguistics, linguistic and medical anthropology, nursing, and social gerontology; and practice professionals in speech-language pathology and geropsychology.

Zaměřuje se na délku intonační jednotky, pozici nukleárního tónu, slovné druhy a zazení nositele nukleárního tónu, jeho funkci ve vnitřní perspektivě a na kontury různých typů intonačních jednotek. Tyto jevy byly zkoumány ve čtyřech textech – dvou příkladových verzích divadelní
