Vocational Education and Training in Sub-Saharan Africa Celestin Mayombe,2021-09-29 This book analyses the accessibility and success of vocational training programmes for unemployed and disadvantaged youth in Sub-Saharan Africa. Examining the implementation of vocational education and training programmes, the author assesses various internal and external enabling factors that can help foster youth employment. In doing so, the author presents a solid base for robust and evidence-informed practice and policy making for vocational training programmes, analysing such themes as employability skills, the labour market, and work-integrated learning. It also emphasises the importance of stakeholders taking into account the enabling and disabling environments found in a given local, regional or national context. It will be of interest to scholars of vocational training programmes in Sub-Saharan Africa and elsewhere, as well as of youth poverty and unemployment.

The Transition from Graduation to Work Subas Dhakal,Verma Prikshat,Alan Nankervis,John Burgess,2018-08-26 This book reports on the findings from a research study of vocational and higher education graduates' employability challenges. The nature and extent of these challenges, their underlying causes, and effective strategies to address the problems in this area are all analysed from a multiple-stakeholder paradigm. The primary focus of the book is on governments; secondary, vocational, and higher education systems; and industry employers - rather than graduates themselves - in order to highlight the policy and strategy implications for governments, industry and educational systems. Readers will acquire comprehensive information on the nature and extent of graduate employability in terms of country-specific challenges, together with a deeper understanding of their complex causes, and the inter-relatedness between governments, educational systems, industry sectors, and potential employers. They will also be provided with a broad range of stakeholder strategies designed to effectively address these challenges within integrated national and regional approaches.

Our Future ,2012

Season of Hope Alan Hirsch,Sally Hines,2005 Offers an insight into the circumstances under which the policies were developed, implemented and reviewed, as well as a study of the outcomes. This book addresses questions such as: How could an organisation with no previous experience of governing accomplish a peaceful transition to democracy? How did they do it and where are they going?

Skills Shortages in South Africa Johan Erasmus, Mignonne Breier, 2009 Skills shortages in South Africa are widely seen as a major obstacle to the achievement of targeted economic growth rates. Yet there is some dispute as to the nature and extent of these shortages, given the large number of unemployed graduates. The case studies presented here explore the question of shortage in nine key professions and artisanal trades, and find evidence of skills scarcity in most fields. The case studies provide insight into the reasons for shortages and surpluses in relation to South Africa's own context and history. They also consider the international market for knowledge and skills, in which South African qualifications are highly prized. The monograph emanates from a study on sector specific research and related skills requirements commissioned by the South African Department of Labour in 2006. It formed part of a wider research project on scarce and critical skills related to the National Skills Development Strategy and the National Industrial Policy Framework of 2007, for which the Human Sciences Research Council led a research consortium comprising the Development Policy Research Unit at the University of Cape Town and the Sociology of Work Unit at the University of the Witwatersrand.

Gaffney's Local Government in South Africa, 2009

Disability and Social Change Brian Watermeyer, 2006 This powerful volume represents the broadest engagement with disability issues in South Africa yet. Themes include theoretical approaches to, and representations of, disability; governmental and civil society responses to disability issues; aspects of education as these pertain to the oppression/liberation of disabled people; social security for disabled people; the complex politics permeating service provision relationships; and a consideration of disability in relation to human spaces - physical, economic and philosophical. Firmly located within the social model of disability, this collection resonates powerfully with contemporary thinking and research in the disability field and sets a new benchmark for cutting-edge debates in a transforming South Africa.

The Book of Temperance Melody Edwin Paxton Hood, 1850

Education, Economy & Society Salim Vally, Enver Motala, 2014 Education, Economy & Society is a compelling and comprehensive antidote to the misconstrued nature of the relationship between education and society in South Africa. It provides a constructive critique of conventional discourses, but also alternative approaches to understanding the connections between education and the triple scourge of unemployment, inequality, and poverty. The book's contributors passionately argue that South African education finds its value and purpose in a focus on social justice, transformation, and democratic citizenship. The joy of education is to capture human imaginations and unleash their creativity towards a more humane and compassionate society. This rich resource explores the possibilities for a new pedagogy in post-school education and training through empirical research on skills, technology, and issues of employment on the shop floor; a critical analysis of the youth wage subsidy; and workers' education. The book will appeal to a wide audience including students and academics in the fields of industrial sociology, economics, adult education, further education and training, and those in youth development.

Walden, and On The Duty Of Civil Disobedience Henry David Thoreau,2023-05-07 Henry David Thoreau's *Walden* is a philosophical treatise that documents the author's experiences living alone in the woods for two years, two months, and two days. Through his observations of nature, human society, and his own self, Thoreau explores themes of individualism, self-reliance, and the importance of simplicity. In *Walden*, Thoreau argues that people should simplify their lives and focus on the essentials. He believes that living in harmony with nature and minimizing one's material possessions can lead to a more fulfilling life. Thoreau also critiques societal norms and institutions, such as the government and the education system, which he believes stifle creativity and individual thought. Thoreau's writing style in *Walden* is poetic and reflective, often blurring the line between fact and fiction. He uses his experiences in the woods as a lens through which to examine deeper philosophical questions, such as the meaning of life and the role of the individual in society. In *On the Duty of Civil Disobedience*, Henry David Thoreau argues that individuals have a moral obligation to resist unjust laws and government actions through nonviolent means. Thoreau's ideas about civil disobedience were influential in the movements for civil rights and social justice in the 20th century. Thoreau believes that individuals should not blindly obey the law, but instead use their own judgement to determine what is right and wrong. He argues that a person's conscience should take precedence over the law, and that disobedience can be a powerful tool for effecting change. Thoreau's essay is particularly critical of the United States government and its actions, including the Mexican-American War and the institution of slavery. He argues that individuals have a duty to resist these injustices, even if it means breaking the law. Despite his advocacy for civil disobedience, Thoreau emphasizes the importance of nonviolence. He argues that violence only begets more violence, and that peaceful resistance can be more effective in creating lasting change. *On the Duty of Civil Disobedience* is a powerful statement about the importance of individual conscience and the need to resist injustice. Thoreau's ideas about civil disobedience continue to inspire activists and advocates for social justice today.

Mainstreaming Gender in Social Protection for the Informal Economy Naila Kabeer,2008 Explores the gendered dimensions of risk, vulnerability and insecurity and hence the need for a gender perspective in the design of social protection measures. This book provides an understanding of the constraints and barriers that confine women to more poorly remunerated, more casual and more insecure forms of waged and self-employment.

[Structural Approaches in Public Health](#) Marni Sommer,Richard Parker,2013-04-26 A CHOICE Outstanding Academic Title 2014! That health has many social determinants is well established and a myriad range of structural factors - social,

cultural, political, economic, and environmental – are now known to impact on population well-being. Public health practice has started exploring and responding to a range of health-related challenges from a structural paradigm, including individual and population vulnerability to infection with HIV and AIDS, injury-prevention, obesity, and smoking cessation. Recognising the inadequacy of public health responses that focus solely on individual behaviour change to improve population health outcomes, this text promotes a more holistic approach. Discussing the structural factors related to health and well-being that are both within and outside of an individual's control, it explores what form structural approaches can take, the underlying theory of structure as a risk factor and the local realities, environments, and priorities that public health practitioners need to take into consideration. Anchored in empirical evidence, the book provides case studies of innovative and influential interventions – from the 100% condom program, to urban planning, injury prevention, and the provision of adequate clean drinking water and sanitation systems – and concludes with a section on implementing and evaluating structural public health programs. This comprehensive text brings together a selection of internationally-recognised authors to provide an overview for students and practitioners working in or concerned with public health around the globe.

Enterprise ,2005

Anxiety 101: a Guide for College Students Maggie Sarachek, Abbe Greenberg, 2017-09-14 The Anxiety Sisters are back with the second book in their series, which addresses everything you wanted to know about anxiety but were too anxious to ask. Based on current research and interviews with more than 100 [pre]college anxiety sufferers, the focus of this particular book is pre-adult anxiety, which arises between the ages of 17 and 22--a time when most older teenagers are preparing for college and, possibly, to leave home. The paradox of having physically mature bodies topped by not yet fully-developed brains is further complicated by all of the social and cultural pressures felt by this age group. As such, understanding and managing pre-adult anxiety can be particularly tricky. Written with their signature humor and wacky illustrations, Anxiety 101 is both thorough and accessible for [pre]college students and any adults in their lives.
