A New Reading of the Animal Apocalypse of 1 Enoch is the most comprehensive theological commentary on this important second-century BCE Jewish apocalypse to date, laying out the purpose and methodology of this Enochic allegory and using this as the basis for a new commentary on the whole text, presented here in a fresh translation. Against other interpretations that focus on Israel and its institution, Daniel Olson argues that the promise of universal blessing in the Abrahamic covenant is presented in the Animal Apocalypse as the governing dynamic in a sacred history that begins and ends with humanity in general. The authentic Jacob/Israel will appear in the end times and be the catalyst of universal salvation. Book jacket.

The Sahidic version of 1 Samuel is an ancient daughter version of the Septuagint. Because the Sahidic translation was made before most of the Greek manuscripts we know were copied, it potentially contains ancient readings no longer preserved or only faintly attested in the Greek tradition. This study considers the Sahidic version of 1 Samuel as a translation and how it may best be used in Greek textual criticism. The aim of this study is twofold. First, to examine the translation technique of the Sahidic translator. Second, to analyze the affiliations between the Sahidic manuscripts as well as the affiliations between the Sahidic version and Greek traditions. In the translation-technical section, clause

connections and translator's additions feature prominently. In the chapter concerning the affiliations of the Sahidic text, detailed textual analyses prevail. These analyses describe the textual character of each Sahidic manuscript, and search for the existence of secondary readings and/or corruptions. This study supports the creation of a new critical edition of the Septuagint of 1 Samuel for the Göttingen series. With respect to this edition, the primary goal is to identify the affiliations of the Sahidic version. This translation-technical study, however, will additionally allow for a more careful and accurate citation of the Sahidic version within the critical apparatus of the Greek text.

Distinguished in the field of Enochic studies, Gabriele Boccaccini led the way in June 2005 at the Third Enoch Seminar, entirely devoted to the Book of Parables in light of Second Temple Judaism and Christian origins. The unusual and compelling collection of essays found here reflects the spirit of sharing and dialogue that has made these seminars so popular and intriguing to scholars throughout the world. This third collection of essays from these historic meetings contains the observations and contemplations of forty-four scholars, includes a helpful introduction by Boccaccini detailing the history of the movement, and ends with likely prospects for future research and an extensive bibliography compiled by associate editor Jason von Ehrenkrook for further study. Enoch and the Messiah Son of Man will be a significant contribution for the understanding and discussion of ancient Judaism.

The so-called Epistula Apostolorum is an early gospel-like text in which the eleven apostles recount a question-and-answer session with the risen Jesus on Easter morning, intended to equip them for the worldwide mission to which they are now called. The Epistula draws selectively from the Gospels of John and Matthew, while disagreeing with its sources at a number of points and claiming definitive status for its own rendering of the apostolic gospel. This book is based on a new translation of this important but neglected text, drawing on the Coptic, Ethiopic, and Latin manuscript evidence and with variants noted in an English-language critical apparatus. Extensive additional notes are provided to clarify issues of text, translation, and exegesis. The central chapters explore major theological themes such as incarnation, resurrection, and eschatology in the light of related texts within and beyond the New Testament. This book examines all the relevant passages containing

the Term "Son of Man" in both Matthew and the Parables

of Enoch. Depictions of the Son of Man in the Gospel of

Matthew and in the Parables of Enoch (Par. En.) raise

questions about their relationship. The meaning and

origin of the term "Son of Man" are discussed, as well as

the possible influence of Par. En. on Matthew. Literary,

Redaction, Sociological and Narrative criticisms are

employed. Introductory questions of date, provenance

and social setting are addressed for both Matthew and

Par. En. Dates as early as the early second century bce

and as late as the late third century ce have been

proposed for Par. En., but a consensus seems to be growing for the late first century bce. Therefore Matthew could have known Par. En. Sociological methodologies reveal that the author and audience of Par. En. may have been members of an ousted ruling elite, opposed to the current administration, and yearning for a just reversal of fortunes. Sets of characteristics of the Son of Man in Par. En. and Matthew are developed, and the term is examined briefly in the other Gospels. Then the two sets of characteristics are carefully compared. Similarities in vocabulary as well as in the pattern of relationships prove to be intriguing, showing that Matthew and Par. En., in contrast to other writings, share a unique conception of the judgment scene focussed on the Son of Man as eschatological judge. This suggests quite strongly the shaping of Matthew's concept in the direction of Par. En.

Alan D. Crown provides a guide to the techniques used by the Samaritan scribes in copying manuscripts. He places Samaritan works in a description of their literary history and shows the more important manuscripts of each type of literature. In addition there is a listing of Samaritan scribes and the manuscripts for which they were responsible. Overall the work shows that the Samaritan scribes were innovative but their scribal techniques derived from an ancient pool of scribal habits and ideas and they had what can be described as a masoretic tradition of their own. Variation in writing habits arose in different scribal schools, some of them are indicated. All in all, the work is a codicology of Samaritan manuscripts.

James H. Charlesworth begins from a burgeoning point of scholarly consensus: More and more scholars are coming to recognize that the Fourth Gospel is more historically complex than previously thought.

Charlesworth outlines two historical horizons within John. On the one hand, there is the Jewish background to the text (complete with the evangelist's knowledge of Palestinian geography and Jewish customs) which Charlesworth perceives as offering a window into pre-70 Palestinian Judaism. On the other hand, the gospel also reflects a post-70 world in which non-believing Jews, with more unity, begin to part definitely with those who identified Jesus as the Messiah. Split into four sections, this volume first examines the origins of the Fourth Gospel, its evolution in several editions, and its setting in Judea and Galilee. Charlesworth then looks specifically at the figure of Jesus and issues of history. He proceeds to consider this Gospel alongside earlier and contemporaneous Jewish literature, most notably the Dead Sea Scrolls. Finally, the volume engages with John's symbolism and language, looking closely at key aspects in which John differs from the Synoptic Gospels, and raising such provocative questions as whether or not it is possible that Jesus married Mary Magdalene. From one of the New Testament's most noted scholars, this book allows deeper understanding of the ways in which the Gospel of John is a vital resource for understanding both the origin of Christianity and Jesus' position in history.

Serendipitously, at around the same time as Boccaccio published his famous Decameron (1350), the Swiss-German Dominican Ulrich Bonerius published his highly popular collection of fables, The Gemstone. Both authors pursued very similar goals, instructing their audiences about vices and virtues, Boccaccio by telling entertaining, often erotic tales, Bonerius by relating didactic tales, mostly based on animals as the active characters. This book provides the first English translation of all one hundred fables authored by Bonerius. Bonerius drew mostly from the classical Aesopian tradition, and his Gemstone in turn became the crucial source for vast fable collections in the late Middle Ages, and again in the eighteenth and nineteenth centuries. In fact, the famous Grimm brothers included some of his narratives in their fairy tale collection of The Gemstone 1812. Not only was Bonerius an excellent poet, he also understood the depth of human nature exceedingly well, warning about many of people's shortcomings and failures.

They do not have access to your name or your email address, which makes it more difficult for them to access any of your financial information.
