

Everything Sharks All The Shark Facts Photos And Fun That You Can Sink Your Teeth Into Everything

An underwater treasure, Everything You Need To Know About Sharks is a vibrant book that redefines children's reference. Through every exciting page inside, Everything You Need To Know About Sharks dives deep in the pursuit of fascinating facts. It teaches the basics of anatomy (did you know that sharks don't have bones, or that most of a fish's internal organs are in the lower half of its body?) and taxonomy (sharks are fish, but whales are mammals), plus how and where sea creatures live. Everything You Need to Know About Sharks provides ideas for things to make, games to play, quizzes, and shocking facts to share with your friends. It's everything you need to know, and everything you WANT to find out.

Never before published information on shark language and what to do to avoid, deter, or interact with sharks. A practical guide for any ocean goer should you encounter a shark or wish to increase or decrease your chances of such an experience. There is so much more to sharks than meets the eye and we are only beginning to understand them. I hope this book will help others to understand them on a deeper level and I know that the information provided in the series I've written can help save human lives. I hope with a deeper understanding people might also begin to appreciate, care, and my deepest hope is that they might even be inspired enough to join me in efforts to help save the lives of sharks who are currently being slaughtered by the millions.

An oil-filled liver makes the blue shark extra buoyant, allowing this fish to travel incredible distances with ease. One blue shark was tracked as it traveled over 3,740 miles (6,019 kilometers) from New York to Brazil! See what drives the streamlined swimmer in this book for growing readers.

What do sharks like to eat? Which shark glows in the dark? And why do some sharks never stop swimming? Packed with facts about nature's greatest predators and illustrated with full-colour photographs, this book is specially written for children who are just beginning to read alone. Includes links to recommended websites to find out more. This is a highly illustrated ebook that can only be read on the Kindle Fire or other tablet. "Excellent for helping children to learn to use books for research. Short chunks of text and plenty of pictures make these books really fun to read." - Parents in Touch

"Dive into the fascinating world of sharks--from the tiny dwarf dogfish to the ferocious great white"--Cover.

Sand tiger sharks hover in the water as they patiently wait for fish to swim by. To hover, they gulp air at the water's surface and hold it in their bellies! Through engaging photos and text, this leveled title introduces readers to the sand tiger shark's fascinating hunting behaviors, body functions, and environment. Added features further highlight the shark's size, diet, range, and more!

Explores the physical and behavioral characteristics of sharks and examines how they hunt and catch their prey. Includes full-color photographs and further reading sources.

An in-depth guide to sharks includes information on where they live, how they eat, the challenges they face, and whether or not certain species pose a danger to humans.

In this new Misunderstood Shark story from New York Times bestselling duo Ame Dyckman and Scott Magoon, Shark dares to ask the question: Can friends eat friends (and get away with it)? Last time on Underwater World with Bob Jellyfish..."SHARK ATE ME! Now get me OUT, Shark!" "That's strange! I can hear Bob, but I can't see Bob!" This hilarious follow-up to Misunderstood Shark by New York Times bestselling duo Ame Dyckman and Scott Magoon tackles what it really means to be a good friend. Bob is already irate that Shark has eaten him, but when Shark doesn't admit to eating him, Bob is so mad he declares that the ocean isn't big enough for both of them! Friends Don't Eat Friends is exploding with over-the-top humor and awesome marine facts! For example, when Shark overdoses on Finilla Ice Cream after fighting with Bob, we learn that shark teeth are coated with fluoride. Lucky for Shark, he can't get cavities! Join Shark and the gang for another story and find out if Shark learns his lesson about friendship, or if he really is just misunderstood -- again!

Learn all about tiger sharks that will eat almost anything. Easy-to-read text and vibrant, full-color photos captivate young readers and bring these fascinating animals to life. Plus, quick stats diagrams and bolded glossary terms invite readers to zoom in and learn more. Aligned to Common Core Standards and correlated to state standards. Abdo Zoom is a division of ABDO.

Whether your fascination with sharks stems from fear or curiosity, your knowledge of these animals will improve immensely when you consult this book.

Whale sharks are the largest of all fishes, fascinating for comparative studies of all manner of biological fields, including functional anatomy, growth, metabolism, movement ecology, behavior and physiology. These gentle ocean giants have captured the interest

of scientists and the imagination of the public, yet their future is uncertain. The conservation status of whale sharks was upgraded to Endangered on the IUCN Red List and the species faces a range of intense threats from human activities. Can these iconic living animals, who have survived for millions of years, survive us? Written by the world's leading experts in whale shark biology, ecology, and conservation, *Whale Sharks: Biology, Ecology and Conservation* is the first definitive volume about the world's biggest fish. Chapters include discussions of satellite-linked tags, used to track whale shark movements; genetic sequencing, to examine evolutionary adaptations; even the use of underwater ultrasound units to investigate the species' reproduction. The editors hope that by collating what is known, they can make it easier for future researchers, conservationists, and resource managers to fill some of the remaining knowledge gaps, and provide the information they need to join the team. As you work your way through this book, we hope that you will develop a sense of awe and marvel at all of our good fortune to share the ocean, and the planet, with this utterly extraordinary species.

Enhanced by hundreds of original color photographs and beautifully detailed line drawings, *Shark Biology and Conservation* will appeal to anyone who is spellbound by this wondrous, ecologically important, and threatened group, including marine biologists, wildlife educators, students, and shark enthusiasts.

A jaw-dropping visual voyage of fun facts discovery exploring the deep waters of the sea and the mysterious creatures that live in it. Uncover our oceans' secrets in this kid's book with a remarkable array of 80 sharks as well as other fascinating sea creatures that lurk in her depths! Special features include full-color photography throughout, "Meet the Scientist" sidebars, and "In Your Newsfeed" articles about amazing new discoveries.

Don't miss the other books in the series, including Animal Planet Chapter Books: Dinosaurs!.

In *Surviving the Shark*, Jonathan Kathrein describes his incredible shark attack experience. The book covers all aspects of Kathrein's survival, beginning with the eerie moments just before the attack, when something smashes into Kathrein's hand as he paddles on his board, waiting for a wave off Stinson Beach in northern California. Realizing it is probably shark, and possibly a great white, Kathrein tries to paddle away, furiously trying to make it toward shore, where he sees some of his friends on the beach. But it is too late, as the great white returns, slams into him, then grabs his leg and pulls him underwater, thrashing him back and forth, trying to rip his leg off. How Kathrein is able to escape and make his way to shore, despite his horrific wounds, is nothing short of amazing. But that's just the beginning, as he now faces months of physical and mental rehabilitation, all the while dealing with the constant media attention that the attack has generated. Gradually, with the help of his family and friends, Kathrein makes a recovery. Today, Kathrein gives lectures on shark conservation, as well as on such topics as avoiding shark attacks when you're in the water. In this book, he not only writes of his ordeal, but also delves into shark behavior, and explains his desire to spread shark awareness. There is also an underlying theme of tremendous familial love and Kathrein's extreme fervor for life.

Rule the ocean in this shark-tastic sticker and activity book from National Geographic Kids! This super engaging activity book is packed with mazes, spelling and pattern games, drawing activities, shark facts, and more. Shark-crazy kids are sure to love these pages loaded with fun, learning as they go!

One of New York Times' Twelve Books for Feminist Boys and Girls! This is the story of a woman who dared to dive, defy, discover, and inspire. This is the story of Shark Lady. One of the best science picture books for children, Shark Lady is a must for both teachers and parents alike! An Amazon Best Book of the Month Named a Best Children's Book of 2017 by Parents magazine Eugenie Clark fell in love with sharks from the first moment she saw them at the aquarium. She couldn't imagine anything more exciting than studying these graceful creatures. But Eugenie quickly discovered that many people believed sharks to be ugly and scary—and they didn't think women should be scientists. Determined to

prove them wrong, Eugenie devoted her life to learning about sharks. After earning several college degrees and making countless discoveries, Eugenie wrote herself into the history of science, earning the nickname "Shark Lady." Through her accomplishments, she taught the world that sharks were to be admired rather than feared and that women can do anything they set their minds to. An inspiring story by critically acclaimed zoologist Jess Keating about finding the strength to discover truths that others aren't daring enough to see. Includes a timeline of Eugenie's life and many fantastic shark facts! The perfect choice for parents looking for: Books about sharks Inspiring nonfiction narrative books Role model books for girls and boys Kids STEM books

Said to be the fastest shark of all, the mako shark can cut through water at 40 miles per hour. Perhaps more impressive is the hang time achieved when the torpedo-shaped fish launches up to 20 feet above the surface of the water. This book explores all the stunts of the speedy mako shark.

"In Everything Sharks, exciting photos depict great whites, hammerheads, and more. Scientists tell hair-raising tales about encounters. With its awesome facts and action-packed images, this book brings kids close to the mysterious lives of sharks."--Amazon.com.

Gliding through the water at breakneck speeds--a fin, just skimming the surface of the water. The biggest jaws you've ever seen. These are the iconic images that flash through all our minds when we think of sharks, but there's so much more to know about these majestic predators of the sea. If you're already a fan of the Discovery's phenomenon Shark Week, then you will love this book! From the unique look of the prehistoric Whorl shark, to the hunting techniques of the Great White, all the thrills and chills of Shark Week are now here for year-round reading. Filled with photos, first-hand accounts of shark attacks, and unbelievable facts (Did you know that there are sharks that live in volcanoes?), this book is for every shark fanatic who wants to get even more up close and personal. Now you really can live every week like it's shark week.

Examines twenty different shark species, including bull shark, cookiecutter shark, and frilled shark, before providing information on their size, location, and weight, along with a specialized bite fact on each shark.

In one corner, swinging in ever so slowly, is the most relaxed guy himself: Sloth! And making a splash in the other corner is Shark, ready to sink her teeth into this competition! Get ready to rumble in this latest instalment of the funny face-off series! These two amazing animals bring their best game to this closely matched competition. At first glance, they might seem too different to duke out anything, but wait-you're in for a surprise! Readers have a ringside seat to view as they battle it out in 22 kooky and quirky categories, like Coolest Hangout, Weirdest Relatives, Best Smile, Biggest Appetite, and so much more. It's up to you to follow the action and decide who's the ultimate winner! A final spread devoted solely

to conservation helps further National Geographic's core mission to save the planet. One thing we know is certain: You'll be a shark and sloth expert by the end of this epic showdown!
