Awakening from a months-long coma speaking the Lord's Prayer in the original Aramaic, Zack Kashian triggers media and religious frenzies before he is hired by a secret neuroscience group that researches near-death experiences. Istanbul – Kushta – Constantinople presents twelve studies that draw on contemporary life narratives that shed light on little explored aspects of nineteenth-century Ottoman Istanbul. As a broad category of personal writing that goes beyond the traditional confines of the autobiography, life narratives range from memoirs, letters, reports, travelogues and descriptions of daily life in the city and its different neighborhoods. By focusing on individual experiences and perspectives, life narratives allow the historian to transcend rigid political narratives and to recover lost voices, especially of those underrepresented groups, including women and members of non-Muslim communities. The studies of this volume focus on a variety of narratives produced by Muslim and Christian women, by non-Muslims and Muslims, as well as by natives and outsiders alike. They dispel European Orientalist stereotypes and cross class divides and ethnic identities. Travel accounts of outsiders provide us with valuable observations of daily life in the city that residents often overlooked.

A professor of archaeology hurries to uncover a circle of stones before construction begins on the spot, until he begins having nightmares and finds himself catapulted into a menacing world where the edges of reality are not firm.

Anatolia was home to a large number of polities in the medieval period. Given its location at the geographical and chronological juncture between Byzantines and the Ottomans, its story tends to be read through the Seljuk experience. This obscures the multiple experiences and spaces of Anatolia under the Byzantine empire, Turko-Muslim dynasties contemporary to the Seljuks, the Mongol Ilkhanids, and the various beyliks of eastern and western Anatolia. This book looks beyond political structures and towards a reconsideration of the interactions between the rural and the urban; an analysis of the relationships between architecture, culture and power; and an examination of the region's multiple geographies. In order to expand historiographical perspectives it draws on a wide variety of sources (architectural, artistic, documentary and literary), including texts composed in several languages (Arabic, Armenian, Byzantine Greek, Persian and Turkish). Original in its coverage of this period from the perspective of multiple polities, religions and languages, this volume is also the first to truly embrace the cultural complexity that was inherent in the reality of daily life in medieval Anatolia and surrounding regions.

In 1980, at the end of the most intensely political period of his work and life, Louis Althusser penned *Philosophy for Non-philosophers*. Available here for the first time in English, *Philosophy for Non-philosophers* constitutes a rigorous and engaged attempt to address a wide reading public unfamiliar with Althusser's project. As such, the work is a concentration of the most fundamental theses of Althusser's own ideas, and presents a synthesis of his sprawling and disparate philosophical and political writings. Nowhere else does Althusser push the distinction between philosophy and other disciplines as far, or develop in such detail the concept of 'practice'. Rather than a work of 'popular philosophy', *Philosophy for Non-philosophers* is a continuation and conglomeration of Althusser's thought; a thought whose radicality is still perceptible in those that have followed since. *Philosophy for Non-philosophers* thus provides a vivid encapsulation of Althusser's seminal influence on the leading thinkers of today, including Ranciere, Badiou, Balibar, and Žižek.

Much like *A Midwife's Tale* and *The Unredeemed Captive*, this novel is about power relationships in early American society, religion, and politics--with insights into the initial development and operation of government, the maintenance of social order, and the experiences of individual men and women.

After a brief introduction to the study of the region, the early chapters of the book survey the essentials of Middle Eastern history; important historical narratives; and the region's languages, religions, and global connections. Students are guided through the material with relevant maps, resource boxes, and text boxes that support and guide further independent exploration of the topics at hand. The second half of the book presents interdisciplinary case studies, each of which focuses on a specific country or sub-region and a salient issue, offering a taste of the cultural distinctiveness of the particular country while also drawing attention to global linkages. Readers will come away from this book with an understanding of the larger historical, political, and cultural frameworks that shaped the Middle East as we know it today, and of current issues that have relevance in the Middle East and beyond.

What is to be done? This was the question asked by Lenin in 1901 when he was having doubts about the revolutionary capabilities of the Russian working class. 77 years later, Louis Althusser asked the same question. Faced with the tidal wave of May '68 and the recurrent hostility of the Communist Party towards the protests, he wanted to offer readers a succinct guide for the revolution to come. Lively, brilliant and engaged, this short text is wholly oriented towards one objective: to organise the working class struggle. Althusser provides a sharp critique of Antonio Gramsci's writings and of Eurocommunism, which seduced various Marxists at the time. But this book is above all the opportunity for Althusser to state what he had not succeeded in articulating elsewhere: what concrete conditions would need to be satisfied before the revolution could take place. Left unfinished, it is published here in English for the first time.

In this unprecedented account, Chandra Manning uses letters, diaries, and regimental newspapers to take the reader inside the minds of Civil War soldiers--black and white, Northern and Southern--as they fought and marched across a divided country. With stunning poise and narrative verve, Manning explores how the Union and Confederate soldiers came to identify slavery as the central issue of the war and what that meant for a tumultuous nation. This is a brilliant and eye-opening debut and an invaluable addition to our understanding of the Civil War as it has never been rendered before. In so doing, Machor takes us ever closer to understanding the particular and varying reading strategies of historical audiences and how they impacted authors' conceptions of their own readership.

The sponsoring of the Muslim Brotherhood by the Emirate of Qatar and its influential satellite channel, Al Jazeera, contributed to shaping the prelude to the uprising. But the explosion's deep roots, asserts Achcar, mean that what happened until now is but the beginning of a revolutionary process likely to extend for many more years to come. The author identifies the actors and dynamics of the revolutionary process: the role of various social and political movements, the emergence of young actors making intensive use of new information and communication technologies, and the nature of power elites and existing state apparatuses that determine different conditions for regime overthrow in each case. Drawing a balance-sheet of the uprising in the countries that have been most affected by it until now, i.e. Tunisia, Egypt, Yemen, Bahrain, Libya and Syria, Achcar sheds special light on the nature and role of the movements that use Islam as a political banner.

In 1517, the Ottoman Sultan Selim "the Grim" conquered Egypt and brought his empire for the first time in history into direct contact with the trading world of the Indian Ocean. During the decades that followed, the Ottomans became progressively more engaged in the affairs of this vast and previously unfamiliar region, eventually to the point of launching a systematic ideological, military and commercial challenge to the Portuguese Empire, their main rival for control of the lucrative trade routes of maritime Asia. The Ottoman Age of Exploration is the first comprehensive historical account of this century-long struggle for global dominance, a struggle that raged from the shores of the Mediterranean to the Straits of Malacca, and from the interior of Africa to the steppes of Central Asia. Based on extensive research in the archives of Turkey and Portugal, as well as materials written on three continents and in a half dozen languages, it presents an unprecedented picture of the global reach of the Ottoman state during the sixteenth century. It does so through a dramatic recounting of the lives of sultans and viziers, spies, corsairs, soldiers-of-fortune, and women from the imperial harem. Challenging traditional narratives of Western dominance, it argues that the Ottomans were not only active participants in the Age of Exploration, but ultimately bested the Portuguese in the game of global politics by using sea power, dynastic prestige, and commercial savoir faire to create their own imperial dominion throughout the Indian Ocean.

Continental philosophy has entered a new period of ferment. The long deconstructionist era was followed with a period dominated by Deleuze, which has in turn evolved into a new situation still difficult to define. However, one common thread running through the new brand of continental positions is a renewed attention to materialist and realist options in philosophy. Among the leaders of the established generation, this new focus takes numerous forms. It might be hard to find many shared positions in the writings of Badiou, DeLanda, Laruelle, Latour, Stengers, and i ek, but what is missing from their positions is an obsession with the critique of written texts. All of them elaborate a positive ontology, despite the incompatibility of their results. Meanwhile, the new generation of continental thinkers is pushing these trends still further, as seen in currents ranging from transcendental materialism to the London-based speculative realism movement to new revivals of Derrida. As indicated by the title *The Speculative Turn*, the new currents of continental philosophy depart from the text-centered hermeneutic models of the past and engage in daring speculations about the nature of reality itself. This anthology assembles authors, of several generations and numerous nationalities, who will be at the centre of debate in continental philosophy for decades to come."

On the New looks at the economies of exchange and valuation that drive modern culture's key sites: the intellectual marketplace and the archive. As ideas move from one context to another, newness is created. This continuous shifting of the line that separates the valuable from the worthless, culture from profanity, is at the center of Boris Groys's investigation which aims to map the uncharted territory of what constitutes artistic innovation and what processes underpin its recognition and appropriation.

In the late 1970s and 1980s, Louis Althusser endured a period of intense mental instability during which he murdered his wife and was committed to a psychiatric hospital. Spanning this period, this fourth volume reveals his wrestling with a series of theoretical problems to produce some of his finest work.

Based on Wardle and Downs' research, the first edition of *Writing about Writing* marked a milestone in the field of composition. By showing students how to draw on what they know in order to contribute to ongoing conversations about writing and literacy, it helped them transfer their writing-related skills from first-year composition to other courses and contexts. Now used by tens of thousands of students, *Writing about Writing* presents accessible writing studies research by authors such as Mike Rose, Deborah Brandt, John Swales, and Nancy Sommers,

together with popular texts by authors such as Malcolm X and Anne Lamott, and texts from student writers. Throughout the book, friendly explanations and scaffolded activities and questions help students connect to readings and develop knowledge about writing that they can use at work, in their everyday lives, and in college. The new edition builds on this success and refines the approach to make it even more teachable. The second edition includes more help for understanding the rhetorical situation and an exciting new chapter on multimodal composing. The print text is now integrated with e-Pages for Writing about Writing, designed to take advantage of what the Web can do. The conversation on writing about writing continues on the authors' blog, Write On: Notes on Writing about Writing (a channel on Bedford Bits, the Bedford/St. Martin's blog for teachers of writing).

Is American English in decline? Are regional dialects dying out? Is there a difference between men and women in how they adapt to linguistic variations? These questions, and more, about our language catapulted Robert MacNeil and William Cran—the authors (with Robert McCrum) of the language classic *The Story of English*—across the country in search of the answers. *Do You Speak American?* is the tale of their discoveries, which provocatively show how the standard for American English—if a standard exists—is changing quickly and dramatically. On a journey that takes them from the Northeast, through Appalachia and the Deep South, and west to California, the authors observe everyday verbal interactions and in a host of interviews with native speakers glean the linguistic quirks and traditions characteristic of each area. While examining the histories and controversies surrounding both written and spoken American English, they address anxieties and assumptions that, when explored, are highly emotional, such as the growing influence of Spanish as a threat to American English and the special treatment of African-American vernacular English. And, challenging the purists who think grammatical standards are in serious deterioration and that media saturation of our culture is homogenizing our speech, they surprise us with unpredictable responses. With insight and wit, MacNeil and Cran bring us a compelling book that is at once a celebration and a potent study of our singular language. Each wave of immigration has brought new words to enrich the American language. Do you recognize the origin of 1. blunderbuss, sleigh, stoop, coleslaw, boss, waffle? Or 2. dumb, ouch, shyster, check, kaput, scram, bummer? Or 3. phooey, pastrami, glitch, kibbitz, schnozzle? Or 4. broccoli, espresso, pizza, pasta, macaroni, radio? Or 5. smithereens, lollapalooza, speakeasy, hooligan? Or 6. vamoose, chaps, stampede, mustang, ranch, corral? 1. Dutch 2. German 3. Yiddish 4. Italian 5. Irish 6. Spanish

At the foot of Mount Ararat on the crossroads of the eastern and western worlds, medieval Armenians dominated international trading routes that reached from Europe to China and India to Russia. As the first people to convert officially to Christianity, they commissioned and produced some of the most extraordinary religious objects of the Middle Ages. These objects—from sumptuous illuminated manuscripts to handsome carvings, liturgical furnishings, gilded reliquaries, exquisite textiles, and printed books—show the strong persistence of their own cultural identity, as well as the multicultural influences of Armenia's interactions with Romans, Byzantines, Persians, Muslims, Mongols, Ottomans, and Europeans. This unprecedented volume, written by a team of international scholars and members of the Armenian religious community, contextualizes and celebrates the compelling works of art that define Armenian medieval culture. It features breathtaking photographs of archaeological sites and stunning churches and monasteries that help fill out this unique history. With groundbreaking essays and exquisite illustrations, Armenia illuminates the singular achievements of a great medieval civilization. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana}

The Hazzard family becomes increasingly horrified when a genocidal experiment gone wrong results in their son's transformation into a feral and dangerous beast, and the government is determined to cover up the facts. Reprint.

Javanmardi is one of those Persian terms that is frequently mentioned in discussions of Persian identity, and yet its precise meaning is difficult to comprehend. A number of equivalents have been offered, including chivalry and manliness, and while these terms are not incorrect, javanmardi transcends them. The concept encompasses character traits of generosity, selflessness, hospitality, bravery, courage, honesty, truthfulness and justice--and yet there are occasions when the exact opposite of these is required for one to be a javanmard. At times it would seem that being a javanmard is about knowing and doing the right thing, although this definition, too, falls short of the term's full meaning.

The present collection is the product of a three-year project financed by the British Institute of Persian Studies on the theme of "Javanmardi in the Persianate world." The articles in this volume represent the sheer range, influence, and importance that the concept has had in creating and contributing to Persianate identities over the past one hundred and fifty years. The contributions are intentionally broad in scope. Rather than focus, for example, on medieval Sufi manifestations of javanmardi, both medieval and modern studies were encouraged, as were literary, artistic, archaeological, and sociological studies among others. The opening essays examine the concept's origin in medieval history and legends throughout a geographical background that spans from modern Iran to Turkey, Armenia, and Bosnia, among both Muslim and Christian communities. Subsequent articles explore modern implications of javanmardi within such contexts as sportsmanship, political heroism, gender fluidity, cinematic representations, and the advent of digitalization.

One of the best-known continental theorists writing today, Gérard Genette here explores our aesthetic relation to works of art. Through an analysis of the views of thinkers ranging from David Hume and Immanuel Kant to Monroe C. Beardsley, Arthur Danto, and Nelson Goodman, Genette seeks to identify the place of the aesthetic in a theory of artistic appreciation. His discussion is rich in detailed examples drawn from all of the arts. *The Aesthetic Relation* is a companion volume to *The Work of Art: Immanence and Transcendence*, published by Cornell in 1997. Taken together, the two books offer a comprehensive theory of art which addresses the work of art as at once object and action. Genette maintains that our aesthetic relation to all types of objects presupposes that special attention is paid to their outward aspect (rather than to their usefulness) when appraising them. Such appraisals, while wholly subjective and temporary, are expressed as objective and universal judgments about the items in question. Further, he asserts that our aesthetic relation to works of art in particular is based on an awareness of an aesthetic intention that defines an object as a work of art, as well as on an awareness of a work's position in its historical and generic field.
