politicians, regulators, civil society and media commentators, as well as detailed documentary scrutiny of legislative and regulatory proposals and Facebook's corporate statements, the book presents a comprehensive but clear overview of the current debate around Facebook and the global debate on the regulation of social media in the era of 'surveillance capitalism.' Chapters examine the business and growing institutional power of Facebook as it has unfolded over the fifteen years since its creation, the benefits and meanings that it has provided for its users, its disruptive challenge to the contemporary media environment, its shaping of conversations, and the emerging calls for its further regulation. The book considers Facebook's alleged role in the rise of democratic movements around the world as well as its suggested role in the election of Donald Trump and the UK vote to leave the European Union. This book argues that Facebook, in some shape or form, is likely to be with us into the foreseeable future and that how we address the societal challenges that it provokes, and the economic system that underpins it, will define how human societies demonstrate their capacity to protect and enhance democracy and ensure that no corporation can set itself above democratic institutions. This is an important research volume for academics and researchers in the areas of media studies, communications, social media and political science.

This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook , LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries (e.g., the shared economy models of Uber and Airbnb). The 2018 (9th) edition, brings forth the

Today, Facebook is nearly unrecognizable from its first, modest iteration. In light of recent controversies surrounding election-influencing “fake news” accounts, the handling of its users’ personal data, and growing discontent with the actions of its founder and CEO—who has enormous power over what the world sees and says—never has a company been more central to the national conversation. Millions of words have been written about Facebook, but no one has told the complete story, documenting its ascendancy and missteps.
