Sinan Antoon returns to the Iraq war in a poetic and provocative tribute to reclaiming memory Widely-celebrated author Sinan Antoon's fourth and most sophisticated novel follows Nameer, a young Iraqi scholar earning his doctorate at Harvard, who is hired by filmmakers to help document the devastation of the 2003 invasion of Iraq. During the excursion, Nameer ventures to al-Mutanabbi street in Baghdad, famed for its bookshops, and encounters Wadood, an eccentric bookseller who is trying to catalogue everything destroyed by war, from objects, buildings, books and manuscripts, flora and fauna, to humans. Entrusted with the catalogue and obsessed with Wadood's project, Nameer finds life in New York movingly intertwined with fragments from his homeland's past and its present—destroyed letters, verses, epigraphs, and anecdotes—in this stylistically ambitious panorama of the wreckage of war and the power of memory.

A critical examination of economics' past and future, and how it needs to change, by one of the most eminent political economists of our time

The dominant view in economics is that money and government should play only minor roles in economic life. Economic outcomes, it is claimed, are best left to the "invisible hand" of the market. Yet these claims remain staunchly unsettled. The view taken in this important new book is that the omnipresence of uncertainty makes money and government essential features of any market economy. Since Adam Smith, classical economics has espoused non-intervention in markets. The Great Depression brought Keynesian economics to the fore; but stagflation in the 1970s brought a return to small-state orthodoxy. The 2008 global financial crash should have brought a reevaluation of that stance; instead the response has been punishing austerity and anemic recovery. This book aims to reintroduce Keynes's central insights to a new generation of economists, and embolden them to return money and government to the starring roles in the economic drama that they deserve.

For the past 15 years, fantasy artist Jasmine Becket-Griffith has captivated a worldwide audience with her imaginative acrylic paintings. Exploring realms of sparkling whimsy and gothic melancholy, her original characters evoke an emotional response with their large luminous eyes. This volume contains a comprehensive compilation of fine colour reproductions of Jasmine's paintings and serves as a true treasure for long-time collectors as well as being a very accessible introduction for new fans. In addition to detailed personal insights from the artist, the artworks are supplemented with the poetry and short stories of Amber Logan and Kachina Glenn - the artist's sisters - illuminating the histories behind some of Jasmine's most beloved characters.

The Little Fairy Sister is the story of Bridget's adventures among the wee people. She meets the most delightful little creatures: the Dragon-fly, the Kookaburra, the Lizard, the Teddy Bears, the Pelican, as well as the Mannikins, the Merman and, of course, the Fairies. The ethereal images of fairies created by Ida Rentoul Outhwaite (1888-1960) are an indelible part of Australia's pictorial history.

Be enchanted as you color in these beautiful, black and white fantasy paintings, optimized for coloring.

Fairies are real, and they're all around us! Award-winning author-illustrator Phoebe Wahl offers a fanciful and beautifully illustrated peek into the hidden world of fairies, sprites, and other magical creatures. A girl searches for fairies in her backyard and the woods beyond, following little clues and traces of magic. Fairies and other magical creatures can be found on every page, hidden among the flowers, trees and pebbles. But although readers can see them, the girl keeps searching, just one step behind... In the end, it is clear (both to the girl and readers) that there is magic all around, even when it's hidden in plain sight. Phoebe Wahl takes us deep into the world of fairies, and her vibrant, multi-textured woodland scenes are every bit as enchanting as the creatures therein. A gorgeously illustrated paean to imagination and the natural world. "Delightful . . . This gently magical outing will appeal not only to longtime lovers of European folklore, but also to fans of the popular "fairy door" phenomenon."--Kirkus Reviews

Bricks and Mortar is the story of the sex trade in a big city in the former GDR, from just before 1989 to the present day, charting the development of the industry from absolute prohibition to full legality in the twenty years following the reunification of Germany. The focus is on the rise and fall of one man from football hooligan to large-scale landlord and service- provider for prostitutes to, ultimately, a man persecuted by those he once trusted. But we also hear other voices: many different women who work in prostitution, their clients, small-time gangsters, an ex-jockey searching for his drug-addict daughter, a businessman from the West, a girl forced into child prostitution, a detective, a pirate radio presenter... In his most ambitious book to date, Clemens Meyer pays homage to modernist, East German and contemporary writers like Alfred Döblin, Wolfgang Hilbig and David Peace but uses his own style and almost hallucinatory techniques. Time shifts and stretches, people die and come to life again, and Meyer takes his characters seriously and challenges his readers in this dizzying eye-opening novel that also finds inspiration in the films of Russ Meyer, Takashi Miike, Gaspar Noé and David Lynch.

The designs by the three most influential people who shaped Carmel-by-the-Sea architecturally in its first half-century are well-represented: M.J. Murphy, who literally built the town, with hundreds of homes and buildings to his credit; Hugh Comstock, who defined it with his storybook cottages that gave the village its fairy-tale charm; and Jon Konigshofer, who modernized it through his trademarked, postwar Hillside House. Throughout its history, Carmel-by-the-Sea, California, has attracted unique, spirited, and sometimes eclectic individuals, and this is reflected in its architecture.
