

## Farm Lessons 17

June and Dec. issues contain listings of periodicals.

The book seeks to address the intersection of food organics and the emergence of a new contractualism between producers, distributors and consumers, and between nation states. Additionally, it seeks to cater to the needs of a discerning public concerned about how its own country aims to meet their demands for organic food quality and safety, as well as how they will benefit from integration in the standard-setting processes increasingly occurring regionally and internationally. This edited volume brings together expert scholars and practitioners and draws on their respective insights and experiences in the field of organics, food and health safety. The book is organized in three parts. Part I outlines certain international perspectives; Part II reflects upon relevant histories and influences and finally, Part III examines the organic food regulatory regime of various jurisdictions in the Asia Pacific.

In her own singularly beautiful style, Newbery Medal winner Sharon Creech intricately weaves together two tales, one funny, one bittersweet, to create a heartwarming, compelling, and utterly moving story of love, loss, and the complexity of human emotion. Thirteen-year-old Salamanca Tree Hiddle, proud of her country roots and the "Indian-ness in her blood," travels from Ohio to Idaho with her eccentric grandparents. Along the way, she tells them of the story of Phoebe Winterbottom, who received mysterious messages, who met a "potential lunatic," and whose mother disappeared. As Sal entertains her grandparents with Phoebe's outrageous story, her own story begins to unfold—the story of a thirteen-year-old girl whose only wish is to

be reunited with her missing mother.
