Textile design inhabits a liminal space spanning art, design and craft. This book explores how textile design bridges the decorative and the functional, and takes us from handcrafting to industrial manufacture. In doing so, it distinguishes textiles as a distinctive design discipline, against the backdrop of today's emerging design issues. With commentaries from a range of international design scholars, the book demonstrates how design theory is now being employed in diverse scenarios to encourage innovation beyond the field of design itself. Positioning textiles within contemporary design research, *Textile Design Theory in the Making* reveals how the theory and practice of textile design exist in a synergistic, creative relationship. Drawing on qualitative research methods, including auto-ethnography and feminist critique, the book provides a theoretical underpinning for textile designers working in interdisciplinary scenarios, uniting theory and texts from the fields of anthropology, philosophy, literature and material design.

Whilst it may at first seem obvious that textiles play a pivotal role in fashion design, the use of fabric is not often discussed in its own right, but is seen merely as a material with which a designer can execute their vision. Fashioning Fabrics seeks to redress this (as it were). Using profiles of numerous iconic designers as well as emerging talents, all of whom put fabric development at the centre of their practices, Fashioning Fabrics attempts to create an overview of how textiles are evolving and impacting on the fashion industry. From Issey Miyake's sculptural pleats to Jessica Ogden's salvaged and reworked vintage fabrics, this book pays homage to the experimental, the beautiful and the extravagant in textile and fashion design.
