Imagine your misfortune if, like Stanley Yelnats, you found yourself the victim of a miscarriage of justice and interned in Camp Green Lake Correctional Institute. How would you survive? Thoughtfully Louis Sachar has leant his knowledge and expertise to the subject and created this wonderful, quirky, and utterly essential guide to toughing it out in the Texan desert. Spiced with lots of information about the characters in HOLES, as well as lots of do's and don'ts for survival, this is an essential book for all those hundreds of thousands of HOLES' fans. This book contextualises and details Herman Melville's artistic career and outlines the relationship between Melville and Ralph Waldo Emerson. Michael McLoughlin divides Melville's professional career as a novelist into two major phases corresponding to the growth and shift in his art. In the developmental phase, from 1845 to 1850, Melville wrote his five Transcendental novels of the sea, in which he defended self-reliance, attacked conformity, and learned to employ Transcendental symbols of increasing complexity. This phase culminates in Moby-Dick, with its remarkable matching of Transcendental idealism with tragic drama, influenced by Hawthorne. After 1851, Melville endeavoured to find new ways to express himself and to re-envision human experience philosophically. In this period of transition, Melville wrote anti-Transcendental fiction attacking self-reliance as well as conformity and substituting fatalism for Emersonian optimism. According to McLoughlin, Moby-Dick represents an important transitional moment in Herman Melville's art, dramatically altering tendencies inherent in the novels from Typee onward; in contrast to Melville's blithely exciting and largely optimistic first six novels of the sea, Melville's later works - beginning with his pivotal epic Moby-

Dick - assume a much darker and increasingly anti-Transcendental philosophical position. William Faulkner was one of the few major writers of the period following World War I to retain a sense of the place of abstractions in life and in art. Faulkner saw life as a process of flux and change and abstractions as a means of either denying actuality or of coping with change and providing a solid touchstone in the flux. William Faulkner: The Abstract and the Actual is the first critical study of Faulkner to examine in depth the theme of evasion and distortion of existence through abstractions—a theme that can be found to a greater or lesser degree in every Faulkner novel. The book covers the entire seventeen-novel canon and includes discussions of a significant number of short stories. Its thematic organization points out the unity and continuity of Faulkner's work. Examining the interrelationships between Faulkner's fiction and modern thinking, Panthea Broughton shows the insight Faulkner had into the philosophical problem of the abstract versus the actual. She concludes that the central dilemma in Faulkner's fiction—resistance to flux or change—is also one of the salient problems of the modern world.

Harold March, the rising reviewer and social critic, was walking vigorously across a great tableland of moors and commons, the horizon of which was fringed with the far-off woods of the famous estate of Torwood Park. He was a good-looking young man in tweeds, with very pale curly hair and pale clear eyes. Walking in wind and sun in the very landscape of liberty, he was still young enough to remember his politics and not merely try to forget them. For his errand at Torwood Park was a political one; it was the place of appointment named by no less a person than the Chancellor of the Exchequer, Sir Howard Horne, then introducing his so-called Socialist budget, and prepared to expound it in an interview with so promising a

penman. Harold March was the sort of man who knows everything about politics, and nothing about politicians. He also knew a great deal about art, letters, philosophy, and general culture; about almost everything, indeed, except the world he was living in.

Everyone knows that "the face can wear a mask," that a person may be a good actor and put on a certain expression that may deceive even the best judgment. But hands cannot change as the result of a mere effort to please; the character they express is the real nature of the individual—the true character that has been formed by heredity or that has grown up with the person by long years of habit. The characteristics alluded to below are those which may be easily observed and which are aids to a rapid judgment of character and which I have never before been able to give to the public in such a concise way. The more elaborate details concerning the ultimate success of the person one is talking to, their more intimate character and their future development will be found in their proper place, in this book.

Two lives, fated to interact in some violent way. That was the prediction that Richard Shawcross had been raised believing. He had learned that he and an unknown lady from a French Family would encounter each other in a violent situation in her twentieth year. That encounter would be the means of saving each other; but from what, had not been disclosed. Richard had forgotten all about the prophecy made at his birth, when he had briefly returned from the Continent and fighting Napoleon. That same night, on

his way home for just the one night, he had blundered upon a robbery. Three men were striving to rob an older gentleman and his passenger; a young lady, until he had ridden out of the fog with his saber drawn and had summarily dealt with them. After the carriage and its passengers had gone, their rescuer discovered a strange talisman threaded on a green ribbon on the ground. The young lady had lost it. The coin matched one about his own neck, and exactly matched another that his older sister had also been given. They were all part of that same prophecy from many years earlier. Then, two years later, another fate intervenes. In an act of revenge upon one villainous family, for what has happened to his sister, he kidnaps the daughter of the family from her bed in the dead of night. When he confronts her with the reality of her circumstance and what is to be her fate at his hands, she responds in a way that astounds him. This was not the person he had expected to be faced with, but someone else altogether. He begins to recognize that he must rapidly re-evaluate what his options are to save her from the situation that now faces them both. However, the matter is taken from his hands when a knife wound she had inflicted upon him overcomes him and strands them both in a remote mansion; she, knowing little of what has happened to bring about her violent abduction, and he, lying unconscious on the floor and likely to die without her assistance.

Law in the Courts of Love traces the literary history and diversity of past legal systems. These 'minor jurisprudences' range from the spiritual laws of the courts of conscience to the code and judgements of love handed down by women's courts in medieval France. Professor Goodrich presents the 15th Century Courts of Love in Paris as one instance

of an alternative jurisdiction drawn from the diversities of the legal and literary past. Their textual records are correspondingly mixed in genre, being in the form of poems, narratives, plays, treaties and judicial decisions. More broadly, these studies trace certain boundaries of modern law and make up one of many forms of legal knowledge which escape today's vision of a unitary law. The author believes that the unquestionable faith in a unity law and its distance from person and emotion is precisely what makes impossible the attention to the individual that justice ultimately requires. *Law in the Courts of Love* shows how the historical diversity of forms and procedures of law can competently form the basis for critical revisions of contemporary legal doctrine and professional practice. This book will be of interest to undergraduate and postgraduate students of law and literature, critical legal studies and legal history, or anyone wishing to specialise in feminist legal theory.

Fate is an epic tale of World War II and a profound reckoning with the dark forces that dominated the twentieth century. Interweaving a transfixing account of the battle of Stalingrad with the story of a single middle-class family, the Shaposhnikovs, scattered by fortune from Germany to Siberia, Vasily Grossman fashions an immense, intricately detailed tapestry depicting a time of almost unimaginable horror and even stranger hope. Life and Fate juxtaposes bedrooms and snipers' nests, scientific laboratories and the Gulag, taking us deep into the hearts and minds of characters ranging from a boy on his way to the gas chambers to Hitler and Stalin themselves. This novel of unsparing realism and visionary moral intensity is one of the supreme achievements of modern Russian literature.

International bestselling author of *The Concubine's Children*, Denise Chong returns to the subject of her most beloved book, the lives and times of Canada's early Chinese families. In 2011, Denise Chong set out to collect the history of the earliest Chinese settlers in and around Ottawa, who made their homes far from any major Chinatown. Many would open cafes, establishments that once dotted the landscape across the country and were a monument to small-town Canada. This generation of Chinese immigrants lived at the intersection of the Exclusion Act in Canada, which divided families between here and China, and 2 momentous upheavals in China: the Japanese invasion and war-time occupation; and the victory of the Communists, which ultimately led these settlers to sever ties with China. This book of overlapping stories explores the trajectory of a universal immigrant experience, one of looking in the rear view mirror while at the same time, travelling toward an uncertain future. As a working-class poet, born in 1793 to an impoverished family in rural England, John Clare has often been considered of interest for the unusual nature of his life and career rather than for his poetry. In this book, Johanne Clare argues that he should be taken seriously both as a poet and as a representative figure in a period of social and agrarian upheaval. She discusses Clare's political attitudes and his views on the social issues which most affected him - poverty, economic inequality, class prejudice, and the enclosure movement - and shows how his social identity and experience were intricately related to his major writings.
