The Council of Europe released a preliminary version of the Manual for Relating Language Examinations to the Common European Framework of Reference for Languages (CEFR) in 2003. Over the next 5 years a wide range of institutions and individuals undertook case studies to pilot this draft version. Towards the close of the piloting phase, a two-day colloquium was held in Cambridge, UK enabling practitioners and academics to reflect on and share their experiences of applying the Manual procedures. Insights from this colloquium

informed the Manual revision project during 2008/2009. This volume features selected case studies presented at the Cambridge Colloquium in December 2007. They include the linking of a single test to the CEFR, the CEFR-linking of suites of examinations at different levels and large scale national projects undertaken by examination boards and specialist research institutes. Some studies focus on part of an examination, while others involve all test components. Some apply one or two of the procedures - familiarisation, specification, standardisation, and empirical validation. As well as describing their studies and reporting their findings, contributors reflect and comment on their experience of using the draft Manual. A clear and comprehensive introductory chapter explains the development of the CEFR and the draft Manual for linking tests, and discusses its relevance for the future. The volume will be of interest to examination boards, language test developers and educational policy-makers, as well as academic lecturers, researchers and graduate students interested in the principles and practice of aligning tests to the CEFR.

practice, and tips for the revised Cambridge English exams. This effective combination of testing and teaching has proved a popular formula with teachers and students. Students are carefully guided through the tests and shown how they work and what they have to do to succeed in each part of the exam. Additional step-by-step support for the Writing paper is offered in all the tests. All of the tests are written by experts in the field, which means that students preparing for the exams experience material that is appropriate for and at a level at least as high as the actual exams. Candidates internationally find the Speaking test very challenging. they offer in the public domain. This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical evidence. It operationalises a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components, examining and then analysing Cambridge ESOL listening tasks from the following perspectives: Test Taker; Cognitive Validity; Context Validity; Scoring Validity; Criterion-related Validity; and Consequential Validity.

This book documents a major study comparing the Cambridge First Certificate in English (FCE) with the Test of English as a Foreign Language (TOEFL) to investigate similarities in test content, candidature and use. While both tests were designed to measure many of the same abilities, they represent radically different approaches to language test development, reflecting deeper differences between educational measurement traditions in the US and UK. The thorough investigation of the fundamental characteristics and operational utility of two of the most widely used English tests for foreign students makes this study a valuable contribution to language testing research. As such, it will be of considerable interest to language testing specialists and examination boards, as well as to academic researchers and graduate students in the field of language assessment more generally.

This book investigates the issue of cloze-validity as a measure of second language reading comprehension. It starts off by making a distinction between general reading ability and the more specific reading comprehension followed by a thorough review of the related research on L2 reading comprehension and sorting out the confusion in the literature in this categorization. A comprehensive account of cloze procedure is presented discussing its origin, different versions, its use for teaching and testing purposes, as well the latest research on cloze as measures of readability, language proficiency and second language reading. The book

includes studies conducted at several stages on validating cloze as a measure of reading and interview and questionnaire techniques are applied to investigate the validity of eight cloze tests, criterion reading tests, and other cloze and reading tests in general. Two new cloze tests, i.e. reader-centered cloze test and phrase cloze test, are also introduced and researched as measures of reading ability. The book concludes with suggestions for developing tests that can better measure reading comprehension in light of recent research insights on the complex and dynamic nature of reading. This book will appeal to researchers, lecturers and graduate and post-graduate students taking a course in Second Language Acquisition, Applied Linguistics, TESOL, Language Assessment, and Educational Measurement. This publication highlights the need for test developers to provide clear explanations of the ability constructs which underpin tests offered in the public domain. An explanation is increasingly required, if the validity of test score interpretation and use are to be supported both logically, and with empirical evidence. The book demonstrates the application of a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components which reflect the practical nature and quality of an actual testing event. It examines Cambridge ESOL writing tasks from the following perspectives: Test Taker, Cognitive Validity, Context Validity, Scoring Validity, Criterion-related Validity and Consequential Validity. The authors show how an understanding and analysis of the framework and its components in relation to specific writing tests can assist test developers to operationalise their tests more effectively, especially in relation to criterial distinctions across test levels.
