An organization's ability to achieve strategic goals through programs and supporting projects depends on its ability to establish a future vision, set strategic goals, select the most valuable projects, and then execute flawlessly. Organizational strategic alignment is achieved by converting strategic plans and goals into a valuable portfolio of programs and supporting projects. Strategic project leaders and project teams execute the project plans to meet objectives and deliver project outcomes, adding value to the organization. As the role of the business analyst evolves and matures, senior business analysts will emerge as the key individuals in the organization who have the depth of business acumen and technological proficiency to serve as both business and technology experts. In this capacity, business analysts will become involved in an array of activities designed to devise a strategy to reach the organization's future business vision by achieving strategic goals. As the business analyst elevates into a leadership role as the business and

Based on the best-selling American Management Association seminar, a latest edition outlines sustainable project initiatives for improving processes, streamlining productivity and cutting costs, in a volume that also provides reference charts and illustrative examples. Original.

Unfortunately, much of what has been written about software engineering comes from an academic perspective which does not always address the everyday concerns that software developers and managers face. With decreasing software budgets and increasing demands from users and senior management, technology directors need a complete guide to the subject

This book presents a set of tools that will aid in deciding whether a project should go ahead, be improved, or abandoned altogether by pinpointing its vulnerabilities. It offers a review of project feasibility analysis, and more critically, psychodynamic aspects that are often neglected, including how stakeholders interact. It provides a complement to the common techniques used for analyzing technical, financial, and marketing feasibility. The goal is to identify "hidden truths" and eliminate those gray areas that jeopardize
