As centres for logistics activities, seaports have traditionally been the focus of maritime logistics chains. However, changes in production patterns, supported by the development of rapid transport of goods over long distances, have altered the logistics landscape. As a result, the relevance of port hinterland transport has become more important, with a consequent need for the high utilisation of transport resources and infrastructure through the consolidation of cargo flows and for seaports to extend their influence within their hinterlands to increase their competitiveness. The development worldwide of inland ports, terminals and dryports in their various forms, together with associated new functions and strategies, address these challenges in diverse ways to realise the potential benefits that come from the successful implementation of inland ports that connect seamlessly into transportation systems. This book comprises case studies and state-of-the-art examples of dryports in different parts of the world that have varying economic, social, institutional and environmental realities and which exhibit the complexity of, and diverse approaches to, this recent logistics phenomenon.

This book examines the linkages between exchange rates and India's merchandise trade since the 1990s. It looks at India's trade in the post-liberalisation period through its two main components: commodities and trading partners, and provides a bird's eye view through aggregate analyses accompanied by a historical narrative of the evolution of trade and exchange rate dynamics. Presenting a comprehensive analysis of bilateral and product-specific trade, the book explores the impact of exchange rate on labour intensive sectors and charts out major development. It also offers compelling evidence to suggest that if some commodities are identified as integral to India's export plans, then the impact of exchange rate must be weighed by the Reserve Bank of India (RBI) prior to a market intervention. This timely volume will be of interest to scholars and researchers of economics, business and finance, development studies, trade, business, and industry as well as practitioners, think-tanks, and policy makers.

An innovative and forward-looking volume which challenges conventional thinking regarding the inevitability of globalisation. Essential reading for those interested in the development of and the potential alternatives to globalisation. Soon after Independence in 1947, Government of India followed a policy of social control of important financial institutions. As a result of state domination, India's financial system was characterised by barriers to entry, control over pricing of financial assets, high transaction costs and restrictions on movement of funds from one market segment to another. It was in this backdrop that wide-ranging financial sector reforms were introduced as an integral part of the economic reforms programme started in early 1990s. The present book explains and examines at length the changes which have swept India's financial sector over the last 60 years since Independence, with focus on post-1991 period. The book is organised into 9 parts, each part containing chapters/information relevant to the theme of that part.

Central banks occupy a unique space in their national governments and in the global economy. The study of central banking however, has too often been dominated by an abstract theoretical approach that fails to grasp central banks' institutional nuances. This comprehensive and insightful Handbook, takes a wider angle on central banks and central banking, focusing on the institutions of central banking. By 'institutions', Peter Conti-Brown and Rosa Lastra refer to the laws, traditions, norms, and rules used to structure central bank organisations. The Research Handbook on Central Banking's institutional approach is one of the most interdisciplinary efforts to consider its topic, and includes chapters from leading and rising central bankers, economists, lawyers, legal scholars, political scientists, historians, and others.
