Governing the Commons Elinor Ostrom, 2015-09-23 Tackles one of the most enduring and contentious issues of positive political economy: common pool resource management.

The Structuring of Organizations Henry Mintzberg, 2009 Synthesizes the empirical literature on organizational structuring to answer the question of how organizations structure themselves --how they resolve needed coordination and division of labor. Organizational structuring is defined as the sum total of the ways in which an organization divides and coordinates its labor into distinct tasks. Further analysis of the research literature is needed in order to build a conceptual framework that will fill in the significant gap left by not connecting a description of structure to its context: how an organization actually functions. The results of the synthesis are five basic configurations (the Simple Structure, the Machine Bureaucracy, the Professional Bureaucracy, the Divisionalized Form, and the Adhocracy) that serve as the fundamental elements of structure in an organization. Five basic parts of the contemporary organization (the operating core, the strategic apex, the middle line, the technostructure, and the support staff), and five theories of how it functions (i.e., as a system characterized by formal authority, regulated flows, informal communication, work constellations, and ad hoc decision processes) are theorized. Organizations function in complex and varying ways, due to differing flows -including flows of authority, work material, information, and decision processes. These flows depend on the age, size, and environment of the organization; additionally, technology plays a key role because of its importance in structuring the operating core. Finally, design parameters are described - based on the above five basic parts and five theories - that are used as a means of coordination and division of labor in designing organizational structures, in order to establish stable patterns of behavior. (CJC).

Recommendations on the Transport of Dangerous Goods United Nations, 2020-01-06 The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the

United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the Recommendations on the Transport of Dangerous Goods in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled Manual of Tests and Criteria.

Embracing Watershed Politics Edella Schlager, 2008-06-30 As Americans try to better manage and protect the natural

resources of our watersheds, is politics getting in the way? Why does watershed management end up being so political? In *Embracing Watershed Politics*, political scientists Edella Schlager and William Blomquist provide timely illustrations and thought-provoking explanations of why political considerations are essential, unavoidable, and in some ways even desirable elements of decision making about water and watersheds. With decades of combined study of water management in the United States, they focus on the many contending interests and communities found in America's watersheds, the fundamental dimensions of decision making, and the impacts of science, complexity, and uncertainty on watershed management. Enriched by case studies of the organizations and decision making processes in several major U.S. watersheds (the Delaware River Basin, San Gabriel River, Platte River, and the Columbia River Basin), *Embracing Watershed Politics* presents a reasoned explanation of why there are so few watershed-scale integrated management agencies and how the more diverse multi-organizational arrangements found in the vast majorities of watersheds work. Although the presence of multiple organizations representing a multitude of communities of interest complicates watershed management, these institutional arrangements can-under certain conditions-suit the complexity and uncertainty associated with watershed management in the twenty-first century.

Anchor of Resolve: a History of U. S. Naval Forces Central Command/Fifth Fleet Robert Schneller, 2012-05-27 This illustrated history covers the history of the U.S. Navy in the Middle East. America's interests in the Middle East, southwest Asia, and eastern Africa date almost to the founding of the nation. Since World War II, the Navy has been the first line of defense for these interests. From the establishment of the Middle East Force (MEF) in 1949 through the beginning of the 21st century, the U.S. Navy served as a force for stability and peace in the region. The Navy's presence helped prevent

regional crises from escalating into wars, enforce international sanctions, and minimize damage done by regional conflicts to American and allied interests. The work concentrates on the Navy's command relationships, roles and missions, and operations in the period leading up to the First Gulf War, the war itself, and the wars in Afghanistan and Iraq. The Naval Historical Center completed this illustrated history of U.S. Naval Forces Central Command/Fifth Fleet to accompany the exhibit it installed in the headquarters building on board Naval Support Activity Bahrain. In keeping with the Center's mission of supporting the operating forces, the purpose of this book is to inform visitors to the headquarters and American Sailors serving in the Middle East about the Navy's presence in Arabian waters and the variety of missions the Navy has conducted there, in peace and in war. From the presidency of George Washington through the beginning of the Cold War, Americans have forged and maintained ties with the peoples of the Middle East. These bonds strengthened in 1949 with the establishment of the Middle East Force and a permanent U.S. naval presence in the Arabian Gulf. They grew even stronger when America committed itself to the defense of its friends in the region, establishing Central Command and its naval component, Naval Forces Central Command, in 1983. The United States Navy remains an anchor of resolve in promoting peace, stability, and prosperity in the Central Command area of responsibility. The author, Dr. Robert J. Schneller Jr., is well qualified to present this informative and well-illustrated history. He is co-author of a book on the Navy's role in operations Desert Shield and Desert Storm, and since 9/11 has been researching and writing about the Navy's role in the Global War on terrorism. As with each of our histories, the views expressed herein are those of the author alone and not those of U.S. Naval Forces Central Command/Fifth Fleet, the Department of the Navy, or any other U.S. government agency.

Natural Resources, Neither Curse nor Destiny Daniel Lederman, William F Maloney, 2006-10-23 'Natural Resources: Neither Course nor Destiny' brings together a variety of analytical perspectives, ranging from econometric analyses of economic growth to historical studies of successful development experiences in countries with abundant natural resources. The evidence suggests that natural resources are neither a curse nor destiny. Natural resources can actually spur economic development when combined with the accumulation of knowledge for economic innovation. Furthermore, natural resource abundance need not be the only determinant of the structure of trade in developing countries. In fact, the accumulation of knowledge, infrastructure, and the quality of governance all seem to determine not only what countries produce and export, but also how firms and workers produce any good.
