Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. World Development Report 2020: Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

A guide to restoring and maintaining third-generation Corvettes offers comprehensive and photography-enhanced coverage of the full range of the C3's unique components, from engines and drivetrains to chassis and interiors. Original.

The inside track to India's most powerful tycoons The eight business maharajas profiled here are among Asia's most powerful industrial tycoons, Their combined turnover runs into billions of rupees, and between them they employ some 650,000 people, while indirectly affecting the lives of millions more. Sip a cup of tea, drive to work, listen to music, build a house and the chances are that in these and a myriad other ways you are using products that they manufacture or market. By any yardstick, the achievements of these men would rank among the great business stories of our time. How did these men build their enormous empires? What are their management secrets? How did they thrive and prosper even as others failed? What is their vision for the future? Top business writer and industry insider Gita Piramal draws on exhaustive interviews and in-depth research to discover the answers to these and related questions in her profiles of the men who will lead the country's push to become an industrial superpower in the 21st century.

In only 37 days, the star-crossed romance between Diana, Princess of Wales and Dodi Fayed, son of Egyptian billionaire Mohammed Fayed, became one of the greatest -- and most tragic -- of the 20th century. Accounts of their storybook affair were everywhere, and the world mourned together when they were killed in a car accident in Paris on August 30, 1997, yet this memoir is the first to get to the heart of the matter the way nothing else has. Tenderly written by Dodi's personal assistant and confidante for eight years, this book has the authority of the man who witnessed more of their relationship than anyone (he was with them 24 of those 37 days). Rather than expounding on the incomprehensibility of their untimely death, the focus is on their journey of life -- from the languorous days on the Jonikal (Fayed's fabulous yacht), where they danced to music from *The English Patient*, to the quiet moment when they ate dinner together on a couch, with their plates on their laps. The controversy surrounding the accident

is addressed, as is the grieving and moving on of the family and friends of Diana and Dodi. What is most powerful about this special book, however, is its depiction of the love that made them so happy, and that made us all so sad when we lost them. Includes entries for maps and atlases.

19th Century Britain: the abolitionists have won. Slavery is outlawed. A valiant victory - but it's all too easy to forget that in the rest of the world the inhuman practice is still a part of everyday life. A thought that the usually clear-thinking Mattie Henderson chooses to suppress when she finds herself unexpectedly married and on her way to South Carolina with her new husband. Mattie realises too late that she is heading towards a country where a bitter civil war is about to break out - brother against brother, father against son. And the innocent, as always, will suffer with the guilty. A generation later and the battle is still not won: the grim slave trade still flourishes. This time it is Mattie's estranged and headstrong son Harry who, against the backdrop of the glorious River Nile finds himself caught up in the murderous machinations of the slavers. From the American civil war to the slave trade in Egypt, Freedom's Banner is the perfect generational saga of love, family and redemption for fans of Josephine Cox, Lily Graham and Natasha Lester.

England, 1906: A country divided, in turmoil, teetering on the brink of a social revolution... Living hand to mouth in London's teeming docklands, Sally Smith knows very little of the working-man's fight for a living wage, even less of women's battle for the vote, and nothing of Europe's relentless march towards war. Yet these events will affect her as profoundly as she is to affect those close to her: Toby, the urchin she rescues from starvation; Philippa Van Damme, who shows her a world she had never dreamed of; and the Patten family, stimulating and eccentric, whose orphanage becomes her first real home, and whose social revolution she will find herself reluctantly involved in... From the squalor of the East End slums to the devastation of the Flanders Fields, Tomorrow, Jerusalem is a stirring evocation of a lost generation, and the passionate tale of one woman's fight against all odds. Perfect for fans of Santa Montefiore, Lucinda Riley and Kate Morton.

Includes, 1982-1995: Les Livres du mois, also published separately.

This volume contains the selected papers of the first I.D.M.M.E. conference on 'Integrated Design and Manufacturing in Mechanical Engineering', held in Nantes from 15-17 April 1996. Its objective was to discuss the questions related to the definition of the optimal design and manufacturing processes and to their integration through coherent methodologies in adapted environments. The initiative of the Conference and the organization thereof, is mainly due to the efforts of the french PRIMECA group (Pool of Computer Resources for Mechanics) started eight years ago. We were able to attract the international community with the support of the International Institution for Production Engineering Research (C.I.R.P.). The conference brought together two hundred and fifty specialists from around the world. About ninety papers and twenty posters were presented covering three main topics : optimization and evaluation of the product design process, optimization and evaluation of the manufacturing systems and methodological aspects.

collections de langue française.

This book is about South-North, North-South relations between Africa and Europe, presenting the personal narratives of musicians in different locations across Africa and Europe, and those of the people who constitute their networks within the wider artistic, cultural, and civil society milieus of globalizing societies.

The essential book for Chevrolet Corvette C3 owners. Write down and follow all the maintenance and restoration operations of your Corvette: number of hours worked, spare parts purchased and observations during your work. A real tool for any Corvette C3 enthusiast.

The international hit returns with even more wit and insight into the hidden rules that make England English.

This award-winning grammar course book provides the basis for linguistic courses and projects on translation, contrastive linguistics, stylistics, reading and discourse studies. Accessible and reader-friendly throughout, key features include: chapters divided into modules of class-length materials each new concept clearly explained and highlighted authentic texts from a wide range of sources, both spoken and written, to illustrate grammatical usage clear chapter and module summaries enabling efficient class preparation and student revision.

This open access book offers a comparative overview on Portuguese emigration in Europe and outside the EU in times of recession. It looks at Portuguese emigrants who, after the crisis of 2008, moved both intra-EU, such as UK, France, Switzerland, Germany and Spain, but also into countries with historical links, such as the USA and Canada, and to Portuguese speaking countries such as Brazil, Angola and Mozambique, as well as the processes of return. In addition to the dynamics of movement, the book provides an in-depth analysis of the heterogeneity of this emigration. It deepens the multifaceted identities concerning social and professional pathways among highly skilled and less skilled emigrants. The labour market continues to be the main regulatory force of Portuguese emigration, which helps to explain the outflow and the processes of settlement and return. Nonetheless, this book demonstrates that non-economic factors have likewise been of great importance in the decision to emigrate. As such this book will be a valuable read to policy makers, students and scholars in migration. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

The Golden age of Indian industry, as it now seems in retrospect, lasted from 1951 to '62. and industrialists of the lime were not afraid to think ahead and plan big. Among the entrepreneurs who led this Industrial resurgence, four were particularly outstanding, G.D. Birla, Walchand Hirachand, Kasturbhai Lalbhai and, J.R.D. Tata. Gita Piramal, author of the acclaimed Business Maharajas, sensitively recreates the Lives and Times of these four titans of industry. She draws upon hitherto untapped sources of information to Sketch her profiles, making htis perhaps the closest Look at these legends this fair. Thought provoking and incisive. Business Legends is a compelling Account of ambition and achievement.

This book comprehensively analyzes the impact of continuing European integration on industrial relations institutions and outcomes. It organizes an immensely rich body of theoretical and empirical material to sustain its core argument that the governance of industrial relations is increasingly multi-level. Cross-national influences are shown to mix with national ones and involve the European sector and company, as well as Community, levels. Competing tendencies towards 'Europeanization', 'Americanization' and 'Re-nationalization' are identified. The approach is multi-disciplinary and truly cross-national. It deals with both the theory and practice of industrial relations in contemporary Europe.

Cet ouvrage rassemble plus de 70 fiches portant sur une question de chimie en relation avec notre environnement comme par exemple : Comment estimer la durée de gravure d'un DVD ? Comment allumer une LED avec un citron ? Quelle est la pression sous une bouteille de champagne ? Quelle est la durée de formation d'une grotte ? ... Les thèmes abordés couvrent la majorité du programme de première année des CPGE. Chaque chapitre contient : la liste des questions des données utiles à la résolution du problème ou simplement culturelles des rappels de cours ou des indications une solution détaillée.

"Who Is God?" is a Bible Lesson Series that attempts to help the reader understand the character of God. Many people go through life knowing about God, but not fully knowing and understanding His true character. In these lessons, you will learn some of the names of God as they describe who God is and what He means in our lives.

The book titled *The Collaborative Economy in Action: European Perspectives* is one of the important outcomes of the COST Action CA16121, *From Sharing to Caring: Examining the Socio-Technical Aspects of the Collaborative Economy* (short name: *Sharing and Caring*; sharingandcaring.eu) that was active between March 2017 and September 2021. The Action was funded by the European Cooperation in Science and Technology - COST (www.cost.eu/actions/CA16121). The main objective of the COST Action *Sharing and Caring* is the development of a European network of researchers and practitioners interested in investigating the collaborative economy models, platforms, and their socio-technological implications. The network involves scholars, practitioners, communities, and policymakers. The COST Action *Sharing and Caring* helped to connect research initiatives across Europe and enabled scientists to develop their ideas by collaborating with peers. This collaboration opportunity represented a boost for the participants' research, careers, and innovation potential. The main aim of this book is to provide a comprehensive overview of the collaborative economy (CE) in European countries with a variety of its aspects for a deeper understanding of the phenomenon as a whole. For this reason, in July 2017, an open call for country reports was distributed among the members of the COST Action *Sharing and Caring*. Representatives of the member countries were invited to produce short country reports covering: definition(s) of the CE; types and models of the CE; key stakeholders involved; as well as legislation and technological tools relevant for the CE. Submitted reports varied in length and regarding the level of detail included, in accordance with how much information was available in each respective country at the time of writing. Editors of the book have compiled these early reports into a summary report, which was intended as a first step in mapping the state of the CE in Europe. The *Member Countries Report on the Collaborative Economy*, edited by Gaia Mosconi, Agnieszka Lukasiewicz, and Gabriela Avram (2018) that was published on the *Sharing and Caring* website, represented its first synergetic outcome and provided an overview of the CE phenomenon as interpreted and manifested in each of the countries part of the network. Additionally, Sergio Nassare-Aznar, Kosjenka Duman*?*, and Giulia Priora compiled a *Preliminary Legal Analysis of Country Reports on Cases of Collaborative Economy* (2018). In 2018, after undertaking an analysis of the previous reports' strengths and weaknesses, the book editors issued a call for an updated version of these country reports. Prof. Ann Light advised the editorial team, proposing a new format for country reports and 4000 words limit. The template included: Introduction, Definition, Key Questions, Examples, Illustration, Context, Developments, Issues, Other Major Players, and Relevant Literature. The new template was approved by the Management Committee in October 2018. The task force that had supported the production of the first series of country reports (Dimitar Trajanov, Maria del Mar Alonso, Bálint Balázs, Kosjenka Duman*?*, and Gabriela Avram) acted as mentors for the team of authors in each country. The final reports arrived at the end of 2018, bringing the total number of submissions to 30 (twenty-nine European countries plus Georgia). A call for book editors was issued, and a new editorial team was formed by volunteers from the participants of the

COST Action: Andrzej Klimczuk, Vida ?esnuyte, Cristina Miguel, Santa Mijalche, Gabriela Avram, Bori Simonovits, Bálint Balázs, Kostas Stefanidis, and Rafael Laurenti. The editorial team organized the double-blind reviews of reports and communicated to the authors the requirements for improving their texts. After reviews, the authors submitted updated versions of their country reports providing up-to-date interdisciplinary analysis on the state of the CE in 2019, when the reports were collected. During the final phase, the chapters were again reviewed by the lead editors together with all editorial team members. At the time, the intention was to update these reports again just before the end of the COST Action Sharing and Caring in 2021 and to produce a third edition. However, the COVID-19 pandemic changed these plans. Thus, this final volume was created by 82 scholars-editors and contributors-and consists of reports on 27 countries participating in the COST Action.

A considerable amount of public debate and media print has been devoted to the "war between science and religion." In his accessible and eminently readable new book, Stephen M. Barr demonstrates that what is really at war with religion is not science itself, but a philosophy called scientific materialism. *Modern Physics and Ancient Faith* argues that the great discoveries of modern physics are more compatible with the central teachings of Christianity and Judaism about God, the cosmos, and the human soul than with the atheistic viewpoint of scientific materialism. Scientific materialism grew out of scientific discoveries made from the time of Copernicus up to the beginning of the twentieth century. These discoveries led many thoughtful people to the conclusion that the universe has no cause or purpose, that the human race is an accidental by-product of blind material forces, and that the ultimate reality is matter itself. Barr contends that the revolutionary discoveries of the twentieth century run counter to this line of thought. He uses five of these discoveries--the Big Bang theory, unified field theories, anthropic coincidences, Gdel's Theorem in mathematics, and quantum theory--to cast serious doubt on the materialist's view of the world and to give greater credence to Judeo-Christian claims about God and the universe. Written in clear language, Barr's rigorous and fair text explains modern physics to general readers without oversimplification. Using the insights of modern physics, he reveals that modern scientific discoveries and religious faith are deeply consonant. Anyone with an interest in science and religion will find *Modern Physics and Ancient Faith* invaluable. "A modern physicist who writes with extraordinary clarity and verve, and is familiar with the intellectual arguments long used by the ancient faiths, Stephen Barr gives a brilliant defense of the integrity of science in the teeth of its most powerful modern bias, by telling the exciting story of the rise, complacency, and fall of scientific materialism. As his story crackles along, and just at the point of reaching really difficult concepts, he has a knack for inventing illustrations that make one's inner light bulbs flash again and again." --Michael Novak, Winner of the 1994 Templeton Prize for Progress in Religion "Barr has produced a brilliant and authoritative defense of Biblical faith in the light of contemporary science. He perceives a serious conflict, not between modern physics and ancient faith, but between religion and materialism. I know of no other book that makes the case against materialism so lucidly, honestly, and deftly." --Owen Gingerich, Harvard-Smithsonian Center for Astrophysics "Written from the viewpoint of an accomplished physicist, this book is an invaluable contribution to the growing interest in the relationship between science and religion. The arguments are rigorously logical and the documentation is excellent." --Robert Scherrer, Ohio State University

Stan Weinstein's Secrets For Profiting in Bull and Bear Markets reveals his successful methods for timing investments to produce consistently profitable results. Topics include: Stan Weinstein's personal philosophy on investing The ideal time to buy Refining the buying process Knowing when to sell Selling Short Using the best long-term indicators to spot Bull and Bear markets Odds, ends, and profits

From the author of Argo comes an unforgettable behind-the-scenes story of espionage in action. In the first ever memoir by a top-level operative to be authorized by the CIA, Antonio J. Mendez reveals the cunning tricks and insights that helped save hundreds from deadly situations. Adept at creating new identities for anyone, anywhere, Mendez was involved in operations all over the world, from "Wild West" adventures in East Asia to Cold War intrigue in Moscow. In 1980, he orchestrated the escape of six Americans from a hostage situation in revolutionary Tehran, Iran. This extraordinary operation inspired the movie Argo, directed by and starring Ben Affleck. The Master of Disguise gives us a privileged look at what really happens at the highest levels of international espionage: in the field, undercover, and behind closed doors.
