other vital measures • And much more! The numbers are too important to allow others to translate for you. You need to know how to read them yourself. Imagine the impact on future decisions when you grasp not only what the numbers mean but can use that insight to drive your business forward.

Now in its 10th edition, Accounting for Non-Accountants provides the perfect introduction to the basics of accounting and finance. Designed for non-specialists with little or no background in accounting, it guides readers through the maze of financial terms and accounting concepts and techniques in a clear and easy-to-follow style. Updated for 2015, Accounting for Non-Accountants includes information on the new UK GAAP accounting standards as well as an overview of current international standards, and is structured to provide in-depth understanding in three key areas: annual accounts (including income statements, balance sheets, cash flow and reporting standards); management accounting (costing, marginal costing and budgetary controls); and financial management (including the cost of capital, working capital, investment appraisal and performance analysis).

Financial Management for Non-Financial Managers is an accessible, practical and easy to understand guide that will allow any manager to gain confidence in understanding financial matters, managing a budget and dealing with bankers, accountants and finance professionals. A source of invaluable expert advice on all the essential aspects of financial management within the context of running a business, it covers: business

structures, accounting and financial statements, analysis and ratios, planning, budgeting, product and service costing, setting selling prices, investment appraisal, finance and working capital, taxation and international transactions. This book explains financial literacy in the context of management, showing how improved awareness of finances can lead to increased value creation and protection for your business. Aimed at the practicing business manager, Financial Management for Non-Financial Managers includes case studies, spreadsheets and worked examples to accompany key skills and practices explained in the book.

This book investigates the going-concern principle in the non-financial disclosure by companies in the international scenario proposing concepts and challenges to come. Following the main accounting literature, requirements and regulations, this book proposes the current state of the art in the non-financial disclosure, collecting main mandatory and voluntary frameworks and standards (e.g. European Directive 2014/95/UE on non-financial information, Global Reporting Initiative, International Integrated Reporting Council, Sustainability Accounting Standards Board, Climate Disclosure Standard Board, Carbon Disclosure Project, AA1000). This is a useful proposition for the investigation of the presence versus absence of the going concern in the sustainability and non-financial reports and disclosure by companies. Through a qualitative methodology, this book is intended to show the incidence of the going-concern in the non-financial disclosure and to what content and meaning it is referred.

THE MCGRAW-HILL EXECUTIVE MBA SERIES "Executive education is suddenly every CEO's favorite strategic weapon." --BusinessWeek Now repackaged in easily transportable paperback editions, these informative titles--written by frontline executive education professors and modeled after the programs of the nation's top business schools--will find new popularity with today's on-the-go, every-second-counts executive. Although the need to expand the boundaries of financial reporting has been discussed since the mid-1990s, little consideration has been given to the evolution and discourses of integrated reporting of non-financial aspects. Yet by investigating how and why an organisation defines and its reporting boundaries, it is possible to understand what is

truly "valued" (or not) in its business model. This innovative book reviews the guidelines and frameworks from the major relevant international organisations including: the International Accounting Standards Board, Global Reporting Initiative, Sustainability Accounting Standards Board, International Integrated Reporting Council, Carbon Disclosure Standards Board, and the World Intellectual Capital Initiative, and analyses their development and impact on the boundaries of financial and non-financial reporting. Illustrated with case studies and interviews with representatives of these organisations, this concise volume makes a significant contribution to the future of reporting theory and practice. It will be of great interest to advanced students, researchers, practitioners and policy makers.

Long term asset owners and managers, while seeking high risk-adjusted returns and efficiently allocating scarce financial capital to the highest value economic activities, have the essential and formidable role of ensuring the sustainability of return. But generally accepted financial accounting methods are ill-equipped to provide clear signals of the risks and opportunities created by scarce natural and human capital. Hence many investment managers in global financial markets, while performing due diligence on portfolio companies, examine metrics of non-financial performance, especially environmental, social and governance (ESG) indicators. Broken into three sections, this book outlines the rationale for and methods used in six areas where financial acumen has been harnessed to the goal of combining monetary return with long run sustainability. The first section

offers an introduction to the role of finance in achieving sustainability, and includes an overview of the six areas—sustainable investing, impact investing, decentralized finance, conservation finance, and cleantech finance. The methods section of the book illustrates analytical tools and specialized data sources essential to those interested in increasing the level of social responsibility embedded in economic activity. The applications section describes and differentiates each of the six areas and their roles in advancing specific measures of sustainability.

In a global competitive economic environment, resources that are scarce or irreplicable are a source of sustained competitive advantage for companies and organizations. Knowledge-based resources are a major and increasing driver of long term competitive advantage. Most accounting standards however do not allow for knowledge-based resource calculations, including the most important of these, intellectual capital. Intellectual capital is the collective knowledge,

Where To Download Finance Accounting For Non Financial Managers Executive Mba Series

documented and otherwise, of individuals in an organization. In the absence of accounting standards to numerically evaluate intellectual capital, some institutions have devised their own reports and statements. But why should companies, universities, and research centers measure these resources? How are intellectual capital statements built? How does one set targets, and what indicators should they include? This book reviews the development of the field of intellectual capital reporting, including core concepts, latest developments, the main components of intellectual capital, how a statement is built, and key indicators of each component. It further analyzes experiences from a variety of pioneering companies and institutions around the globe in measuring intellectual capital, including case studies from educational and research institutions, and provides crucial transnational comparisons. Authors Ordóñez de Pablos and Edvinsson examine the challenges and next steps for the harmonization of intellectual capital reports, consider the creation of a special international agency for intellectual capital reporting standards, and evaluate the weaknesses of current standards and how they might be overcome.
