If your personal financial knowledge is limited, you're probably not at fault. Personal Finance 101 isn't offered in our schools - not in high school and not even in the best colleges and graduate programs. It should be. (Of course, if it were, I wouldn't be able to write fun and useful books such as this - or maybe they'd use this book in the course!) People keep making the same common financial mistakes over and over - procrastinating and lack of planning, wasteful spending, falling prey to financial salespeople and pitches, failing to do sufficient research before making important financial decisions, and so on. This book can keep you from falling into the same traps and get you going on the best paths. As unfair as it may seem, numerous pitfalls await you when you seek help for your financial problems. The world is filled with biased and bad financial advice. As a practicing financial counselor and now as a writer, I constantly see and hear about the consequences of poor advice. Of course, every profession has bad apples, but too many of the people calling

Because money is not an end in itself but a part of your whole life, this book helps connect your financial goals and challenges to the rest of your life. You need a broad understanding of personal finance to include all areas of your financial life: spending, taxes, saving and investing, insurance, and planning for major goals like education, buying a home, and retirement.....You want to know the best places to go for your circumstances, so this book contains specific, tried-and-proven recommendations. Drawing on the latest scientific research, Jason Zweig shows what happens in your brain when you think about money and tells investors how to take practical, simple steps to avoid common mistakes and become more successful. What happens inside our brains when we think about money? Quite a lot, actually, and some of it isn't good for our financial health. In *Your Money and Your Brain*, Jason Zweig explains why smart people make stupid financial decisions—and what they can do to avoid these mistakes. Zweig, a veteran financial journalist, draws on the latest research in neuroeconomics, a fascinating new discipline that combines psychology, neuroscience, and economics to better understand financial decision making. He shows why we often misunderstand risk and why we tend to be overconfident about our investment decisions. *Your Money and Your Brain* offers some radical new insights into investing and shows investors how to take control of the battlefield between reason and emotion. *Your Money and Your Brain* is as entertaining as it is enlightening. In the course of his research, Zweig visited leading neuroscience laboratories and subjected himself to numerous experiments. He blends anecdotes from these experiences with stories about investing mistakes, including confessions of stupidity from some highly successful people. Then he draws lessons and offers original practical steps that investors can take

DeFi and Yield Farming have been the most popular buzzwords among the crypto community in recent months. Some DeFi tokens can skyrocket to more than 10K USD in just a few days but drop back to near zero also in a matter of days! Besides that, people in the crypto community are talking about yield farming instead of mining nowadays. Skeptics might argue that DeFi is merely hype, but the total value of digital assets locked in the DeFi platforms has reached an astounding \$45 billion, thus creating huge DeFi economics. Indeed, DeFi has become an important investment tool that investors cannot ignore. However, the complexity of the DeFi protocols and DeFi coins that exist today and new ones that are emerging every day at a mind-boggling speed has created a huge challenge not only for newcomers but also seasoned crypto traders.

Therefore, I have authored this Guidebook with the mission to help you understand DeFi and know how to maximize returns from various DeFi platforms. This book is written especially for beginners therefore I have minimized the jargons and included a lot of screenshots for easy learning. If you are an intermediate or advanced user, you may skip many of the steps and try out the DeFi platforms

straightaway. This Guidebook provides a basic guide on how to use all the major DeFi platforms comprising decentralized exchanges, loan, savings markets, DeFi applications and more. They include the likes of Uniswap, Sushiswap, Compound, dYdX, AAVE, YAM finance, Balancer, Bancor, MakerDAO and more. Besides that, this book also explains in detail the concepts of yield farming and how to use it to maximize returns in DeFi. On top of that, the book also runs through the concepts of blockchain and cryptocurrencies particularly on Bitcoin and Ethereum to help you understand decentralized money better.

afford! Set up an automatic payment option and you will be surprised! Most credit cards charge around 14% per year. A site I came across today, showed an APR of retroactive 18.9%. That rate could be the amount you paid on your last loan! Most people think interest on credit cards is charged daily. This is true. These cards are not strange to have as cash in your purse or wallet. Here is an example of debt combined with interest compounds: No Credit Card Credit card Annual / Monthly interest 3.5% + ongoing monthly interest 14.9% My figures, interest and minimum - comes to more than double. Next time you buy something think twice before you use your card. Over the next five years your debt could double in interest. You have to do something to get rid of it. Start with the smallest card especially if it has the highest interest rate. One option would be a pay-off orderable order. Write out a check for each card with the lowest balance to be paid off first. Then you pay off the next component of the bill with the highest interest rate. As each card is paid off, you direct the next card (donating whatever is in your regular budget) to pay off. You could go so far as to stop using any cards with the low balances that continue to accrue bad debt. Keep it simple and use a bad debt card! ? Interested to know more? ?
