Producers and users of management accounting information are confronted with crucial behavioral phenomena--factors that can affect the communication of this information and its use. Riahi-Belkaoui shows how producers and users together can improve the efficiency of management accounting itself. He explains the judgment process in management accounting, identifies and explains the major behavioral phenomena, and then provides ways to use them for the firm's benefit.

The overriding philosophy of this text is to provide the instructor with comprehensive coverage of ethical and professional issues encountered by accounting professionals. The book is devoted to helping students cultivate the ethical commitment needed to ensure that their work meets the highest standards of integrity, independence, and objectivity. *Ethical Obligations and Decision Making in Accounting* is designed to provide the instructor with the best flexibility and pedagogical effectiveness of any book on the market. To that end, it includes numerous features designed to make both learning and teaching easier.

The philosophy of Libby 1e is that “Teaching Accounting in the context of business” and that no matter what the student background or where their future lies, this book will give them the foundation they need to be a successful business owner or manager. *Principles of Accounting* is the first business course for nearly all of these students. Libby 1e is written by recognizing that students in the principles of accounting course have no previous exposure to accounting and financial statements and often little exposure to the business world but many of them have ambitions to own a business. Libby 1e

Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style,

pedagogy, and design. Libby/Libby/Short successfully implements a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting. Libby/Libby/Short believes in the building-block approach to teaching transaction analysis. Most faculty agree that mastery of the accounting cycle is critical to success in financial accounting. And yet all other financial books introduce and develop transaction analysis in one chapter, bombarding a student early in the course with an overload of new concepts and terms. The authors believe that most faculty take more time with the accounting cycle, but other financial accounting textbooks don't. By slowing down the introduction of transactions and giving students time to practice and gain mastery, this building-block approach leads to greater student success in their study of later topics in financial accounting such as adjusting entries.

This Global edition has been designed specifically to meet the needs of international financial accounting students. The text successfully implements a real-world, single focus company approach in every chapter. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting in the real world. In addition to the latest examples of both contemporary and traditional topics, new material has been added to make the content more

analysis and valuation, this work aims to answer the question, "What is this company really worth?". It takes the view that sound forecasts of financial statements are the key input to a good valuation, and that other aspects of the valuation process are mechanical.

The FASB Statements of Financial Accounting Concepts contains the full text of five of the six Statements of Financial Accounting Concepts issued to date. The existing concepts are intended to serve the public interest by setting the objectives, qualitative characteristics, and other concepts that guide selection of economic events to be recognized and measured for financial reporting. Unlike a Statement of Financial Accounting Standards, a Statement of Financial Accounting Concepts does not establish generally accepted Accounting Principles.
