Managerial Accounting Prentice Hall

Accounting for Managers explains how accounting information is used by non-financial managers. The book emphasises the interpretation, rather than the construction, of accounting information and encourages a critical, rather than unthinking acceptance, of the underlying assumptions behind accounting. It links theory with practical examples and case studies drawn from real life business situations in service, retail and manufacturing industries.

This text provides a contemporary introduction to accounting and accounting systems. It covers the essence of both financial and managerial accounting in a non-procedural, non-debit and credit manner. After a brief introduction to financial statement preparation, the remainder of the text focuses on controls and the use of accounting information in decision making.
