A leader's provocative look at 20th century financial markets Henry Kaufman, former vice Chairman of Salomon Brothers, was a key Wall Street figure in the 70s and 80s. His projections about interest rates, bond performance, unemployment, and government debt impacted monetary policy in more than one presidential administration, and prompted swings in the markets. You'll find On Money and Markets—Dr. Kaufman's look back at the financial and economic arenas he helped shape for half a century—both fascinating and valuable. His memoir gives you insight into such questions as why the Federal Reserve has gained so much power, and what it means for investors...and what patterns we can see in the credit crunches and other financial crises that have rocked Wall Street and world markets. The dozen or so questions he explores are of serious concern to today's investors. And few other experts have Dr. Kaufman's perspective and experience to answer them.

Financial markets across the Arabian Peninsula have gone from being small, quasi-medieval structures in the 1960s to large world-class groupings of financial institutions. This evolution has been fueled by vast increases in income from oil and natural gas. The Financial Markets of the Arab Gulf presents and analyzes the banks, stock markets, investment companies, money changers and sovereign wealth funds that have grown from this oil wealth and how this income has acted as a buffer between Gulf society at large and the newfound cash reserves of Gulf Cooperation Council states (Saudi Arabia, the United Arab Emirates, Qatar, Kuwait, Oman and Bahrain) over the last fifty years. By assessing the development of institutions like the Abu Dhabi Investment Authority, the Saudi Arabian Monetary Authority, the Public Investment Fund and the National Bank of Kuwait, The Financial Markets of the Arab Gulf evaluates the growth of the markets and provides a detailed, critical, snapshot of the current form and function of the Gulf's financial markets. It argues that the markets have been controlled by various state institutions for socio-political reasons. In particular, the Saudi state has used its sophisticated regulatory regime to push for industrialization and diversification, which culminated in the Vision 2030 plan. The UAE, Qatar, Kuwait, Bahrain and Oman have also been strongly involved in establishing modern markets for similar purposes but have done so through different means, with varying results, and each in line with what has been considered their respective comparative advantages. Along with critically surveying these institutions and their role in global finance, the book also presents case studies depicting transactions typical to the region, including the highly profitable documentary credits of commercial banks, the financial scandal of certain financiers and their
