Perhaps no issue is more important to the sustained success of a mental health practice than understanding the financial aspects of running a business. Yet this topic receives such little attention in most professional training programs. Without full awareness of where revenues are coming from, and where they are allocated in the practice, how can small business owners know how they are doing financially? Could you be doing better? Where should you invest more resources? Where could you cut expenses? How can you review financial statements to plan for sustained growth in your practice? One need not be a CPA to develop and maintain a successful practice, but understanding basic accounting concepts is one of the necessary ingredients. In this book Dr. Zimmerman combines his years of experience running a large mental health practice and consulting to mental health practices, with Ms. Libby's years of experience working as a CPA for mental health practices, to develop a helpful and important primer that is

essential reading for anyone wanting a financially successful practice.

on Decision Making. Instead of the use of traditional subtitles in each chapter (e.g., alternative forms of housing,, performing home affordability analysis), the text uses questions as the lead-in for each topic (e.g., should I rent or buy?, how do I bid on the property?) * An entire chapter is devoted to the critical topic of time value of money (TVM) and it is integrated into later chapters where appropriate. The solutions to many problems (i.e. How much Life Insurance Should You Have?) are presented through calculators that incorporate time value of money into the computations. Thus, students who have a general concept of what time value of money means but have difficulty doing TVM problems are still able to get through the material deal effectively with the impact of TVM. * Text is brief and applied. Instead of long narratives discussing terms and definitions, the text focuses on decisions that the student will be making during his or her lifetime, beginning with graduation and the selection of the first job. Each chapter has a theme of a person or couple needing to make decisions in that topic area. Key material is emphasized by its inclusion in the sample problems and the solutions to the sample problems.

Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."
