Weaving Freeform Wire Jewelry is a guide to understanding and using wire weaves to create 20 beautiful freeform jewelry projects. With a tight focus on five wire weaves—over-under, over-over, coiling, looping, and circular weaving — the reader will learn by making rings, pins, earrings, pendants, clasps, and bracelets. Author Kaska Firor offers a wonderful variety of symmetrical and asymmetrical designs to inspire the budding wireworker, in addition to showing the evolution of wirework design from simple to complex for more advanced jewelry-makers.

Pick the perfect pattern every time Sought after for nearly a century, "A Handweaver's Pattern Book" is the venerable compendium of weaving patterns found in early 20th century America by Marguerite Davison. Weavers of all experience levels can learn everything from basic twills to over-shot and irregular patterns. Often hailed "the handweaver's bible," this collection of patterns is complemented with fascinating textile history and helpful black-and-white photos. Numerous treadlings, illustrated with over 1,200 weavings, accompany each design that inspire innovation for expert weavers as well as provide helpful information for weavers who have yet reached that level.

Davison also includes a yarn comparison chart in this comprehensive and highly visual guide. Perfect for both commercial and home weavers, this extensive handbook of strikingly diverse patterns will keep any four-harness weaver busy for years to come. The definitive reference for jewelry makers of all levels of ability--a complete, profusely illustrated guide to design, materials, and techniques, as well as a fascinating exploration of jewelry-making throughout history.

This wonderful new book from Jewelry Artist and Author Jim McIntosh takes you from the basics of wire art to some very advanced concepts of design. The book has over 390 images that illustrate all of the steps in producing fine wire jewelry. The book is broken down into 3 sections that span 289 pages.

The manufacture and decorative use of wire in Southern Africa traditional arts dates back to the first millennium AD. With advancements in telecommunications, a new type of wire -- multi-colored plastic-coated copper wire, often referred to as telephone wire -- came into being. Beginning in the late 1960's, Zulu night watchmen started weaving scraps of this wire around their traditional sticks. This new material was also applied to making izimbenge -- beer pot covers -- that had been traditionally made from grass and palm. Today, there is wide variety in the creative use of this wire, and, in post-Apartheid South Africa, Zulu craft artists are imbuing old forms with the colourful contemporary material of telecommunications. The result is a vibrant, distinctive new folk form gaining international attention. This is the first and only publication to document the development of this transitional art. Including more than two-hundred examples of baskets, this book traces telephone-wire weaving from its roots to its most current forms, featuring the works of the most renowned contemporary weavers. The accompanying text -- from some of the foremost experts in African art and craft -- traces the history of telephone-wire weaving as well as discussing its significance to South African culture and art history. Today telephone wire baskets are at the heart of growing markets for South African products and sustainable cultural industry in Zululand.
