This book celebrates Michael Stonebraker's accomplishments that led to his 2014 ACM A.M. Turing Award "for fundamental contributions to the concepts and practices underlying modern database systems." The book describes, for the broad computing community, the unique nature, significance, and impact of Mike's achievements in advancing modern database systems over more than forty years. Today, data is considered the world's most valuable resource, whether it is in the tens of millions of databases used to manage the world's businesses and governments, in the billions of databases in our smartphones and watches, or residing elsewhere, as yet unmanaged, awaiting the elusive next generation of database systems. Every one of the millions or billions of databases includes features that are celebrated by the 2014 Turing Award and are described in this book. Why should I care about databases? What is a database? What is data management? What is a database management system (DBMS)? These are just some of the questions that this book answers, in describing the development of data management through the achievements of Mike Stonebraker and his over 200 collaborators. In reading the stories in this book, you will discover core data management concepts that were developed over the two greatest eras (so far) of data management technology. The book is a collection of 36 stories written by Mike and 38 of his collaborators: 23 world-leading database researchers, 11 world-class systems engineers, and 4 business partners. If you are an aspiring researcher, engineer, or entrepreneur you might read these stories to find these turning points as practice to tilt at your own computer-science windmills, to spur yourself to your next step of innovation and achievement.

This memoir is a fascinating portrait of mother and child who miraculously survive two concentration camps, then, after the war, battle demons of the past, societal rejection, disbelief, and invalidation as they struggle to reenter the world of the living. It is the tale of how one newly takes on the world, having lived in the midst of corpses strewn about in the scores of thousands, and how one can possibly resume life in the aftermath of such experiences. It is the story of the child who decides, upon growing up, that the only career that makes sense for him in light of these years of horror is to become someone sensitive to the deepest flaws of humanity, a teacher of God's role in history amidst the traditions that attempt to understand it—and to become a rabbi. Readers will not emerge unscathed from this searing work, written by a distinguished, Boston-based rabbi and academic.

Includes music.

This open access book discusses the eroding economics of nuclear power for electricity generation as well as technical, legal, and political acceptance issues. The use of nuclear power for electricity generation is still a heavily disputed issue. Aside from technical risks, safety issues, and the unsolved problem of nuclear waste disposal, the economic performance is currently a major barrier. In recent years, the costs have skyrocketed especially in the European countries and North America. At the same time, the costs of alternatives such as photovoltaics and wind power have significantly decreased. Contents History and Current Status of the World Nuclear Industry The Dramatic Decrease of the Economics of Nuclear Power Nuclear Policy in the EU The Legacy of CsernobyI and Fukushima Nuclear Waste and Decommissioning of Nuclear Power Plants Alternatives: Heading Towards Sustainable Electricity Systems Target Groups Researchers and students in the fields of political, economic and technical sciences Energy (policy) experts, nuclear energy experts and practitioners, economists, engineers, consultants, civil society organizations The Editors Prof. Dr. Reinhard Haas is University Professor of energy economics at the Institute of Energy Systems and Electric Drives at Technische Universität Wien, Austria. 'Living on Hope Street is a big-hearted, compassionate work. Divaroren is a ferociously good storyteller and every character breathes life, every character convinces. This book is an absolute joy to read.' CHRISTOS TSIOLKAS" We all love someone. We all fear something. Sometimes they live right next door - or even closer. Kane will do everything he can to save his mother and his little brother Sam from the violence of his father, even if it means becoming a monster himself. Mrs Aslan will protect the boys no matter what - even though her own family is in pieces. Ada wants a family she can count on, while she faces new questions about herself. Mr Bailey is afraid of the refugees next door, but his worst fear will take another form. And Gugulethu is just trying to make a life away from terror. On this street, everyone comes from different places, but to find peace they will have to discover what unites them. A deeply moving, unflinching portrait of modern Australian suburban life.

Illustrated with 10 images. This book will be a descriptive grammar of the Esperanto language invented by L. L. Zamenhof, which will be complete and comprehensive in regards to a) the grammar of Esperanto as first outlined by Zamenhof in Fundamento de Esperanto and other foundational documents, and b) Esperanto as it is spoken today by the most committed Esperantists.

(Proposed reforms to the Esperanto language will be discussed if they have serious support from a significant fraction of Esperanto enthusiasts). This book was started practically on a dare from the August 2006 issue of Bob's Poetry Magazine, in which Robert Happelberg boasted that he could print a complete and comprehensive grammar of Esperanto in just one 6 by 7 inch page. While this is obviously wrong, it's not too far off the mark. When completed, this book will require several standard size (8.5 by 11 in the USA) pages, but will still be much shorter than a complete grammar of a natural language like English or Slovene. In view of this goal, the number of examples provided for each concept will be kept to a bare minimum. Those wishing to build their Esperanto vocabularies are also referred to the Esperanto textbooks. It is acceptable in the beginning to word the text in an accessible manner like in a textbook, but the goal should be for all the text to be technical with a full command of linguistic jargon. A volume of all-new, character-driven stories expanding on the world of the hit video game Final Fantasy XV. This deluxe, hardcover edition includes full-color inserts featuring concept art and exclusive content. To oppose the gods or yield to fate? That is the question confronting each of the characters in The Dawn of the Future. Ardyn, having saved countless lives from the Starscourge, means to become the Founder King of Lucis and instead is cast into tragic exile. On the day the Empire falls, as the imperial capital collapses around them, Commodore Aranea is entrusted with the life of a singular young girl. The Oracle Lunafreya, upon awakening from the slumber of death, discovers that her body has undergone an extraordinary transformation. And after gazing upon the eternal, Noctis, the True King, finally comes to terms with his destiny. Herein lie the stories of the dawning of a new world in Final Fantasy XV.

Time and Free Will: An Essay on the Immediate Data of Consciousness is Henri Bergson's doctoral thesis, first published in 1889. The essay deals with the

problem of free will, which Bergson contends is merely a common confusion among philosophers caused by an illegitimate translation of the unextended into the extended, as a means of introducing his theory of duration, which would become highly influential among continental philosophers in the following century.

This book examines in detail many rhinologic issues that are not covered in other books, are still not completely understood, and can be difficult to deal with clinically. In each chapter, three authors – a young otorhinolaryngologist, a senior author, and an international expert – elaborate on a specific issue, such as the role of immunotherapy in treating nasal polyps, the management of rhinitis during pregnancy, how rhinitis can differ in adults and children, how to choose between open or endonasal rhinoplasty, the ideal form of anesthesia for nasal surgery, etc. The volume will appeal to a wide readership, from otorhinolaryngologists to allergists and facial plastic surgeons, as well as trainees and students in related fields.

On March 3, 1983, Peter Ivers was found bludgeoned to death in his loft in downtown Los Angeles, ending a short-lived but essential pop cultural moment that has been all but lost to history. For the two years leading up to his murder, Ivers had hosted the underground but increasingly popular LA-based music and sketch-comedy cable show *New Wave Theatre*. The late '70s through early '80s was an explosive time for pop culture: *Saturday Night Live* and *National Lampoon* were leading a comedy renaissance, while punk rock and new wave were turning the music world on its head. *New Wave Theatre* brought together for the first time comedians-turned-Hollywood players like John Belushi, Chevy Chase, and Harold Ramis with West Coast punk rockers Black Flag, the Dead Kennedys, Fear, and others, thus transforming music and comedy forever. The show was a jubilant, chaotic punk-experimental-comedy cabaret, and Ivers was its charismatic leader and muse. He was, in fact, the only person with the vision, the generosity of spirit, and the myriad of talented friends to bring together these two very different but equally influential worlds, and with his death the improbable and electric union of punk and comedy came to an end. The magnetic, impishly brilliant Ivers was a respected musician and composer (in addition to several albums, he wrote the music for the centerpiece song of David Lynch's cult classic *Eraserhead*) whose sublime and bizarre creativity was evident in everything he did. He was surrounded by people who loved him, many of them luminaries: his best friend from his Harvard days was Doug Kenney, founder of *National Lampoon*; he was also close to Harold Ramis and John Belushi. Upon his death, Ivers was just beginning to get mainstream recognition. *In Heaven Everything Is Fine* is the first book to explore both the fertile, gritty scene that began and ended with *New Wave Theatre* and the life and death of its guiding spirit. Josh Frank, author of *Fool the World: The Oral History of a Band Called Pixies*, interviewed

hundreds of people from Ivers's circle, including Jello Biafra, Stockard Channing, and David Lynch, and we hear in their own words about Ivers and the marvelous world he inhabited. He also spoke with the Los Angeles Police Department about Ivers's still-unsolved murder, and, as a result of his research, the Cold Case Unit has reopened the investigation. In Heaven Everything Is Fine is a riveting account of a gifted artist, his tragic death, and a little-known yet crucial chapter in American pop history.

This textbook provides an account of intellectual property law. The underlying policies influencing the direction of the law are explained and explored and contemporary issues facing the discipline are tackled head-on. The international and European dimensions are covered together with the domestic position.

The global economic crisis has exposed the limits of neoliberalism and intensified social polarization. Amid increasing social resistance and opposition, however, neoliberalism prevails globally. Within political economic debates, however, radical alternatives are rarely debated or are reduced to new Keynesian and new developmental agendas, which fail to address existing class divisions and imperialist relations of domination. This unique collection of essays polarizes the debate between radical and reformist alternatives by exploring head-on the antagonistic structure of capitalist development in Latin America, Southern Asia, Europe, the US and the Middle East. The contributors ground the question of alternatives in an international, non-Eurocentric and avowedly Marxian analysis of the capitalist system and its crises. The collection's approach is also distinctive in arguing that social and labour movements are core determinants of development outcomes and progressive change. This new generation of scholars has written accessible yet theoretically informed and empirically rich chapters elaborating radically different worldwide strategies for moving beyond neoliberalism, and beyond capitalism. The intent is to provoke critical reflection and positive action towards substantive change.

"The following pages were written by request. They claim to give an accurate and impartial narrative of my four years' life while a cadet at West Point, as well as a general idea of the institution there. They are almost an exact transcription of notes taken at various times during those four years."

This book covers both the fundamental and applied aspects of advanced Na-ion batteries (NIB) which have proven to be a potential challenger to Li-ion batteries. Both the chemistry and design of positive and negative electrode materials are examined. In NIB, the electrolyte is also a crucial part of the batteries and the recent research, showing a possible alternative to classical electrolytes – with the development of ionic liquid-based electrolytes – is also explored. Cycling performance in NIB is also strongly associated with the quality of the electrode-electrolyte interface, where electrolyte degradation takes place; thus, Na-ion Batteries details the recent achievements in furthering knowledge of this interface. Finally, as the ultimate goal is commercialization of this new electrical storage technology, the last chapters are dedicated to the

industrial point of view, given by two startup companies, who developed two different NIB chemistries for complementary applications and markets.

Orphaned by a cholera epidemic, Neb and his young brother are sent to the desolate farm of their last living relative. But when the savage Horsekin tribes begin raiding the villages along Deverry's western border, the brothers must flee for their lives. A chance encounter with Salamander—a bard and master of dweomer magic—proves their salvation, as he brings them to the shelter of Tieryn Cadryc's dun. Here Neb finds love with his soulmate Branna only to be dragged into a war for the very survival of the kingdom. And though both Neb and Branna are gifted with dweomer magic, they are also facing powerful enemies they have fought before in past lives they no longer remember.

For the devoted followers of the dazzling Deverry and Westlands cycle, Katharine Kerr continues the magical epic saga she began in *The Red Wyvern*. In her latest tale, the scene shifts seamlessly between the shattered land of the Rhiddaer and the historic end of the Civil Wars, when Lilli, newly apprenticed to dweomer, fought with her untried powers to save her beloved Prince Maryn from evil. Centuries later, in the city of Cerr Cawnen, the old evil awakens yet again when the sorceress Raena schemes to destroy Rhodry Maelwaedd, her bitter enemy during life after life. But her malice will draw the intervention of astral powers—and unleash the ravaging rage of Rhodry's guardian dragon. Only another untried dweomer can buy safety for the city and the berserker himself—and only at a most fearsome price....

Art criticism is spurned by universities, but widely produced and read. It is seldom theorized and its history has hardly been investigated. *The State of Art Criticism* presents an international conversation among art historians and critics that considers the relation between criticism and art history and poses the question of whether criticism may become a university subject. Contributors include Dave Hickey, James Panero, Stephen Melville, Lynne Cook, Michael Newman, Whitney Davis, Irit Rogoff, Guy Brett and Boris Groys.

This volume presents a wide range of contributions that analyse the cultural, sociological and communicative significance of tears and crying in Graeco-Roman antiquity. The papers cover the time from the eighth century BCE until late antiquity and take into account a broad variety of literary genres such as epic, tragedy, historiography, elegy, philosophical texts, epigram and the novel. The collection also contains two papers from modern socio-psychology.

Michael's older brother dies at the beginning of the summer he turns 15, but as its title suggests *The Incredible Here and Now* is a tale of wonder, not of tragedy. Presented as a series of vignettes, in the tradition of Sandra Cisneros' Young Adult classic *The House on Mango Street*, it tells of Michael's coming of age in a year which brings him grief and romance; and of the place he lives in Western Sydney where 'those who don't know any better drive through the neighbourhood and lock their car doors', and those who do, flourish in its mix of cultures. Through his perceptions, the reader becomes familiar with Michael's community and its surroundings, the unsettled life of his family, the girl he meets at the local pool, the friends that gather in the McDonalds parking lot at night, the white Pontiac Trans Am that lights up his life like a magical talisman.

Features stories about Laura's father and life on the frontier.

Stephen Crane's immortal masterpiece about the nightmare of war was first published in 1895 and brought its young author immediate international fame. Set during the Civil War, it tells of the brutal disillusionment of a young recruit who had dreamed of the thrill and glory of war, only to find himself fleeing the horror of a battlefield. Shame over his cowardice drives him to seek to redeem himself by being wounded—earning what he calls the "red badge of courage."

Praised for its psychological insight and its intense and unprecedented realism in portraying the experience of men under fire, *The Red Badge of Courage* has been a beloved bestseller for

more than a century.

A tale of acceptance from the bestselling author of *The Boy in the Striped Pajamas*. Barnaby Brocket is an ordinary eight-year-old boy in most ways, but he was born different in one important way: he floats. Unlike everyone else, Barnaby does not obey the law of gravity. His parents, who have a fear of being noticed, want desperately for Barnaby to be normal, but he can't help who he is. And when the unthinkable happens, Barnaby finds himself on a journey that takes him all over the world. Drifting from Brazil to New York, from Canada to Ireland, and even to space, the floating boy meets all sorts of different people--and discovers who he really is along the way. This whimsical novel will delight middle-graders, while readers of all ages will find themselves questioning what it means to be "normal."

In reviewing introductory texts available to criminologists, one is left with the impression that biological factors are irrelevant to the formulation of criminal behavior. Where biology is mentioned at all, it receives infinitesimal coverage. This dearth of attention could at one time be blamed on shoddy research and the legitimate fear that evide
