

First Aid Aide Memoire

This second edition of Questions and Answers for Dental Nurses reflects the major changes that have taken place in dental nursing over recent years. A valuable self-assessment guide for dental nurses, this edition covers the topics featured on the NEBDN examination, together with the National Vocational Qualification (S/NVQ) in Oral Healthcare, up to Level 3. With mandatory registration in mind, coverage on subjects relevant to Access to Registration Training (ART) is extended. More than just questions and answers, the book often provides guidance on the orientation of examinations, the questions involved and helpful explanatory information on responses. An invaluable resource for trainee dental nurses seeking qualification, as well as returning or refocusing certified dental nurses.

This is much more than just a 'first-aid' book. It details many common diseases and problems that a horse is likely to encounter, with suggested homeopathic treatments, gleaned from Christopher Day's 43 years of experience in equine homeopathy and holistic medicine. There are no fewer than 75 homeopathic medicines described. Almost 300 pages of practical help and guidance.

This title sets out the issues and requirements for mobile learning research and presents recent efforts to specify appropriate theoretical frameworks, research methods and tools. Leading researchers in the field present their experiences and approaches to key aspects of mobile learning research such as data capture and analysis.

Peace Journalism explains how most coverage of conflict unwittingly fuels further violence, and proposes workable options to give peace a chance.

Essentials of Sea Survival contains original scientific research and investigations from two internationally recognized experts on cold-water survival. In addition to having practical personal experience with cold water immersion, Frank Golden and Michael Tipton regularly lecture at various international conferences about water survival, and they are frequently called on for expert commentary on television and radio. The majority of books on this subject are personal survival accounts; few relate to scientific studies. This book is different: Using reader-friendly language, two leading environmental physiologists present the facts and dispel the myths of surviving a sea accident. The book, thanks to the real-life stories and easy-to-read format, will appeal primarily to the layperson who works or plays on or near the water. The text will also be of interest to an academic audience, who will appreciate the original research and up-to-date physiological and medical information. Essentials of Sea Survival is a compelling, informative, and comprehensive guide to open-water survival. Drawing from classic maritime disasters and personal accounts of near-miraculous survival, as well as carefully controlled laboratory experiments, it offers practical advice for avoiding as well as surviving a cold-water accident. It's an important reference for anyone associated with open-air aquatic activities, such as members of the Coast Guard, Navy, and Marines; offshore oil rig employees; fishermen; divers; amateur and professional sailors; water safety instructors and life guards; water rescue personnel; boaters; water skiers; outdoor survival course instructors; and other recreational water sports enthusiasts.

There is controversy as to whether psychological interventions in the aftermath of disaster are helpful or not. This book addresses these controversies and describes the responses that psychologists have made in different parts of the world to disaster.

NOTE: NO FURTHER DISCOUNT FOR THIS PRODUCT-- OVERSTOCK SALE -- Significantly reduced list price "Loss of Signal", a NASA publication (to be available in May 2014) presents the aeromedical lessons learned from the Columbia accident that will enhance crew safety and survival on human space flight missions. These lessons were presented to limited audiences at three separate Aerospace Medical Association (AsMA) conferences: in 2004 in Anchorage, Alaska, on the causes of the accident; in 2005 in Kansas City, Missouri, on the response, recovery, and identification aspects of the investigation; and in 2011, again in Anchorage, Alaska, on future implications for human space flight. As we embark on the development of new spacefaring vehicles through both government and commercial efforts, the NASA Johnson Space Center Human Health and Performance Directorate is continuing to make this information available to a wider audience engaged in the design and development of future space vehicles." "Loss of Signal" summarizes and consolidates the aeromedical impacts of the Columbia mishap process—the response, recovery, identification, investigative studies, medical and legal forensic analysis, and future preparation that are needed to respond to spacecraft mishaps. The goal of this book is to provide an account of the aeromedical aspects of the Columbia accident and the investigation that followed, and to encourage aerospace medical specialists to continue to capture information, learn from it, and improve procedures and spacecraft designs for the safety of future crews. This poster presents an outline of "Loss of Signal" contents and highlights from each of five sections - the mission and mishap, the response, the investigation, the analysis and the future. The physical and mental health of an employee influences attendance and quality of work. Indifferent health, lack of a sense of well-being, affects both the individual and the efficiency of the organisation. This book is intended to give general and specific guidance to the non-medical person involved with the health of people working in offices and similar surroundings, on the common cause of ill-health of staff and factors at work which influence health.

This quarterly journal explores the themes of recovery and healing through poetry, memoir, essays, fiction, humor, media reviews, and psycho-education. Areas of concern

include aging, disabilities, health, abuse recovery, trauma/PTSD, anxiety, and depression.

Comprehensive insight into the offshore oil and gas industry for those intending to choose it as a career Full syllabus coverage for OPITO BOSIET, FOET, MIST and IMIST courses Produced in full colour with over 180 images Basic Offshore Safety covers everything that newcomers to the offshore oil and gas industry need to know prior to travelling offshore or when attending OPITO's Basic Offshore Safety Induction and Emergency Training (BOSIET), Minimum Industry Safety Training (MIST), Further Offshore Emergency Training (FOET) and International MIST courses. Primarily focused on the oil industry, this book introduces readers to the key safety topics in the offshore support vessel industry and common to the renewable industry. Written in easy to follow steps and including references to both the legislation and guidance where relevant, Abdul Khalique walks the reader through the hazards they are likely to encounter when travelling to, from or working offshore, showing how to minimise risks and deal with any issues that may arise at any stage of the work.

A guide for parents, outdoor educators, play rangers, forest school leaders and teachers, 'I Love My World' is full of practical ideas which can be used to rekindle the naturally playful spirit and develop a deep connection with nature from an early age.

Saint Kitts and Nevis

Vols. for 1898-1968 include a directory of publishers.

A Pocket Aide Memoire First Aid to the Injured. A Pocket Aide-memoire Compiled for the Instruction of the Troops in Zululand, by the Late...shortly Before His Death at Isandula, January 22, 1879 Journal of the Royal Army Medical Corps Aids for First Help to the Injured Iron & Coal Trades Review

Created in collaboration with the Medical Commission of the International Olympic Committee, this new manual distills the latest advances in sports medicine into clinically relevant, practical guidance on treating sports injuries. Ideal for primary care physicians, ER physicians, physical therapists, athletic trainers, nurse practitioners, and physician assistants, the book embraces a problem-oriented approach to guide the reader through assessment and management of the most common injuries and disorders. Over 500 full-color illustrations augment the text, showing readers detailed views of the techniques, procedures and other clinically-relevant information being described.

"'The art of command is...to be the complete master, and yet the complete friend of every man on board; the temporal lord and yet the spiritual brother of every rating; to be detached and yet not dissociated.' A Seaman's Pocket-Book, 1943", has found huge appeal with the British public. Presented in the same format, the Officer's Handbook gathers together useful advice and instruction for those naval officers fighting the Second World War on all aspects of their job, expressed in the benevolent language of the day, when authority was respected. The Handbook has been compiled and edited by Brian Lavery, who provides commentary and an introduction. Sections include: the Officer's Aid Memoire containing notes of the training course at one of the officer training schools; Notes for medical officers and treatment of battle casualties afloat; Notes for captains on taking command of their first ship; Notes for commanding officers; Notes on the handling and safety of ships and notes on dealing with disobedience and mutiny. While suffused with nostalgia and charm, the various contents of this book are an authentic presentation of matters of training, authority and deportment in the wartime navy. The book is sure to appeal not only to those who served in the war or had a relative who was in the officer class, but also to anyone who wants to gain a greater understanding of the day-to-day administration of the wartime navy.

Fully revised and updated for the second edition, with a new section on the older patient and expanded advice on physiotherapy and rehabilitation programmes, the Oxford Handbook of Sport and Exercise Medicine is an indispensable companion for any professional working in sport and exercise medicine. Sport medicine is an evolving discipline. This handbook brings together the common problems and diagnoses with a focused summary of the latest strategies, management plans, and evidence-based protocols. Authored by leading figures in sport and exercise medicine, this handbook is specially designed to cover the curriculum for postgraduate sport and exercise medicine exams. It presents the core knowledge in a concentrated and concise format. Arranged by system, it focuses on the needs of the patient and offers an immediate guide to all aspects of diagnosis and treatment, exercise benefits, and epidemiology. Practical, accessible, and clinically based, this is the single global handbook for the undergraduate, postgraduate or experienced specialist.

"Mr. Doherty has produced an invaluable reference volume for everyone involved in disaster response/disaster preparedness field. It represents the ultimate A-to-Z 'How to Do It' manual in this difficult, complicated field.--John G. Jones, Ph.D.

NEW! Goats are wonderful creatures; enigmatic, paradoxical, mischievous, inquisitive and fun. They appear robust in health but can quickly become dangerously ill and lose the will to live if not treated promptly and correctly. This eBook provides homeopathic treatment information for most conditions likely to be met, whether on a farm, a smallholding or a single-goat household.

This colourful aide-memoire covers most emergencies afloat: Drowning Unconsciousness External bleeding Immersion Hypothermia Seasickness Head injury Chest pain Fits Fractures Burns & scalds Heatstroke Communications in an emergency

Doherty provides information about training for mental health professionals and first responders who work with victims of disaster related stress and trauma. He provides a brief overview of disasters and responders roles, including discussion about war, terrorism, and follow-up responses by mental health professionals.

Vol. 115 includes Diamond jubilee issue, 1867-1927.

The story of Isandlwana, the battle that shocked the British empire at its zenith, and Rorke's Drift, which immediately followed it and went some way to restoring wounded British pride: how they were fought, how they have been remembered, and what they mean for us today.

19 pages of contents in middle of book between end of L and beginning of M

Sports injuries and sports medicine are both very important topics of discuss in the field of sports and physical education. These two topics are well explained briefly with important facts and essentials. Sports injury requires substantially more than 'treatment' of an injured area. Patients need advice on a number of other aspects, including maintenance of overall fitness during recovery, and require a suitable prognosis. If physical treatment is desirable it is necessary to have some knowledge of therapeutic modalities, and preferably a sound professional working relationship with the therapist of choice. The book covers: Sports Medicine, Physiotherapy, Hydrotherapy and Therapeutic Exercise.

NEW! An eBook providing extensive information about the treatment of donkeys for common ailments, accidents and emergencies. Donkeys are all-too-often treated as small horses or ponies or as 'weak sisters' to horses. They are not. The donkey is a species of its own and deserves special consideration appropriate to its needs.

""31000+ English - Bengali Bengali - English Vocabulary" - is a list of more than 31000 words translated from English to Bengali, as well as translated from Bengali to English. Easy to use - great for tourists and English speakers interested in learning Bengali. As well as Bengali speakers interested in learning English.

Presented work is a textbook and exercise book of medical English in the branch of stomatology and at the same time a reading book of professional texts taken from the newest original sources. The material can be used by dentists and dental hygienists who encounter English-speaking clients in their surgeries. Professionals and students who are going to work or study in English-speaking countries as well as teachers of medical English at high schools and universities will find this book a useful aid for theoretical subjects and a valuable manual for everyday practice. All exercises contain correct answers, and the keys can also be used by students whose native language is English. The topics covered are preventive and community dental practice; history taking and examination; dental radiology; psychological aspects of dental care; paediatric dentistry; general medicine of relevance to dentistry; emergencies in dental practice; analgesia, sedation, and general anaesthesia; oral medicine; oral and maxillofacial surgery; periodontology; restorative dentistry; operative dentistry; minor oral surgery; orthodontics; removable prosthodontics; dental materials and conservation instruments. The author wishes a lot of success to all motivated and hard-working students.

The health and physical education learning area is about taking action to enhance well-being. It encompasses three different but related subjects - health education, physical education, and home economics - with a shared conceptual framework and achievement objectives. Physical education is the process that uses physical activity as a means to help people acquire skills, health, fitness, knowledge and attitudes that contribute to their optimal development and well-being. It plays an important role in the development of an individual just as a school room education does. In order to have a quality Physical education at all levels it is essential to have a qualitative scientific literature/information on various aspects of physical education. The present book is a step in this direction which has been designed as both a text and a resource in physical education. As a text it will prepare undergraduates in Physical education courses. As a resource it may serve variety of individuals such as teachers, coaches, volunteers and other professionals. In our society sport fulfils important functions and is indeed indispensable. It offers opportunities for physical activity in a world where physical activity is increasingly diminishing; it promotes good health and well-being; and it provides a means of social contact and ample opportunity for intensive experiences. Aim of this book is a careful selection of the important aspects of physical administration written by the authorities on the subject through the ages. Selection is mainly oriented to the requirement of the teachers and students of physical education.

NEW! Probably the most comprehensive guide to the homeopathic treatment of birds that is currently available, this eBook is a first-aid guide to the treatment of accidents, emergencies and common ailments in domestic fowl (poultry). All species respond well to homeopathy and birds are no exception. However, little has hitherto been written about their homeopathic treatment. Homeopathy sits well with organic enterprises, in which the residues of conventional drugs are discouraged where compatible with animal welfare. All species are covered, including chickens (cockerels and hens), geese, ducks, turkeys, guinea fowl, pheasants, partridge, quail, bantams, peafowl, budgerigars, canaries, birds of prey (raptors), doves, racing pigeons and carrier pigeons.

Homeopathy has a two-hundred year track record in helping people and animals to come through emergencies and common ailments. Christopher Day has condensed 43 years of veterinary practice experience into this ebook, to enable home treatment of the family pet, whether dog, cat, rabbit, budgerigar or tortoise, without danger of side effects and without risk of interfering with any concurrent veterinary drug medication. Fifty useful homeopathic medicines are briefly described and a treatment guide is given for scores of ailments and health problems. This is a handy ebook for anyone interested in self-help medication of their pets. Enhance pet health and well-being, while reducing veterinary bills. This ebook will save its price many times over, the first time it is used.
