This unique, socially conscience reference provides valuable guidance to international medical graduates (IMG's) looking to complete a residency in the United States. The medical residency application process in the United States is competitive and complex. Organized into three parts, this book meets the need for a pragmatic, evidence based guide that answers important questions, and imparts indispensable advice to IMGs. Part I directly tackles the concerns IMG's have regarding specific elements of residency applications, including the importance of a master's degree and how to get a strong letter of recommendation.
