Virgil Flowers will have to watch his back--and his mouth--as he investigates a college culture war turned deadly in another one of Sandford's "madly entertaining Virgil Flowers mysteries" (New York Times Book Review). At the local state university, two feuding departments have faced off on the battleground of science and medicine. Each carries their views to extremes that may seem absurd, but highly educated people of sound mind and good intentions can reasonably disagree, right? Then a renowned and confrontational scholar winds up dead, and Virgil Flowers is brought in to investigate . . . and as he probes the recent ideological unrest, he soon comes to realize he's dealing with people who, on this one particular issue, are functionally crazy. Among this group of wildly impassioned, diametrically opposed zealots lurks a killer, and it will be up to Virgil to sort the murderer from the mere maniacs.

This harrowing mystery, winner of the Philippine National Book Award, follows two Catholic priests on the hunt through Manila for a brutal serial killer Payatas, a 50-acre dump northeast of Manila's Quezon City, is home to thousands of people who live off of what they can scavenge there. It is one of the poorest

neighborhoods in a city whose law enforcement is already stretched thin, devoid of forensic resources and rife with corruption. So when the eviscerated bodies of preteen boys begin to appear in the dump heaps, there is no one to seek justice on their behalf. In the rainy summer of 1997, two Jesuit priests take the matter of protecting their flock into their own hands. Father Gus Saenz is a respected forensic anthropologist, one of the few in the Philippines, and has been tapped by the Director of the National Bureau of Investigations as a backup for police efforts. Together with his protégé, Father Jerome Lucero, a psychologist, Saenz dedicates himself to tracking down the monster preying on these impoverished boys. *Smaller and Smaller Circles*, widely regarded as the first Filipino crime novel, is a poetic masterpiece of literary noir, a sensitive depiction of a time and place, and a fascinating story about the Catholic Church and its place in its devotees' lives.

Told in alternating points of view between the living and the dead, Jessica Hamilton's debut novel will be perfect for fans of *The Lovely Bones*. Idyllic Avril Island, owned by the Bennett family, where their hundred-year-old cottage sat nestled in acres of forest. Forty-year-old June Bennett believed that the island had been sold after the summer of her father's disappearance when she was only twelve years old. It's months after the shocking death of her older sister May

in a fatal car accident, that June finds out that the cottage was never sold. Avril Island is still owned by the Bennett family and now it's hers. Still reeling from the grief of losing her sister, June travels back to Avril Island in search of answers. As she digs, she learns that the townspeople believe her father may in fact have been murdered rather than having abandoned his family in the dead of night, as she was led to believe by her mother. And that's when she begins to notice strange things happening on the island--missing family possessions showing up, doors locking on their own, unexplained noises in the night, shadowy figures disappearing into the woods. It takes June no time at all to realize that her childhood summers at Avril Island were not at all what they had seemed to be. In fact, their meet cute led to a friendship she never saw coming. Of course, she never saw his betrayal coming, either... Now Dax needs her help. As guardian to his thirteen-year-old sister, he's in way over his head. And though Kailyn hasn't forgiven Dax, she isn't heartless enough to make him fend for himself, either. Soon their friendly meetings turn into flirty dinner dates, and Kailyn can feel their chemistry is as explosive as ever. But how can she possibly let down her guard again to a guy who has heartbreak written all over him?

power, Flash 8: The Missing Manual is the ideal instructor. This hands-on guide to today's hottest web design tool is aimed at nondevelopers, and it teaches you how to translate your ideas into great web content. It begins with a solid primer on animation, which helps you get comfortable with the Flash interface. Once you have these basics under your belt, Flash 8: The Missing Manual moves on to advanced animations, including adding special effects and audio, video, and interactivity to your presentations. When you're really feeling steady, the book shows how to use a dollop of ActionScript to customize your content. It then teaches you how to publish your Flash creations for web surfers everywhere to enjoy. Along the way, the book shows you good design principles and helps you avoid elements that can distract or annoy an audience. Author Emily Vander Veer has more than a dozen books to her credit, including titles on web design and scripting--most written for non-technical readers. Her background makes her the perfect author for a straightforward book on a complex subject. She takes Flash 8: The Missing Manual from the basics to the advanced, yet avoids a hasty jump into tough topics that can leave readers confused. Not only will Flash 8: The Missing Manual help you turn a concept into unique, dynamic content, but it will continue to serve as a reference as you develop your website.

Mohammed bin Rashid Al Maktoum is published to mark the occasion of his fifty years in public service, which began with his appointment as Dubai's Minister of Defence in 1968. These stories tell of the vision behind Dubai's meteoric growth from a small and bustling trading port to an international metropolis at the heart of global business. They record the evolution of the United Arab Emirates from a shared ideal to a nation where more than 195 nationalities live and work in peace, harmony and prosperity. And they reveal insights from a man whose drive, determination and will to succeed have become legendary. Within these stories lies the heart of Sheikh Mohammed the statesman, the equestrian, the poet and the leader. They are written with the intent to inspire and inform new generations of readers, and to celebrate the achievements of this young and vibrant nation and the people who shaped it. This celebration of a life in service is unavoidably incomplete. As Sheikh Mohammed himself indicates, there is still so much left to do. As a record of the first fifty years alone, however, it forms part of a remarkable legacy. Other titles written by Sheikh Mohammed and published by Explorer include Zayed, Reflections on Happiness & Positivity, Flashes of Verse and Two Great Leaders.

again be the same person ...' Susannah Cahalan was a happy, clever, healthy twenty-four-year old. Then one day she woke up in hospital, with no memory of what had happened or how she had got there. Within weeks, she would be transformed into someone unrecognizable, descending into a state of acute psychosis, undergoing rages and convulsions, hallucinating that her father had murdered his wife; that she could control time with her mind. Everything she had taken for granted about her life, and who she was, was wiped out. *Brain on Fire* is Susannah's story of her terrifying descent into madness and the desperate hunt for a diagnosis, as, after dozens of tests and scans, baffled doctors concluded she should be confined in a psychiatric ward. It is also the story of how one brilliant man, Syria-born Dr Najar, finally proved - using a simple pen and paper - that Susannah's psychotic behaviour was caused by a rare autoimmune disease attacking her brain. His diagnosis of this little-known condition, thought to have been the real cause of devil-possession through history, saved her life, and possibly the lives of many others. Cahalan takes readers inside this newly-discovered disease through the progress of her own harrowing journey, piecing it together using memories, journals, hospital videos and records. Written with passionate honesty and intelligence, *Brain on Fire* is a searingly personal yet universal book, which asks what happens when your identity is suddenly

destroyed, and how you get it back. 'With eagle-eye precision and brutal honesty, Susannah Cahalan turns her journalistic gaze on herself as she bravely looks back on one of the most harrowing and unimaginable experiences one could ever face: the loss of mind, body and self. Brain on Fire is a mesmerizing story' -Mira Bartók, New York Times bestselling author of The Memory Palace Susannah Cahalan is a reporter on the New York Post, and the recipient of the 2010 Silurian Award of Excellence in Journalism for Feature Writing. Her writing has also appeared in the New York Times, and is frequently picked up by the Daily Mail, Gawker, Gothamist, AOL and Yahoo among other news aggregator sites.

"May Steven Saylor's Roman empire never fall. A modern master of historical fiction, Saylor convincingly transports us into the ancient world...enthralling!" —USA Today on Roma

Continuing the saga begun in his New York Times bestselling novel Roma, Steven Saylor charts the destinies of the aristocratic Pinarius family, from the reign of Augustus to height of Rome's empire. The Pinarii, generation after generation, are witness to greatest empire in the ancient world and of the emperors that ruled it—from the machinations of Tiberius and the madness of Caligula, to the decadence of Nero and the golden age of Trajan and Hadrian and more. Empire is filled with the dramatic, defining moments of the age, including the Great Fire, the persecution of the Christians, and the astounding opening games of the Colosseum. But at the novel's heart are the choices and temptations faced by each generation of the Pinarii. Steven Saylor once again brings the ancient world to vivid life in a novel that tells the story of a

The lives of your friends are bound to your own — can you do what it takes to free them and ensure the survival of your world? A dark shadow looms over Caldara as Iellieth Amastacia and her companions travel north. Hidden within the elegant marble halls of the Hadvarian Court, an ancient artifact waits to be discovered, but haunting spectres of the past guard the prize. Deep in the Shadowlands, Lucien plots to capture Iellieth and extinguish any resistance to Alessandra before the flame spreads. Across Azuria, foul forces await his bidding, ready to deliver the druid into his hands. Unfortunately for Lucien's pack of werewolves, Briseras Ravisthinia delights in making them her prey. With the help of an over-eager folklorist and a driven, if mysterious, witch, Briseras intends to destroy not only the werewolves, but also the more sinister creature who lurks just beyond her grasp. On the opposite side of the world, Genevieve Vendanges stalks after the man who bears her conclave's sacred dagger. Aboard the Amber Queen, she has a chance to uncover what he knows about the destruction of her conclave and all she held dear. But the passenger holds secrets for other crew members as well, namely the ship's captain, Teodric Adhemar. What guarded information from Teodric's past might emerge to interrupt his return to the powerful Admiral Syleste? Even further west, foreboding visions drive Persephonie Arelle to the ancient walls of Andel-ce Hevra. To protect her mother, she must confront hostile guards hunting practitioners of natural magic and subvert the dangerous machinations of Aylin, her mother's partner. But Persephonie does not fight alone. A mischievous fox and handsome captain of the guard stand ready to help her combat the clashing urban forces. Will it be enough? In book two of the Age of Azuria high fantasy series, Iellieth, Briseras, Teodric, Genevieve, and Persephonie must summon the strength to

There are many distinct pleasures associated with computer programming. Craftsmanship has its quiet rewards, the satisfaction that comes from building a useful object and making it work. Excitement arrives with the flash of insight that cracks a previously intractable problem. The spiritual quest for elegance can turn the hacker into an artist. There are pleasures in parsimony, in squeezing the last drop of performance out of clever algorithms and tight coding. The games, puzzles, and challenges of problems from international programming competitions are a great way to experience these pleasures while improving your algorithmic and coding skills. This book contains over 100 problems that have appeared in previous programming contests, along with discussions of the theory and ideas necessary to attack them. Instant online grading for all of these problems is available from two WWW robot judging sites. Combining this book with a judge gives an exciting new way to challenge and improve your programming skills. This book can be used for self-study, for teaching innovative courses in algorithms and programming, and in training for international competition. The problems in this book have been selected from over 1,000 programming problems at the Universidad de Valladolid online judge. The judge has ruled on well over one million submissions from 27,000 registered users around the world to date. We have taken only the best of the best, the most fun, exciting, and interesting problems available.

In this deeply etched and haunting memoir, Vivian Gornick tells the story of her lifelong battle with her mother for independence. There have been numerous books about mother and daughter, but none has dealt with this closest of filial relations as directly or as ruthlessly. Gornick's groundbreaking book confronts what Edna O'Brien has called "the principal crux of female despair": the unacknowledged Oedipal nature of the mother-daughter bond. Born and raised in the Bronx, the daughter of "urban peasants," Gornick grows up in a household dominated by her intelligent but uneducated mother's romantic depression over the early death of her husband. Next door lives Nettie, an attractive widow whose calculating sensuality appeals greatly to Vivian. These women with their opposing models of femininity continue, well into adulthood, to affect Gornick's struggle to find herself in love and in work. As Gornick walks with her aged mother through the streets of New York, arguing and remembering the past, each wins the reader's admiration: the caustic and clear-thinking daughter, for her courage and tenacity in really talking to her mother about the most basic issues of their lives, and the still powerful and intuitively-wise old woman, who again and again proves herself her daughter's mother. Unsparring, deeply courageous, *Fierce Attachments* is one of the most remarkable documents of family feeling that has been written, a classic that helped start the memoir boom and remains one of the most moving examples of the genre.

Since Descartes famously proclaimed, "I think, therefore I am," science has often overlooked emotions as the source of a person's true being. Even modern neuroscience has tended, until recently, to concentrate on the cognitive aspects of brain function, disregarding emotions. This attitude began to change with the publication of Descartes' Error in 1995. Antonio Damasio—"one of the world's leading neurologists" (The New York Times)—challenged traditional ideas about the connection between emotions and rationality. In this wondrously engaging book, Damasio takes the reader on a journey of scientific discovery through a series of case studies, demonstrating what many of us have long suspected: emotions are not a luxury, they are essential to rational thinking and to normal social behavior.

As a child, Nezhukumatathil called many places home: the grounds of a Kansas mental institution, where her Filipina mother was a doctor; the open skies and tall mountains of Arizona, where she hiked with her Indian father; and the chillier climes of western New York and Ohio. But no matter where she was transplanted—no matter how awkward the fit

or forbidding the landscape—she was able to turn to our world’s fierce and funny creatures for guidance. “What the peacock can do,” she tells us, “is remind you of a home you will run away from and run back to all your life.” The axolotl teaches us to smile, even in the face of unkindness; the touch-me-not plant shows us how to shake off unwanted advances; the narwhal demonstrates how to survive in hostile environments. Even in the strange and the unlovely, Nezhukumatathil finds beauty and kinship. For it is this way with wonder: it requires that we are curious enough to look past the distractions in order to fully appreciate the world’s gifts. Warm, lyrical, and gorgeously illustrated by Fumi Nakamura, *World of Wonders* is a book of sustenance and joy.

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles

Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

century, and looks at the effect of the global economic downturn on a place that many tout as a blueprint for a more stable Middle East. The city of Dubai, one of the seven United Arab Emirates, is everything the Arab world isn't: a freewheeling capitalist oasis where the market rules and history is swept aside. Until the credit crunch knocked it flat, Dubai was the fastest-growing city in the world, with a roaring economy that outpaced China's while luring more tourists than all of India. It's one of the world's safest places, a stone's throw from its most dangerous. In *City of Gold*, Jim Krane, who reported for the AP from Dubai, brings us a boots-on-the-ground look at this fascinating place by walking its streets, talking to its business titans, its prostitutes, and the hard-bitten men who built its fanciful skyline. He delves into the city's history, paints an intimate portrait of the ruling Maktoum family, and ponders where the city is headed. Dubai literally came out of nowhere. It was a poor and dusty village in the 1960s. Now it's been transformed into the quintessential metropolis of the future through the vision of clever sheikhs, Western capitalists, and a river of investor money that poured in from around the globe. What has emerged is a tolerant and cosmopolitan city awash in architectural landmarks, luxury resorts, and Disneyfied kitsch. It's at once home to America's most prestigious companies and universities and a magnet for the Middle East's intelligentsia. Dubai's dream of

capitalism has also created a deeply stratified city that is one of the world's worst polluters. Wild growth has clogged its streets and left its citizens a tiny minority in a sea of foreigners. Jim Krane considers all of this and casts a critical eye on the toll that the global economic downturn has taken. While many think Dubai's glory days have passed, insiders like Jim Krane who got to know the city and its creators firsthand realize there's much more to come in the City of Gold, a place that, in just a few years, has made itself known to nearly every person on earth.

girl, and an old man with terrible secrets of his own—must join together to battle an all-consuming force that has set its sights on its prey: the entire human race. Advance praise for *Consumption* “Both the evil that suffuses the pages of *Consumption* and the motley gang of innocents who defend against it are much more interesting than those usually found in your average scare fare. Solid writing elevates this imaginative fright-fest from an invigorating new voice.”—Sophie Littlefield, bestselling author of the *Aftertime* series

Cognitive Psychology is a brand new textbook by Ken Gilhooly, Fiona Lyddy & Frank Pollick. Based on a multidisciplinary approach, the book encourages students to make the connections between cognition, cognitive neuroscience and behaviour. The book provides an up-to-date, accessible introduction to the subject, showing students the relevance of cognitive psychology through a range of examples, applications and international research. Recent work from neuroscience is integrated throughout the book, and coverage is given to rapidly-developing topics, such as emotion and cognition. *Cognitive Psychology* is designed to provide an accessible and engaging introduction to *Cognitive Psychology* for 1st and 2nd year undergraduate students. It takes an international approach with an emphasis on research, methodology and application.

First published in 1897, *The Invisible Man* is one of the first science fiction stories. The disturbing tale centers on Griffin, a scientist who has discovered the means to make

himself invisible. His initial, almost comedic, adventures are soon overshadowed by the bizarre streak of terror he unleashes upon the inhabitants of a small village. Notable for its sheer invention, suspense, and psychological nuance, *The Invisible Man* had been filmed many times and continues to enthrall science-fiction fans today as it did the reading public nearly 100 years ago.

This early work by H. H. Munro was originally published in 1911 and we are now republishing it with a brand new introductory biography. 'The Chronicles of Clovis' is a collection of short stories, including 'The Great Weep', 'Tobermory', 'Adrian', and many more. Hector Hugh Munro was born in Akyab, Burma in 1870. He was raised by aunts in North Devon, England, before returning to Burma in his early twenties to join the Colonial Burmese Military Police. Later, Munro returned once more to England, where he embarked on his career as a journalist, becoming well-known for his satirical 'Alice in Westminster' political sketches, which appeared in the Westminster Gazette. Arguably better-remembered by his pen name, 'Saki', Munro is now considered a master of the short story, with tales such as 'The Open Window' regarded as examples of the form at its finest.

The free book "Fundamentals of Computer Programming with C#" is a comprehensive computer programming tutorial that teaches programming, logical thinking, data structures and algorithms, problem solving and high quality code with lots of examples in C#. It starts with the first steps in programming and software development like

variables, data types, conditional statements, loops and arrays and continues with other basic topics like methods, numeral systems, strings and string processing, exceptions, classes and objects. After the basics this fundamental programming book enters into more advanced programming topics like recursion, data structures (lists, trees, hash-tables and graphs), high-quality code, unit testing and refactoring, object-oriented principles (inheritance, abstraction, encapsulation and polymorphism) and their implementation the C# language. It also covers fundamental topics that each good developer should know like algorithm design, complexity of algorithms and problem solving. The book uses C# language and Visual Studio to illustrate the programming concepts and explains some C# / .NET specific technologies like lambda expressions, extension methods and LINQ. The book is written by a team of developers lead by Svetlin Nakov who has 20+ years practical software development experience. It teaches the major programming concepts and way of thinking needed to become a good software engineer and the C# language in the meantime. It is a great start for anyone who wants to become a skillful software engineer. The books does not teach technologies like databases, mobile and web development, but shows the true way to master the basics of programming regardless of the languages, technologies and tools. It is good for beginners and intermediate developers who want to put a solid base for a successful career in the software engineering industry. The book is accompanied by free video lessons, presentation slides and mind maps, as well as hundreds of

The greatest haunted house story ever written, the inspiration for a 10-part Netflix series directed by Mike Flanagan and starring Michiel Huisman, Carla Gugino, and Timothy Hutton First published in 1959, Shirley Jackson's *The Haunting of Hill House* has been hailed as a perfect work of unnerving terror. It is the story of four seekers who arrive at a notoriously unfriendly pile called Hill House: Dr. Montague, an occult scholar looking for solid evidence of a "haunting"; Theodora, his lighthearted assistant; Eleanor, a friendless, fragile young woman well acquainted with poltergeists; and Luke, the future heir of Hill House. At first, their stay seems destined to be merely a spooky encounter with inexplicable phenomena. But Hill House is gathering its powers—and soon it will choose one of them to make its own. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.
