With his characteristically brilliant wordplay and extraordinary scope, Tom Stoppard has in Hapgood devised a play that "spins an end-of-the-Cold-War tale of intrigue and betrayal, interspersed with explanations of the quixotic behavior of the electron and the puzzling properties of light" (New York Times). It falls to Hapgood, an extraordinary British intelligence officer, to try to unravel the mystery of who is passing along top-secret scientific discoveries to the Soviets, but as she does so, the web of personal and professional betrayals?doubles and triples and possibly quadruples?continues to multiply.

Social participation naturally occurs in everyday life in combination with daily occupations, such as when people interact while eating, playing, carpooling, and working. Throughout *Social Participation in Occupational Contexts: In Schools, Clinics and Communities*, Professors Marilyn B. Cole and Mary V. Donohue explain how social interactions and environments can facilitate occupational performance or can create barriers to participation from an occupational perspective. The beginning chapters of this comprehensive text define the broad range of social skills, competencies, contexts, and cultural norms for social participation in everyday life, offering multiple opportunities for learning and practicing specific skills. Section One also provides an overview of theoretical foundations of social learning, social capital, and the application of social participation in educational learning environments. Section Two reviews social development from childhood to maturity providing a backdrop for a clearer understanding of the interplay of occupation and socialization in interpersonal relationships and natural community groups. Also covered are opportunities for development of social participation in professional education that illustrate theory application in classroom, fieldwork, and community settings for all age groups. Parameters for evaluating social participation situations, contexts, skills, and norms are discussed in Section Three, along with a variety of tools relevant to the assessment of social participation from client and contextual perspectives, including critiques of these evaluation instruments. Lastly, in Section Four, occupational intervention approaches designed to foster social skills and remove barriers will enable practitioners and students to facilitate social participation and development across the lifespan. Features:

- Occupational focus emphasized through an extension of International Classification of Functioning and the American Occupational Therapy Association Practice Framework
- Role-playing scenarios in each chapter provide participatory learning techniques
- Includes thought-provoking questions and learning activities
- Applies theories from several fields to occupational contexts
- Provides evaluations and interventions to address social participation issues
- International sources in the theory and research provide a global perspective of the concept of social participation
- Faculty members will enjoy an instructor's manual and a PowerPoint presentation in a 14-week semester format
