A primary Spanish course for children that fosters active communication through the teaching of everyday vocabulary and structures. From an elite Special Operations physical trainer, an ingeniously simple, rapid-results, do-anywhere program for getting into amazing shape For men and women of all athletic abilities! As the demand for Special Operations military forces has grown over the last decade, elite trainer Mark Lauren has been at the front lines of preparing nearly one thousand soldiers, getting them lean and strong in record time. Now, for regular Joes and Janes, he shares the secret to his amazingly effective regimen—simple exercises that require nothing more than the resistance of your own bodyweight to help you reach the pinnacle of fitness and look better than ever before. Armed with Mark Lauren’s motivation techniques, expert training, and nutrition advice, you’ll see rapid results by working out just thirty minutes a day, four times a week—whether in your living room, yard, garage, hotel room, or office. Lauren’s exercises build more metabolism-enhancing muscle than weightlifting, burn more fat than aerobics, and are safer than both, since bodyweight exercises develop balance and stability and therefore help prevent injuries. Choose your workout level—Basic, 1st Class, Master Class, and Chief Class—and get started, following the clear instructions for 125 exercises that work every muscle from your neck to your ankles. Forget about gym memberships, free weights, and infomercial contraptions. They are all poor substitutes for the world’s most advanced fitness machine, the one thing you are never without: your own body.

In *Inspired Imperfection*, Gregory A. Boyd adds another counterintuitive and provocative thesis to his corpus. While conservative scholars and pastors have struggled for years to show that the Bible is without errors, Boyd considers this a fool's errand. Instead, he says, we should embrace the mistakes and contradictions in Scripture, for they show that God chose to use fallible humans to communicate timeless truths. Just as God ultimately came to save humanity in the form of a human, God chose to impart truth through the imperfect medium of human writing. Instead of the Bible's imperfections being a reason to attack its veracity, these "problems" actually support the trustworthiness of Christian Scripture. *Inspired Imperfection* is required reading for anyone who's questioned the Bible because of its contradictions.

Activities aimed at addressing the need for recruiting women and minorities in school administration are presented in this resource manual, which is a collective work of the Study Group on Women and Minorities sponsored by the National LEADership Network. Each section describes an interactive, adaptable activity that is aimed at policymakers and administrative staffs. The first activity focuses on how to obtain, use, and disseminate information to create a state demographic profile. The second activity aims to share information about several current recruitment programs and to help Leadership in Educational Administration Development (LEAD) directors plan for expanding recruitment efforts. Providing entry-level support is the purpose of the third activity, which is designed to create awareness and encourage the development of entry-level programs for women and minorities. The fourth activity examines the promotion of advancement opportunities for women and minorities: identifying barriers to advancement and determining strategies to overcome them, and valuing diversity in leadership styles. Activity 5 helps administrators create an action plan. Forty-three figures can be made into transparencies, and a list of resources accompanies each section. Appendices contain an article on access to the roles of school leadership, resolutions adopted by the National School Boards Association (NSBA) and American Association of School Administrators (AASA), LEAD Center directors/trainers resources, and training activity notes. (Contains 44 references.) (LMI)

This research guide is an annotated bibliography of sources dealing with the string quartet. Listings in the previous volume have been updated to reflect the burgeoning interest in this genre (social aspects, newly issued critical editions, doctoral dissertations). It also offers commentary on online links, databases, and references.

This encourages people to stay committed and try out other programs, too. This book is an empirical study of contributions by courts in the Global South to comparative constitutionalism. It offers an analytical framework for understanding these constitutional innovations and illustrates them with a qualitative study of the most ambitious case in constitutional adjudication in Latin America over the last decade: the Colombian Constitutional Court's structural injunction affecting the rights of over five million internally displaced people and its implementation process. Although the ruling (known as T25) was handed down in 2004, its monitoring process continues. This book traces the case's evolution from its origin to its effects on policy, politics and public opinion. It also compares the implementation and effects of T25 with those of other rulings on the rights to health, food, housing, and prison overcrowding in Colombia, India and South Africa. The study's insights will be of interest to scholars of comparative constitutionalism in Latin America, Africa and Asia.

This book presents the study of symmetry groups in Physics from a practical perspective, i.e. emphasising the explicit methods and algorithms useful for the practitioner and profusely illustrating by examples. The first half reviews the algebraic, geometrical and topological notions underlying the theory of Lie groups, with a review of the representation theory of finite groups. The topic of Lie algebras is revisited from the perspective of realizations, useful for explicit computations within these groups. The second half is devoted to applications in physics, divided into three main parts — the first deals with space-time symmetries, the Wigner method for representations and applications to relativistic wave equations. The study of kinematical algebras and groups illustrates the properties and capabilities of the notions of contractions, central extensions and projective representations. Gauge symmetries and symmetries in Particle Physics are studied in the context of the Standard Model, finishing with a discussion on Grand-Unified Theories.
