This publication was awarded the Jacqueline Ross TOEFL Dissertation Award in 2009. Since its publication in 2001, the Common European Framework of Reference (CEFR) has been the most frequently-cited performance standard in language testing in Europe. To help test providers and users with score interpretation in relation to the CEFR levels, the Council of Europe published the 'Manual for relating language examinations to the CEFR'. Even though the linking process set out in the Manual is primarily based on judgements by trained participants, judgement-making in this context remains largely unexplored. The research presented in this book addresses this issue by employing quantitative and qualitative methods. Despite the judges' good understanding of how language ability progresses from lower to higher CEFR levels, it was found that describing test content and examinee performance was not without problems and decision-making was affected by a number of factors that were irrelevant to the judgement task. The results provide a better understanding of judgement-making

during the CEFR linking process, which has important implications for examination providers and users of CEFR-aligned test scores.

What should language and writing teachers do about giving students written corrective feedback? This book surveys theory, research, and practice on the important and sometimes controversial issue of written corrective feedback, also known as “error/grammar correction,” and its impact on second language acquisition and second language writing development. Offering state-of-the-art treatment of a topic that is highly relevant to both researchers and practitioners, it critically analyzes and synthesizes several parallel and complementary strands of research — work on error/feedback (both oral and written) in SLA and studies of the impact of error correction in writing/composition courses — and addresses practical applications. Drawing from both second language acquisition and writing/composition literature, this volume is the first to intentionally connect these two separate but important lines of inquiry.

The European Language Portfolio aims to foster the development of learner autonomy, intercultural awareness and plurilingualism. Teachers of particular languages working on their own can use the ELP to promote learner autonomy, but the goals of intercultural awareness and plurilingualism invite us to use the ELP in all foreign language classes at all levels in the school. The guide introduces the language education policy that underpins the ELP, explores the key concepts that it embodies, and explains how to plan, implement and evaluate whole-school ELP projects. The ten case studies published on the project website illustrate various dimensions of ELP use and include practical suggestions and activities for teachers and learners.

This short book is for you if you are considering going into the field of teaching English as a second/foreign language, whether English is your first (native) language or not. I have written it with those who are contemplating pursuing English teaching (ESL, EFL or ESOL) as a career

option particularly in mind, but it would also be of interest to individuals who might be thinking about engaging in English teaching on a short term or voluntary basis. My purpose in writing this book is to help you decide whether or not teaching English as a second/foreign language is something you might want to pursue. Based upon my own experience of teaching English as a second language, and my knowledge of the English language teaching field more broadly, I discuss: - what it is like in practical terms to be an ESL/EFL/ESOL teacher - what the job involves and what to expect - beyond the practicalities, to give some insight into how EFL teachers think about their task - the skills, qualities and knowledge needed to be an ESL/EFL/ESOL teacher - the kind of opportunities available I also give some ideas about where to begin with getting into English teaching, and I provide recommendations on how to find out more about the field. Although the focus of this book is the teaching of the English language, much of what is written will be equally relevant to teaching any language. So, if English is not your first language and you are interested in teaching your native language to those who do not know it, this book is for you too.

### Socio Linguistics Scientific e-Resources

Sociolinguistics is the descriptive study of the effect of any and all aspects of society, including cultural norms, expectations, and context, on the way language is used, and society's effect on language. It differs from sociology of language, which focuses on the effect of language on society. Sociolinguistics overlaps considerably with pragmatics. It is historically closely related to linguistic anthropology, and the distinction between the two fields has been questioned. This book deals with the social life of language. The field ranges from micro-analyses to broadly-based policy and planning undertakings. As such, this book draws from sociolinguistics, the sociology of language, and psycholinguistics. The relationship between language and identity - whether of an individual or a group - is a strong thread linking all the topics covered in the book. For researchers and advanced students, it gives access to the field's most pressing
