SEALS—America's best just got better. On the heels of a bloody first contact comes Earth's most important diplomatic mission in history: a summit meeting with the three alien empires vying for control of the galaxy. Assurance that Earth's first extraterrestrial ambassadors aboard the spaceship Pangaea will be safe means little to Lieutenant Thomas "Stonewall" Jackson. After all, a job's a job. As escorts on the voyage, Jackson and his sixteen-man team of new-breed Navy SEALs (Sea, Air, Land, and Space) must be neither seen nor heard. Unless, of course, the op hits the fan. While Jackson and his team respond to a distress call from an allied fleet, the Pangaea, with all its diplomatic passengers, goes missing, forcing the SEALs to follow the trail to an ice moon at the edge of the galaxy, a harsh environment crawling with crack commandos and hostile enemies. But for these warriors with their outrageous firepower, what seems an impossible quest is just another day in deep space.

Experiences of a correspondent of the New York Tribune within the Confederate lines in 1861, and later with the Union armies and in southern prisons.

Escorts Mk1 and Mk2 were built in huge numbers around the world, in Britain, France, Germany, Spain, Australia, New Zealand and South Africa. During the life of the models, no less than 130 different variants were produced, ranging from the 2-door base model saloon through four-doors, vans and estates, campers and plush Ghia models to the highly desirable sporting versions like the Twin-Cam and RS models. In addition there were special editions by companies such as Allard, Crayford, Broadspeed, Lawrencetune, Uren and Willment. For every variant, The Complete Catalogue of the Ford Escort Mk1 & Mk2 provides specifications and a description, and all of them are illustrated.

Autonomous vehicles (AVs) have been used in military operations for more than 60 years, with torpedoes, cruise missiles, satellites, and target drones being early examples.¹ They have also been widely used in the civilian sector--for example, in the disposal of explosives, for work and measurement in radioactive environments, by various offshore industries for both creating and maintaining undersea facilities, for atmospheric and undersea research, and by industry in automated and robotic manufacturing. Recent military experiences with AVs have consistently demonstrated their value in a wide range of missions, and anticipated developments of AVs hold promise for increasingly significant roles in future naval operations. Advances in AV capabilities are enabled (and limited) by progress in the technologies of computing and robotics, navigation, communications and networking, power sources and propulsion, and materials. Autonomous Vehicles in Support of Naval Operations is a forward-looking discussion of the naval operational environment and vision for the Navy and Marine Corps and of naval mission needs and potential applications and limitations of AVs. This report considers the potential of AVs for naval operations, operational needs and technology issues, and opportunities for improved operations.
