Financial Management in the Sport Industry provides readers with an understanding of sport finance and

the importance of sound financial management in the sport industry. It begins by covering finance basics and the tools and techniques of financial quantification, using current industry examples to apply the principles of financial management to sport. It then goes beyond the basics to show how financial management works specifically in sport - how decisions are made to ensure wealth maximization. Discussions include debt and equity financing, capital budgeting, facility financing, economic impact, risk and return, time value of money, and more. The final section focuses on sport finance in three sectors of the industry - public sector sports, collegiate athletics, and professional sport - providing in-depth analysis of financial management in each sector. Sidebars, case studies, concept checks, and practice problems throughout provide practical applications of the material and enable thorough study and practice. The business of sport has changed dynamically since the publication of the first edition, and this second edition reflects the impact of these changes on financial management in the sport industry. New to this edition are changes to reflect the global nature of sport (with, for example, discussions of income tax rates in the Premiere League), expanded material on the use of spreadsheets for financial calculations, a primer on accounting principles to help students interpret financial statements, a valuation case study

assignment that takes students step by step through a valuation, a new stadium feasibility analysis using the efforts of the Oakland Raiders to obtain a new stadium, a new economic impact example focusing on the NBA All Star game, and much more.

The meltdown of stalwart companies from AIG to JAL to Lehman and government crises from Greece to Spain make it abundantly clear: With economic uncertainty and rapid innovation, empowered consumers and free agents, and the constant pressure to be faster, better and cheaper, the established wisdom on strategic planning works no more. Once hailed as "brilliant" by experts, it is the very approach that got so many companies into the

mess in the first place. This path-breaking book shows how successful organizations of all stripes transformed their strategy paradigm based on Strategy-In-Action and the power of human capital: standing in the future, listening for vital intelligence in far-flung locations, giving voice to dissenting views, maximizing ownership by stakeholders, especially implementers, getting quick wins and screening out losers quickly in the action. Above all, successful companies of all sizes have ended the long-standing divorce of strategy—hatched by a select few behind closed doors—from action, the supreme test of strategy. Dr. Thomas D. Zweifel, strategy and performance expert, gamechanger and author of seven leadership books such as "Communicate or Die," "Culture Clash 2," "Leadership in 100 Days" and the award-winning "The Rabbi and the CEO," has teamed up with Edward J. Borey, CEO, corporate strategist and turnaround guru. Together, they bring to bear their combined half-century experience in innovating strategy design and execution at Fortune 500, midsize enterprises and startups as well as large public-sector and UN agencies. The result: a turn-key methodology for senior managers who need adaptive and people-centered strategy that yields quick wins and stands the test of time.
