The Urban Question Manuel Castells, 1977 A review of the original French edition of this book in the American Journal of Sociology hailed it as the most finished product yet to emerge from the new (Marxist) school of French urban sociology... The aim of the book is nothing less than to reconceptualize the field of urban sociology. It is carried out in two stages: a critique of the literature of urban sociology (and urbanization) and an attempt to lay the Marxist bases for a reconstructed urban sociology. The problems facing the world's cities, whether problems of development or of decay, cannot be solved until they have been diagnosed. The race riots in Detroit, the shantytowns of Paris, the financial crisis of New York must not be seen in isolation. The mushrooming cities of the third world, demolition and urban sprawl at home are located in a network of economics, social welfare and power politics, and the decisions we are called upon to make elude us in a fog of ideology. This brilliant exposition of the function of the city in social, economic and symbolic terms illuminates the creation and structuring of space by action administrative, productive and more immediately human. The interaction of environment and life-style, the complex of market forces and state policy against a background of traditional social practice is scrutinized with the aim of establishing concepts and research methods that will enable us to come to grips with the cities themselves and the way in which we view them. Castells draws on urban renewal in Paris, the English New Towns, the American megalopolis for concrete data in his empirical and theoretical investigation. In this English edition, a new Part V has been added on urban development in America. The chapters on the pobladores in Chile and the struggle of the FRAP in Quebec have been greatly extended and an Afterword traces the development of research in the past five years. -- Amazon.com.

The Unknown Orwell and Orwell: The Transformation Peter Stansky, William Miller Abrahams, 1994 For the first time, these two essential books on George Orwell have been brought together under one cover. *The Unknown Orwell* describes the first thirty years of Orwell's life—his childhood, the years at Eton and in Burma, and the struggles to become a writer. *Orwell: The Transformation* carries us forward into the crucial years 1933 to 1937 in which Eric Blair, minor novelist, became George Orwell, a powerful writer with a view, a mission, and a message.

Sappho was a Right-on Woman Sidney Abbott,Barbara Love,1977 Most material of all, this book begins to fill the terrible need of an entire population of women, until now not only persecuted and ignored, but deprived of any reasonable account of themselves and the sufferings imposed on them by a hostile society.

Physical and Applied Acoustics Erwin Meyer,2012-12-02 Physical and Applied Acoustics: An Introduction explores the mechanical-acoustical or acoustical-electrical analogies that are based on common theoretical relationships. This book is composed of 11 chapters that discuss the theory, experiment, and technological applications of physical and applied acoustics. The introductory chapters deal with the sound wave propagation in liquids and gases, as well as the statistical theory of room acoustics. These topics are followed by discussions on sound absorption in different medium; the concept of sound radiation pressure; directional characteristics of sound sources; measurement and calibration of acoustics; and the fundamental physical and psychological facts of acoustics. The subsequent chapters cover the use of electroacoustics for the transmission of speech and music. A chapter examines the production and detection of extremely high-frequency sound, called quantum acoustics. The concluding chapter highlights the interaction phenomena between sound and flow in a medium.

Comparative Biochemistry of Parasites H Van den Bossche,2012-12-02 Comparative Biochemistry of Parasites contains the proceedings of an international symposium organized by the Janssen Research Foundation and held at Janssen Pharmaceutica in Belgium on September 1-3, 1971. The symposium reviewed progress in the understanding of the

physiology and biochemistry of parasites such as protozoa and helminths. Organized into 34 chapters, this volume begins with an overview of early research on parasite biochemistry before turning to a discussion of antischistosomal drugs and their biochemical effects on parasites. The reader is then introduced to the biochemistry of carbohydrates in nematodes and cestodes; neurotransmitters in trematodes; pharmacological aspects and biochemical effects of tetramisole; the mechanism of action of berenil (Diminazene) and related compounds; and dihydrofolate reductases in parasitic protozoa and helminths. Other chapters focus on the loss of fatty acid biosynthesis in flatworms, the cytochrome system in Kinetoplastidae, oxidative phosphorylation in *Moniezia* mitochondria, and the role of non-heme iron in cestode respiration. Scientists, particularly physiologists and biochemists, will find this book an invaluable source of information on parasite physiology and biochemistry.
