Frederik Sandwich and the Earthquake that Couldn't Possibly Be Kevin John Scott,2018-02-06 A delightfully strange and hilarious debut novel perfect for Lemony Snicket and Trenton Lee Stewart fans—the first book in a new middle-grade mystery series that will keep you guessing and laughing all along the way. At the age of eleven Frederik Sandwich awakens to an earthquake that couldn't possibly be. His town is nowhere near a fault line and no earthquake has ever been recorded there. But when he questions what could have caused the shaking, he realizes he may have uncovered more than he bargained for. Desperately wanting to know what happened, but not the type of person to break rules or push adults for answers, Frederik is lucky (or not, depending on how you look at it) to meet a mysterious stranger, Pernille. She is the sort of person to break rules and demand answers, and is determined to partner with him to get to the bottom of the mystery. It's a mystery that will lead the two outsiders through abandoned train tunnels, into hidden library rooms, and to the shadowy corridors of City Hall in the dead of night as they try to figure out what could have caused inexplicable rumblings in their small town.

Book of Life Upton Sinclair,2008-08 Upton Sinclair, one of America's foremost writers, addresses the cultivation of the mind and the body in this 1922 volume. Sinclair's goal was to tell the reader how to live, how to find health, happiness and success, and how to develop fully both the mind and the body.

The Brass Check Upton Sinclair,1920

The Art of Science Writing Dale Worsley,Bernadette Mayer,1989 Aimed at secondary school science and English teachers, this book presents practical advice for developing good student writing in science and mathematics. Five main sections cover: (1) an essay development workshop; (2) 47 specific writing assignments; (3) over 30 questions teachers ask about science writing, and the answers; (4) an anthology of 43 selections of science writing from Shakespeare, Darwin, Freud, Carl Sagan, Rachel Carson, and others; and (5) an annotated bibliography of over 150 books useful for the teaching of science writing. An appendix by Russel W. Kenyon discusses teaching math writing. (RS)

The Senses Ellen Lupton,Andrea Lipps,2018-07-24 A powerful reminder to anyone who thinks design is primarily a visual

pursuit, *The Senses* accompanies a major exhibition at the Cooper-Hewitt Smithsonian Design Museum that explores how space, materials, sound, and light affect the mind and body. Learn how contemporary designers, including Petra Blaisse, Bruce Mau, Malin+Goetz and many others, engage sensory experience. Multisensory design can solve problems and enhance life for everyone, including those with sensory disabilities. Featuring thematic essays on topics ranging from design for the table to tactile graphics, tactile sound, and visualizing the senses, this book is a call to action for multisensory design practice. *The Senses: Design Beyond Vision* is mandatory reading for students and professionals working in diverse fields, including products, interiors, graphics, interaction, sound, animation, and data visualization, or anyone seeking the widest possible understanding of design. The book, designed by David Genco with Ellen Lupton, is edited by Lupton and curator Andrea Lipps. Includes essays by Lupton, Lipps, Christopher Brosius, Hansel Bauman, Karen Kraskow, Binglei Yan, and Simon Kinnear.

The Postnormal Times Reader Ziauddin Sardar, 2019-01-01 <p>We live in a period of accelerating change. New trends, technologies and crisis emerge rapidly and transform familiar social and political landscapes. Established and cherished ideals, with deep historical roots, can be overturned overnight. Unconventional and uncommon notions and events can appear as though from nowhere, proliferate, and become dominant. The last few years alone have witnessed the emergence of populism and the far right in Europe and the US, Brexit, cracks in the European Union, cyber wars accompanied by the re-emergence of a cold war. China as an increasingly dominant new superpower. Pandemics like the Ebola and Zika viruses. Climate change leading to extreme weather events. Driverless cars. AI. 'Fake News'. 'Alternative Facts'. 'Post-Truth'. 'Disruptive technologies' that disrupt and often corrupt everything. Everything seems to be in a state of flux, nothing can be trusted. All that we regard as normal is melting away right before us.</p><p>
</p><p>The postnormal times theory attempts to make sense of a rapidly changing world, where uncertainty is the dominant theme and ignorance has become a valuable commodity. The Postnormal Times Reader is a pioneering anthology of writings on the contradictory, complex and chaotic nature of our era. It covers the origins, theory and methods of postnormal times; and examines a host of issues, ranging from climate change, governance, Middle East to religion and science, from the perspective of postnormal times. By mapping some of the key local and global issues of our transitional age, the Reader suggests a way of navigating our turbulent futures.</p>

Frederik Sandwich and the Mayor Who Lost Her Marbles Kevin John Scott, 2019-05-07 The second book in this delightfully strange and hilarious series perfect for Lemony Snicket and Trenton Lee Stewart fans. The evil mayor of Frederik's Hill is determined that no one will ruin her upcoming International Midsummer Festival. And town troublemakers

Frederik and Pernille are trying to keep a low profile, but seem to have been the source of some pesky zombie rumors that are flooding the town and indeed threatening to do just that. Determined to turn the spotlight off them, Frederik plans to expose the mayor's big secret—one she has kept hidden for years and involves a legion of valuable statues and an elephant stampede. But then the worst happens. Pernille goes missing and Frederik learns that her disappearance is a part of the mayor's horrible plan to deport all foreigners from Frederik's Hill. Now it's up to him to stop the mayor before it's too late.

Market Leader, 2011

The Peoples of Utah Utah State Historical Society, 1976 Contains histories of some of the minorities in Utah.

Multiethnic Japan John Lie, 2009-07 Multiethnic Japan challenges the received view of Japanese society as ethnically homogeneous. Employing a wide array of arguments and evidence--historical and comparative, interviews and observations, high literature and popular culture--John Lie recasts modern Japan as a thoroughly multiethnic society. Lie casts light on a wide range of minority groups in modern Japanese society, including the Ainu, Burakumin (descendants of premodern outcasts), Chinese, Koreans, and Okinawans. In so doing, he depicts the trajectory of modern Japanese identity. Surprisingly, Lie argues that the belief in a monoethnic Japan is a post-World War II phenomenon, and he explores the formation of the monoethnic ideology. He also makes a general argument about the nature of national identity, delving into the mechanisms of social classification, signification, and identification.

The asbestos lie. The past and present of an industrial catastrophe Maria Roselli, journalist, 2014-06-24 For decades asbestos was considered an ideal substance and therefore was called 'the mineral of the twentieth century'. Even though the fiber had already proven much earlier to cause various ailments, a real boom began in the 1950s and prospered everywhere in Europe. This book retraces the history of the Swiss asbestos cement company Eternit, investigating the strategy it developed - together with other asbestos industrialists - to prevent this carcinogen from being outlawed until, in 1999, an EU Directive was finally adopted to this end. The book also reviews the struggle of the asbestos workers and their families to gain official recognition of, and compensation for, the harm suffered.

The Self-made Tapestry Philip Ball, 2001 For centuries, scientists have struggled to understand the origins of the patterns and forms found in nature. Now, in this lucid and accessibly written book, Philip Ball applies state-of-the-art scientific understanding from the fields of biology, chemistry, geology, physics, and mathematics to these ancient mysteries, revealing how nature's seemingly complex patterns originate in simple physical laws. Tracing the history of scientific thought about natural patterns, Ball shows how common presumptions--for example, that complex form must be guided by some intelligence or that form always follows function--are erroneous and continue to mislead scientists today. He investigates specific patterns in depth, revealing that these designs are self-organized and that simple, local interactions between component parts produce motifs like spots, stripes, branches, and honeycombs. In the process, he examines the mysterious

phenomenon of symmetry and why it appears--and breaks--in similar ways in different systems. Finally, he attempts to answer this profound question: why are some patterns universal? Illustrations throughout the text, many in full color, beautifully illuminate Ball's ideas.

A Door Into Ocean Joan Slonczewski,2000-10-13 Joan Slonczewski's A Door into Ocean is the novel upon which the author's reputation as an important SF writer principally rests. A ground-breaking work both of feminist SF and of world-building hard SF, it concerns the Sharers of Shora, a nation of women on a distant moon in the far future who are pacifists, highly advanced in biological sciences, and who reproduce by parthenogenesis--there are no males--and tells of the conflicts that erupt when a neighboring civilization decides to develop their ocean world, and send in an army. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Nobel Prize Burton Feldman,2000 Discusses the Nobel Institution in detail, telling about the award and its beginnings, what it means to win a Nobel Prize, the fields in which it is presented, who judges and how the prize is awarded, and more.

The Wesleyan Anthology of Science Fiction Arthur B. Evans,2010-08 The best single-volume anthology of science fiction available—includes online teacher's guide The Wesleyan Anthology of Science Fiction features over a 150 years' worth of the best science fiction ever collected in a single volume. The fifty-two stories and critical introductions are organized chronologically as well as thematically for classroom use. Filled with luminous ideas, otherworldly adventures, and startling futuristic speculations, these stories will appeal to all readers as they chart the emergence and evolution of science fiction as a modern literary genre. They also provide a fascinating look at how our Western technoculture has imaginatively expressed its hopes and fears from the Industrial Revolution of the nineteenth century to the digital age of today. A free online teacher's guide at <http://sfanthology.site.wesleyan.edu/> accompanies the anthology and offers access to a host of pedagogical aids for using this book in an academic setting. The stories in this anthology have been selected and introduced by the editors of Science Fiction Studies, the world's most respected journal for the critical study of science fiction.

Science And Society John Scales Avery,2016-09-14 The latest advances and discoveries in science have made, and continue to make, a huge impact on our lives. This book is a history of the social impact of science and technology from the beginnings of civilization up to the present. The book explains how the key inventions: agriculture, writing and printing with movable type, initiated an explosive growth of knowledge and human power over the environment. It also shows how the Industrial Revolution changed the relationship between humans and nature, and initiated a massive use of fossil fuels. Problems related to nuclear power, nuclear weapons, genetic engineering, information technology, exhaustion of non-renewable resources, use of fossil fuels and climate change are examined in the later chapters of the book. Finally, the need for ethical maturity to match our scientific progress is discussed.

Fabric Formwork Alan Chandler, Remo Pedreschi, 2007 Fabric-cast concrete involves casting concrete in forms made with flexible formwork. This provides the potential to produce forms that are both structurally efficient and architecturally exciting in a relatively inexpensive and practical manner. By careful shaping of the fabric it is possible to produce complex shapes that would otherwise be difficult and expensive to produce using conventional formwork systems. This book contains six essays that describe the collaboration between the Universities of Edinburgh and East London, together with the Centre for Architectural and Structural Technology (CAST) at the University of Manitoba, in their detailed and practical research into concrete casting and formwork. Richly illustrated with photographs and diagrams and containing new and innovative research this book offers the architect, engineer and student inspiration and technical guidance in this re-emerging material.

Anthropology Inside Out Mette Lind Kusk, 2020-07-21 Fieldworkers' notebooks are full of sensations and observations in which the subjectivity of the ethnographer seeps through. Not really science. Much closer to life. Yet in classical anthropology they are invisible to the reader. In this book the focus is reversed, turning Anthropology Inside Out as it explores the vibrant backstage life of field notes. What happens when we put them centre stage? Aimed at both curious novice and experienced practitioner, the chapters read as a catalogue of experimental practices teetering on the edge of the tradition: intuitively observational drawings; notes pervaded with paranoia; collective notetaking; crisis-ridden personal confessions; layers of notes in photographs and archives; old flip-flops that trigger memories in mind and body. This exploration of what field notes are, can do and could be, concludes with a constellation of shimmering notes on notes from Michael Taussig, a meta-commentary on anthropologists' fetishistic relationship with the most personal of professional tools. 'This extremely timely and original book starts a long overdue discussion within anthropology. The authors are to be commended for filling a gap in the methodology literature, which was so glaring until now as to be invisible to most of us.' Professor Thomas Hylland Eriksen, Department of Social Anthropology, University of Oslo 'The book is steeped in love for the

materiality of the process of learning about life - inner life as well as the life out there. The chapters open up for reflections on the artistic and scientific aspects of the anthropological endeavour and become experimental in their expansion of the genre of anthropological work and thinking.' Professor Inger Sjørsløv, Senior Lecturer Emeritus, Department of Anthropology, University of Copenhagen
