The development and spread of the Internet technology across the globe has fomented the use of a wide range of internet based social and commercial services. For instance, social networks like the Face book, the Twitter, The Picasa, LinkedIn, Tagged, .etc and commercial services as in the case of Amazon.com and the eBay online sellers are few of the multitude of online internet services available on various websites(UNCTAD,2013). Besides, governments are using the internet for divergent purposes the central use being for the provision of public services for the general public including electronic payment of bills and electronic taxation. Various Banks also apply the internet technology to provide facility for electronic payment systems across borders (Ibid). Virtually all types of business enterprises (including Large Size Enterprises, Small and Medium Size enterprises), the government and various consumers are engaged in cross-border e-commerce. All of these actors of Cross-Border E-Commerce(CBEC) demand all the facilities that make CBEC possible (e-commerce infrastructure) and a secure electronic business environment (E-commerce security) for any kind of transactions they make based on the internet medium (Ibid). Despite such demand for e-commerce infrastructure and e-commerce security by the actors of CBEC, the general trend of using the internet for e-commerce particularly CBEC is increasing at an increasing rate (Ibid). There are overhanging problems of regulating CBEC at the international level. Indeed, the effective regulation of CBEC calls for the application of the integrated system of regulatory policies, legislations, institutions and technological framework (Ibid). There are prospects that make the regulation of CBEC possible while there are also challenges that thwart it. The development and spread of the use of Internet for E-commerce is increasing year to year in Ethiopia as good as it does in the global system (INSA, 2014). Accordingly, the CBEC has an increasing trend in Ethiopia. The increase in such commerce has faced multiple of legal issues that need to be regulated in an orchestrated system of Policies, legislations, institutions and the adoption of advanced technologies in Ethiopia. An orchestrated system of e-commerce regulation means making the regulatory issues of cross-border e-commerce the front and central concern of policies, legislations, institutions and ICT technologies that in one or other way deal with e-c

Electronic Commerce is one of the most important aspects to emerge from the Internet. It allows people to exchange goods and services immediately, with no barriers of time or distance Initially, E-Commerce was primarily the domain of large firms, due to its initial format of customized, complex, and expensive transactions – essential barriers to entry by smaller competitors. Today, for a nominal fee, anyone may become an online merchant, with the potential to reach millions of consumers world-wide. In essence, the development of the Internet has had the same effect on E-Commerce as Henry Ford's assembly line on the automotive industry. It has converted a luxury for the few into a relatively simple and inexpensive device for the masses. In this book, we will explore these impacts and innovations. The purpose of this book is to provide a preliminary analytical foundation (knowledge base), which then may be used for further, more advanced study. It is not intended to be an exhaustive analysis—yet at the same time provides as much information as possible to provide an accurate depiction of the current state and likely future direction of E-Commerce.

The General Research category consists mostly of Internet resources that provide market research and statistical information about a country's economic and social well-being, general statistical methodology resources are also included. The Advertising and Marketing category contains resources with information on advertising and marketing industries."--BOOK JACKET. The International Conference on E-commerce and Web Technologies (EC-Web) is a mature and well-established forum for researchers working in the area of electronic commerce and web technologies. These are the proceedings of the ninth conference in the series, which, like previous EC-Web conferences, was co-located with DEXA, the International Conference on Database and Expert Systems Applications, which, this year, took place in Turin, Italy. One key feature of EC-Web is its two-fold nature: it brings together both papers proposing technological solutions for e-commerce and the World Wide Web, and papers concerning the management of e-commerce, such as web marketing, the impact of e-commerce on business processes and organizations, the analysis of case studies, as well as social aspects of e-commerce (to understand the impact of e-commerce solutions on day-to-day life and the new opportunities that these behaviors open). The technical program included 12 reviewed papers and two invited papers. Each paper was reviewed by five reviewers, in order to select only the best quality papers. The program included five sessions: "Security in E-Commerce" (with two papers), "Social Aspects of E-Commerce" (with two papers), "Business Process and EC Inf-structures" (with three papers), "Recommender Systems and E-Negotiations" (with four papers) and "Web Marketing and User Profiling" (with three papers). We found the program interesting and we hope participants and readers feel the same. Furthermore, we hope the attendees enjoyed the conference and Turin. June 2008 Giuseppe Psaila Roland R. Wagner Conversion rate optimization (CRO) is a complex field and one that is rapidly evolving. It's about understanding people and their behaviour, not simply website visits. E-commerce Website Optimization provides an all-encompassing guide, explaining the how and why, before focusing on techniques and tools to increase the percentage of visitors who buy from the site, and subsequently the amount that these visitors spend when they buy. Grounded in best-practice theory and research, it brings together usability, analytics and persuasion to offer a detailed, step-by-step guide to improve conversion rates, increase ROI from online marketing campaigns, generate higher levels of repeat business and increase the e-commerce value of websites. In the fast-moving world of e-commerce, this fully revised second edition includes updates on test metrics, prioritization and personalization, alongside updated case studies and newly recommended tools. E-commerce Website Optimization is an invaluable book for those seeking to implement a data-driven ethos for their organization's e-commerce programme, for everyone from chief digital officers and heads of online sales, to entrepreneurs and small business owners.

Just allow authorized people to transact business securely and efficiently through the Internet, and keep unauthorized people away from valuable information. But in today's impersonal and global economy, how can a business or organization really know who they are really allowing into their systems? And how can they be sure unauthorized people are always kept out? In a highly interconnected and transaction-driven world, deciding who should be kept out or included is becoming more difficult every day. Due in part to interdependent global economic conditions, international terrorism concerns and human ingenuity involved with misusing technology for ill gotten gains, e-commerce security is neither simple nor static.
