**Hugh Morrison**

*Frontier Frugal* Hugh Morrison, 2014-12-26 Reduce, reuse and recycle - the nineteenth century way! This book is packed full of helpful hints and recipes from the early 1800s to the early 1900s, when the United States and Canada expanded their frontiers and intrepid pioneers set up frugal, self-reliant homesteads. It is not just for homesteaders or self-sufficiency purists - whether you live in a country cottage, a city apartment or a college dorm, this book contains a wealth of hints to help you save money, live a greener lifestyle and 'downsize'. It shows how to avoid expense and waste by using leftovers in new ways, substituting costly ingredients for more affordable ones and overcoming common household problems using everyday items. If you would like to find out how to make filling meals for just pennies - make cheese from sour milk - get rid of shiny elbows on suit jackets - cook with free wild plants - bring stale food back to life - make tea taste better and go further - use meat bones to shine shoes - or just brew your own beer in a tea-kettle, then this book is for you!

*Women and the American Experience* Nancy Woloch, 2024-06-03 The third edition of *Women and the American Experience: A Concise History* is a comprehensive survey of U.S. women's history from the seventeenth century to the present that illuminates the diversity of women's experience and underscores the roles that women have played as agents of change. Moving women's lives from the margins of history into the spotlight, the text draws links between women's experience and traditional facets of history, such as colonization, industrialization, politics, and war. This new edition grapples with emerging themes and debates in the field. A new chapter covers the Civil War and emancipation. Discussions of current issues include the COVID-19 pandemic and its impact on women's health and work, the #MeToo movement, transgender activism, reproductive rights, and the ERA. Updated suggestions for further reading reinforce evolving trends in women's history. Used often to shape college curricula and revised to include recent research, this book is designed to serve students, teachers, and general readers concerned with U.S. history and women's past.

*Women and The American Experience, A Concise History* Nancy Woloch, 2001-07-23 The 2d edition of this concise history has been revised to incorporate continuing research in the fast-growing field of Women's History. Additions to the text

include an exploration of women's experiences and roles in various ethnic groups as well as three new sections: The Trans-Mississippi West, Migrants and Immigrants and Women and the Law. Woloch's lucid, lively and thorough survey retains the same comprehensive style that has made it the best-selling narrative text in American Women's History.

*The Practice of Everyday Life* Michel de Certeau, 1984 Michel de Certeau considers the uses to which social representation and modes of social behavior are put by individuals and groups, describing the tactics available to the common man for reclaiming his own autonomy from the all-pervasive forces of commerce, politics, and culture. In exploring the public meaning of ingeniously defended private meanings, de Certeau draws on an immense theoretical literature in analytic philosophy, linguistics, sociology, semiology, and anthropology--to speak of an apposite use of imaginative literature.

*You Are Not So Smart* David McRaney, 2011-10-27 An entertaining illumination of the stupid beliefs that make us feel wise, based on the popular blog of the same name. Whether you're deciding which smartphone to purchase or which politician to believe, you think you are a rational being whose every decision is based on cool, detached logic. But here's the truth: You are not so smart. You're just as deluded as the rest of us—but that's okay, because being deluded is part of being human. Growing out of David McRaney's popular blog, *You Are Not So Smart* reveals that every decision we make, every thought we contemplate, and every emotion we feel comes with a story we tell ourselves to explain them. But often these stories aren't true. Each short chapter—covering topics such as Learned Helplessness, Selling Out, and the Illusion of Transparency—is like a psychology course with all the boring parts taken out. Bringing together popular science and psychology with humor and wit, *You Are Not So Smart* is a celebration of our irrational, thoroughly human behavior.

**Confronting Consumption** Thomas Princen, Michael Maniates, Ken Conca, 2002-06-21 Comforting terms such as sustainable development and green production frame environmental debate by stressing technology (not green enough), economic growth (not enough in the right places), and population (too large). Concern about consumption emerges, if at all, in benign ways; as calls for green purchasing or more recycling, or for small changes in production processes. Many academics, policymakers, and journalists, in fact, accept the economists' view of consumption as nothing less than the purpose of the economy. Yet many people have a troubled, intuitive understanding that tinkering at the margins of production and purchasing will not put society on an ecologically and socially sustainable path. *Confronting Consumption* places consumption at the center of debate by conceptualizing the consumption problem and documenting diverse efforts to confront it. In Part 1, the book frames consumption as a problem of political and ecological economy, emphasizing core concepts of individualization and commoditization. Part 2 develops the idea of distancing and examines transnational chains of consumption in the context of economic globalization. Part 3 describes citizen action through local currencies, home power, voluntary simplicity, ad-busting, and product certification. Together, the chapters propose cautious consuming and better producing as an activist and policy response to environmental problems. The book concludes that confronting

consumption must become a driving focus of contemporary environmental scholarship and activism.

**The Innovation Stack** Jim McKelvey,2020-03-10 From the cofounder of Square, an inspiring and entertaining account of what it means to be a true entrepreneur and what it takes to build a resilient, world-changing company In 2009, a St. Louis glassblowing artist and recovering computer scientist named Jim McKelvey lost a sale because he couldn't accept American Express cards. Frustrated by the high costs and difficulty of accepting credit card payments, McKelvey joined his friend Jack Dorsey (the cofounder of Twitter) to launch Square, a startup that would enable small merchants to accept credit card payments on their mobile phones. With no expertise or experience in the world of payments, they approached the problem of credit cards with a new perspective, questioning the industry's assumptions, experimenting and innovating their way through early challenges, and achieving widespread adoption from merchants small and large. But just as Square was taking off, Amazon launched a similar product, marketed it aggressively, and undercut Square on price. For most ordinary startups, this would have spelled the end. Instead, less than a year later, Amazon was in retreat and soon discontinued its service. How did Square beat the most dangerous company on the planet? Was it just luck? These questions motivated McKelvey to study what Square had done differently from all the other companies Amazon had killed. He eventually found the key: a strategy he calls the Innovation Stack. McKelvey's fascinating and humorous stories of Square's early days are blended with historical examples of other world-changing companies built on the Innovation Stack to reveal a pattern of ground-breaking, competition-proof entrepreneurship that is rare but repeatable. The Innovation Stack is a thrilling business narrative that's much bigger than the story of Square. It is an irreverent first-person look inside the world of entrepreneurship, and a call to action for all of us to find the entrepreneur within ourselves and identify and fix unsolved problems--one crazy idea at a time.

Cooking through History Melanie Byrd,John P. Dunn,2020-12-02 From the prehistoric era to the present, food culture has helped to define civilizations. This reference surveys food culture and cooking from antiquity to the modern era, providing background information along with menus and recipes. Food culture has been central to world civilizations since prehistory. While early societies were limited in terms of their resources and cooking technology, methods of food preparation have flourished throughout history, with food central to social gatherings, celebrations, religious functions, and other aspects of daily life. This book surveys the history of cooking from the ancient world through the modern era. The first volume looks at the history of cooking from antiquity through the Early Modern era, while the second focuses on the modern world. Each volume includes a chronology, historical introduction, and topical chapters on foodstuffs, food preparation, eating habits, and other subjects. Sections on particular civilizations follow, with each section offering a historical overview, recipes, menus, primary source documents, and suggestions for further reading. The work closes with a selected, general bibliography of

resources suitable for student research.

Tombstone's Treasure Sherry Monahan,2010-11-23 Sherry Monahan is an authority on the city that wouldn't die and its history. In *Tombstone's Treasure*, she focuses on the silver mines, one reason for the city's founding, and the saloons, the other reason the city grew so quickly. When the discovery of silver at Tombstone first became known in mid-1880, there were about twenty-six saloons and breweries. By July of the following year, the number of saloons in Tombstone had doubled. The most popular saloon games of the time were faro, monte, and poker, with some offering keno, roulette, and twenty-one. Monahan shares true tales about Tombstone's mining and gambling history and describes a different time and locale where wealthy businesspeople and rugged miners rubbed elbows at the bar and gambled side by side. It is both shocking and enlightening to learn just how sophisticated Tombstone really was when the Earps, Doc Holliday, Johnny Ringo, and Curly Bill strode the boardwalks. Tombstone actually had telephones, ice cream parlors, coffee shops, a bowling alley, and a swimming pool. Wow! It is so contrary to the Hollywood version of the town . . . but it's absolutely true.--from the Foreword by Bob Boze Bell Read Sherry Monahan's interview on AMC on the Wild West and the film *Wild Bill*

Cakes & Ale Edward Spencer,2024-01-01 *Cakes & Ale*, penned by way of the renowned creator Edward Spencer, is a literary traditional that intricately weaves a tale around the complexities of human relationships, societal expectancies, and the arena of literature. Set towards the backdrop of the English literary scene inside the early twentieth century, the novel follows the attitude of William Ashenden, a creator reflecting on the existence of his past due buddy, the eccentric writer Edward Driffield. Edward Spencer narrative skillfully explores the nuances of inventive integrity and the exceptional line among truth and fiction, presenting a satirical but poignant statement on the cultural elite. Through brilliant characters and a undying exploration of the human circumstance, *Cakes & Ale* stays a compelling examination of the picks people make of their pursuit of achievement, authenticity, and the enduring impact of 1's legacy. With Edward Spencer signature combination of wit and insight, the novel continues to captivate readers, supplying a profound and thought-frightening adventure into the world of literature and the intricacies of the human spirit.

**Contending Economic Theories** Richard D. Wolff,Stephen A. Resnick,2012-09-07 A systematic comparison of the 3 major economic theories—neoclassical, Keynesian, and Marxian—showing how they differ and why these differences matter in shaping economic theory and practice. *Contending Economic Theories* offers a unique comparative treatment of the three main theories in economics as it is taught today: neoclassical, Keynesian, and Marxian. Each is developed and discussed in its own chapter, yet also differentiated from and compared to the other two theories. The authors identify each theory's starting

point, its goals and foci, and its internal logic. They connect their comparative theory analysis to the larger policy issues that divide the rival camps of theorists around such central issues as the role government should play in the economy and the class structure of production, stressing the different analytical, policy, and social decisions that flow from each theory's conceptualization of economics. Building on their earlier book *Economics: Marxian versus Neoclassical*, the authors offer an expanded treatment of Keynesian economics and a comprehensive introduction to Marxian economics, including its class analysis of society. Beyond providing a systematic explanation of the logic and structure of standard neoclassical theory, they analyze recent extensions and developments of that theory around such topics as market imperfections, information economics, new theories of equilibrium, and behavioral economics, considering whether these advances represent new paradigms or merely adjustments to the standard theory. They also explain why economic reasoning has varied among these three approaches throughout the twentieth century, and why this variation continues today—as neoclassical views give way to new Keynesian approaches in the wake of the economic collapse of 2008.

*The Chicago Food Encyclopedia* Carol Haddix, Bruce Kraig, Colleen Taylor Sen, 2017-08-16 The Chicago Food Encyclopedia is a far-ranging portrait of an American culinary paradise. Hundreds of entries deliver all of the visionary restaurateurs, Michelin superstars, beloved haunts, and food companies of today and yesterday. More than 100 sumptuous images include thirty full-color photographs that transport readers to dining rooms and food stands across the city. Throughout, a roster of writers, scholars, and industry experts pays tribute to an expansive--and still expanding--food history that not only helped build Chicago but fed a growing nation. Pizza. Alinea. Wrigley Spearmint. Soul food. Rick Bayless. Hot Dogs. Koreatown. Everest. All served up A-Z, and all part of the ultimate reference on Chicago and its food.

**Liquid Life** Rachel Armstrong, 2019 If we lived in a liquid world, the concept of a machine would make no sense. Liquid life is metaphor and apparatus that discusses the consequences of thinking, working, and living through liquids. It is an irreducible, paradoxical, parallel, planetary-scale material condition, unevenly distributed spatially, but temporally continuous. It is what remains when logical explanations can no longer account for the experiences that we recognize as part of being alive. *Liquid Life* references a third-millennial understanding of matter that seeks to restore the agency of the liquid soul for an ecological era, which has been banished by reductionist, brute materialist discourses and mechanical models of life. Offering an alternative worldview of the living realm through a new materialist and liquid study of matter, Armstrong conjures forth examples of creatures that do not obey mechanistic concepts like predictability, efficiency, and rationality. With the advent of molecular science, an increasingly persuasive ontology of liquid technologies can be identified. Through the lens of lifelike dynamic droplets, the agency for these systems exists at the interfaces between different fields of matter/energy that respond to highly local effects, with no need for a central organizing system. *Liquid Life* seeks an alternative partnership between humanity and the natural world. It provokes a re-invention of the languages of the living

realm to open up alternative spaces for exploration, including contributor Rolf Hughes' angelology of language, which explores the transformative invocations of prose poetry, and Simone Ferracina's graphical notations that help shape our concepts of metabolism, upcycling, and designing with fluids. A conceptual and practical toolset for thinking and designing, liquid life reunites us with the irreducible soul substance of living things, which will neither be simply solved, nor go away.

**Mrs. Earp** Sherry Monahan, 2013-12-03 When most people hear the name Earp, they think of Wyatt, Virgil, Morgan, and sometimes the lesser known James and Warren. They also had a half-brother named Newton, who lived a fairly quiet, uneventful life. While it's true these men made history on their own, they all had a Mrs. Earp behind them—some more than one. The Earp men, starting with the patriarch of the Earp clan, Nicholas Porter Earp, did not like being alone. Nicholas Earp was married three times, with his last marriage being at the age of 80 his bride being 53. Three of his sons would follow their father's lead and marry more than once. It's also possible these Earp brothers had additional brides or lovers that have yet to be discovered! One could argue some of these women helped shape the future of the Earp brothers and may have even been the fuel behind some of the fires they encountered. This book collectively traces the lives of the women who shared the title of Mrs. Earp either by name or relationship. The name Earp has stirred up many a historical controversy over the years, from false photos to false accounts and so much more. With any history, there is bound to be controversy simply because it can be a jigsaw puzzle.
