Owning Land, Being Women enquires into the processes that establish inheritance as a unique form of property relation in law and society. It focuses on India, examining the legislative processes that led to the 2005 amendment of the Hindu Succession Act 1956, along with several interconnected welfare policies. Scholars have understood these Acts as a response to growing concerns about women's property rights in developing countries. In re-reading these Acts and exploring the wider nexus of Indian society in which the legislation was drafted, this study considers how questions of family structure and property rights contribute to the creation of legal subjects and demonstrates the significance of the politico-economic context of rights formulation. On the basis of an ethnography of a village in West Bengal, this book brings the moral axis of inheritance into sharp focus, elucidating the interwoven dynamics of bequest, distribution of family wealth and reciprocity of care work that are integral to the logic of inheritance. It explains why inheritance rights based on the notion of individual property rights are inadequate to account for practices of inheritance. Mondal shows that inheritance includes normative structures of affective attachment and expectations, i.e., evaluatively-charged imaginaries of the future that coordinate present practices. These insights pose questions of the dominant resource-based conceptualisation of inherited property in the debate on women's empowerment. In doing so, this work opens up a line of investigation that brings feminist rights discourse into conversation with ethics, enriching the liberal theory of gender justice.

The last decades have seen a lively interest in Roman verse satire, and this collection of essays introduces the reader to the best of modern critical writing on Persius and Juvenal. The eight articles on Persius range from detailed analyses of his fine technique to readings inspired by theoretical approaches such as New Historicism, Reader-Response Criticism, and Dialogics. The nine selections on Juvenal focus upon the pivotal question in modern Juvenalian criticism: how serious is the poet when he voices his appallingly misogynist, homophobic, and xenophobic moralism? The contributors challenge the straightforward equivalence of author and speaker in a variety of ways, and they also point up the technical aspects of Juvenal's art. Three papers have been newly translated for this volume, and all Latin quotations are also given in English. A specially written Introduction provides a useful conspectus of recent scholarship.

The importance of the polis in Homeric literature is most evident in the Iliad, a poem concerned in large measure with the holy city of Troy. Stephen Scully here deepens our understanding of both the poetic and the social significance of the city in Homer through a close analysis of the poem's formulaic language. Drawing on scholarship in literary studies, archaeology, and comparative religion, Scully demonstrates that it is the urban setting of the Iliad, as well as the collision of the individual fates of its characters, which generates its most profound tragic themes.

Die vorliegende Studie liefert ein Panorama der deutsch-italienischen musikalischen Landschaft zwischen 1750 und 1830. Haydn, Mozart und Beethoven haben sich in unterschiedlicher Weise, jedoch gründlich mit der Musiknation Italien auseinandergesetzt: Der italienischen Präponderanz vokaler Komposition setzt Wien den Schwerpunkt instrumentalen Musizierens entgegen, wobei beide Seiten voneinander lernen und profitieren. Insbesondere Bianchi, Clementi, Jommelli und Boccherini stehen auf der italienischen Seite des Dialogs und im Blickpunkt dieses Buches. Die Beiträge erhellen exemplarisch die Verhältnisse auf den Gebieten der Satz- und Besetzungstechnik, der vokalen und instrumentalen Gattungstraditionen, der Quellensituation und der Aufführungsgeschichte.
