The first objective of this study is to derive a multidimensional research framework simultaneously outlining and concretising particular aspects being relevant to and surrounding the elicitation and evaluation of VLE design characteristics. Based on this, the second objective of this study is to elicit for the first time a holistic set of well-defined, simultaneously detailed and operative VLE design characteristics systematically. In reply to a recently articulated call for research (Venkatesh & Bala, 2008), the third objective of this study is to evaluate for the first time the impact of the desired set of VLE design characteristics to be elicited on crucial behavioural determinants of users' behavioural intention to use and actual use of a VLE in terms of the VLE success measures of this study. Such an investigation may reveal further, more detailed and operative, knowledge about design-related and behavioural drivers of users' current VLE use/refusal.

Millions of users create and share Excel spreadsheets every day, but few go deeply enough to learn the techniques that will make their work much easier. There are many ways to take advantage of Excel's advanced capabilities without spending hours on advanced study. Excel Hacks provides more than 130 hacks -- clever tools, tips and techniques -- that will leapfrog your work beyond the ordinary. Now expanded to include Excel 2007, this resourceful, roll-up-your-sleeves guide gives you little known "backdoor" tricks for several Excel versions using different platforms and external applications. Think of this book as a toolbox. When a need arises or a problem occurs, you can simply use the right tool for the job. Hacks are grouped into chapters so you can find what you need

quickly, including ways to: Reduce workbook and worksheet frustration -- manage how users interact with worksheets, find and highlight information, and deal with debris and corruption. Analyze and manage data -- extend and automate these features, moving beyond the limited tasks they were designed to perform. Hack names -- learn not only how to name cells and ranges, but also how to create names that adapt to the data in your spreadsheet. Get the most out of PivotTables -- avoid the problems that make them frustrating and learn how to extend them. Create customized charts -- tweak and combine Excel's built-in charting capabilities. Hack formulas and functions -- subjects range from moving formulas around to dealing with datatype issues to improving recalculation time. Make the most of macros -- including ways to manage them and use them to extend other features. Use the enhanced capabilities of Microsoft Office 2007 to combine Excel with Word, Access, and Outlook. You can either browse through the book or read it from cover to cover, studying the procedures and scripts to learn more about Excel. However you use it, Excel Hacks will help you increase productivity and give you hours of "hacking" enjoyment along the way. input, but it is been necessary that I can analyse that data and crunch it. On top of this, I also produce visual communication material for our clients, so I am often asked to take data and reformat it into a way that is visually pleasing. While a lot of times this involves going into applications like Photoshop or After Effects to create animation, often it starts inside of Excel. The skills acquired from this version are mostly applicable to newer versions of Excel. If you think that Microsoft Excel is only for business purposes, you are wrong. Many use it for various personal needs at home too. Some of the features that you should understand about Microsoft Excel to unlock the potentiality of this application are working with spreadsheets, cell formatting, various menus and toolbars, entering of data and editing the same, navigating between various spreadsheets, formula calculation, inserting various functions like date/time, mathematical functions, using of various charts that are available, inserting, editing and deleting comments on cells, etc. Computer Based Training (CBT) is a way to master MS Excel. This is where you take your own time to master the application. With the help of CBT, you get realistic, interactive and complete training. You get to learn right from what a beginner should learn to advanced level. Once the training is over, you would have mastered Microsoft Excel. You get to see simulations of Microsoft Excel application software. Some CBT also offer review quiz questions to gauge your understanding. CBT generally offer interactive, complete and comprehensive training. As it offers practice questions, you will be able to understand better and gain confidence in using the application. According to me, this is one of the best ways to learn Microsoft Excel. The concept of spreadsheeting has been around for hundreds of years. The process can be described as the ability to arrange numbers, characters and other objects into rows and columns. It is most common that spreadsheets only contain numbers and text.

The software version of spreadsheeting basically takes the manual processes described above and puts them into an electronic format. Whilst the accounting industry which most commonly uses spreadsheets they can be used in any situation.

Information and Communication Technology (ICT) is an extended term for Information Technology (IT) which stresses the role of unified communications. The term ICT is also used to refer to the convergence of audio-visual and telephone networks with computer networks through a single cabling or link system. There are large economic incentives (huge cost savings due to elimination of the telephone network) to merge the telephone network with the computer network system using a single unified system of cabling, signal distribution and management. However, ICT has no universal definition, as "the concepts, methods and applications involved in ICT are constantly evolving on an almost daily basis". The broadness of ICT covers any product that will store, retrieve, manipulate, transmit or receive information electronically in a digital form, e.g. personal computers, digital television, email, robots. For clarity, Zuppo provided an ICT hierarchy where all levels of the hierarchy "contain some degree of commonality in that they are related to technologies that facilitate the transfer of information and various types of electronically mediated communications". Skills Framework for the Information Age is one of many models for describing and managing competencies for ICT professionals for the 21st century. Physical education, also known as Phys Ed., PE, Gym or Gym class, and known in many Commonwealth countries as physical training or PT, is an educational course related of maintaining the human body through physical exercises (i.e. calisthenics). It is taken during primary and secondary education and encourages psychomotor learning in a play or movement exploration setting to promote health. Information and
