Building on their breakthrough bestsellers Lean Software Development and Implementing Lean Software Development, Mary and Tom Poppendieck's latest book shows software leaders and team members exactly how to drive high-value change throughout a software organization—and make it stick. They go far beyond generic implementation guidelines, demonstrating exactly how to make lean work in real projects, environments, and companies. The Poppendiecks organize this book around the crucial concept of frames, the unspoken mental constructs that shape our perspectives and control our behavior in ways we rarely notice. For software leaders and team members, some frames lead to long-term failure, while others offer a strong foundation for success. Drawing on decades of experience, the authors present twenty-four frames that offer a coherent, complete framework for leading lean software development. You'll discover powerful new ways to act as competency leader, product champion, improvement mentor, front-line leader, and even visionary. Systems thinking: focusing on customers, bringing predictability to demand, and revamping policies that cause inefficiency Technical excellence: implementing low-dependency architectures, TDD, and evolutionary development processes, and promoting deeper developer expertise Reliable delivery: managing your biggest risks more effectively, and optimizing both workflow and schedules Relentless improvement: seeing problems, solving problems, sharing the knowledge Great people: finding and growing professionals with purpose, passion, persistence, and pride Aligned leaders: getting your entire leadership team on the same page From the world's number one experts in Lean software development, Leading Lean Software Development will be indispensable to everyone who wants to transform the promise of lean into reality—in enterprise IT and software companies alike.

The book examines the history and development of public administration, the study of the internal structure and functioning of government and its interaction with society and its citizens. It surveys different approaches to the field and the methodological and epistemological issues surrounding an interdisciplinary, applied social science.

One hundred of hilarious and funny jokes ! Have fun and laugh!

Spurned by his father and driven from his home, Stone Hillyard is struggling to find shelter in the Michigan winter when he lucks upon the horse farm run by Geoff Laughton and his partner Eli. They take him in, warm him up, and give him a job working with their No Boundaries therapy riding program. A drunk driver left Preston Harding unable to walk, and after months of hard work, his therapist recommends Geoff and Eli's program. But Preston's anger and arrogance nearly get him kicked out until Stone intercedes on his behalf, despite Preston's insults. It's a small act of kindness that helps open Preston's eyes. Stone and Preston will support each other as they face their families' disapproval and fight old secrets. They'll learn—sometimes the hard way—just how love can mean freedom for them both.

Ever since the publication of 'Truth' in 1959 Sir Michael Dummett has been acknowledged as one of the most profoundly creative and influential of contemporary philosophers. His contributions to the philosophy of thought and language, logic, the philosophy of mathematics, and metaphysics have set the terms of some of most fruitful discussions in philosophy. His work on Frege stands unparalleled, both as landmark in the history of philosophy and as a deep reflection on the defining commitments of the analytic school. This volume of specially composed essays on Dummett's philosophy presents a new perspective on his achievements, and provides a focus for further research fully informed by the Dummett's most recent publications. Collectively the essays in philosophy of mathematics provide the most sustained discussion to date of the role of Dummett's diagnosis of the root of the logico-mathematical paradoxes in his case for an intuitionist revision of classical mathematics. The themes of other essays include a fundamental challenge to Dummett's Fregean understanding of predication, and a criticism of his case for logical revision outside of mathematics.

The Indus region, comprising the northwestern part of the Indian subcontinent (now Pakistan), has always had its distinct identity - racially, ethnically, linguistically and culturally. In the last five thousand years, this region has been a part of India, politically, for only five hundred years. Pakistan, then, is no 'artificial' state conjured up by the disaffected Muslim elite of British India. Aitzaz Ahsan surveys the history of Indus - as he refers to this region - right from the time of the Harappan civilization to the era of the British Raj, concluding with independence and the creation of Pakistan. Ahsan's message is aimed both at Indians still nostalgic about 'undivided' India and their Pakistani compatriots who narrowly tend to define their identity by their 'un-Indianness'.

In this remarkable book, Carl Verheyen teaches his philosophy and techniques for improvising. Rather than hashing out scales, Carl teaches how to play lines with strong melodic content. By approaching

melodies through intervals and chord qualities, infinite lines can be generated. Carl stresses the importance of collecting lines that can be used in improvised settings. These lines and examples will provide outstanding material for any guitarist yearning for melodic ideas and inspiration. Presented in standard notation and tab.

The bestselling book revealing why Americans are so fearful, and why we fear the wrong things--now updated for the age of Trump In the age of Trump, our society is defined by fear. Indeed, three out of four Americans say they feel more fearful today than they did only a couple decades ago. But are we living in exceptionally perilous times? In his bestselling book *The Culture of Fear*, sociologist Barry Glassner demonstrates that it is our perception of danger that has increased, not the actual level of risk. Glassner exposes the people and organizations that manipulate our perceptions and profit from our fears: politicians who win elections by heightening concerns about crime and drug use even as rates for both are declining; advocacy groups that raise money by exaggerating the prevalence of particular diseases; TV shows that create a new scare every week to garner ratings. Glassner spells out the prices we pay for social panics: the huge sums of money that go to waste on unnecessary programs and products as well as time and energy spent worrying about our fears. All the while, we are distracted from the true threats, from climate change to worsening inequality. In this updated edition of a modern classic, Glassner examines the current panics over vaccination and "political correctness" and reveals why Donald Trump's fearmongering is so dangerously effective.

CHILI HOT GMAT MATH REVIEW will help readers develop the skills and mindset needed to score high on the quantitative section of the GMAT exam. Each hand-selected problem comes with a Classification, Snapshot, and Chili Rating. Classification serves to identify each problem according to category or sub-category. Snapshot highlights why that particular problem was chosen, including the underlying problem-solving principle or strategic approach. Chili Rating helps candidates gauge the estimated difficulty level of a given problem. A single chili indicates that the estimated difficulty level of a given problem is "mild" (500 to 590 difficulty level), two chilies spell "hot" (600 to 690 difficulty level), and three chilies signal "very hot" (700 or above difficulty level). By studying problems of varying difficulty, candidates will learn to maintain discipline on easy but tricky math problems and also to exercise flexibility when deciding on multiple approaches and time-saving shortcuts for use in tackling harder, more involved problems. Note to readers: This book contains the excerpted math sections from the parent title "*Chili Hot GMAT: 200 All-Star Problems to Get You a High Score on Your GMAT Exam.*"

This clear and lively introduction to probability theory concentrates on the results that are the most useful for applications, including combinatorial probability and Markov chains. Concise and focused, it is designed for a one-semester introductory course in probability for students who have some familiarity with basic calculus. Reflecting the author's philosophy that the best way to learn probability is to see it in action, there are more than 350 problems and 200 examples. The examples contain all the old standards such as the birthday problem and Monty Hall, but also include a number of applications not found in other books, from areas as broad ranging as genetics, sports, finance, and inventory management.

De tragische gebeurtenissen in Rwanda, Srebrenica en Kosovo hebben geleid tot een herbezinning over de rol en verantwoordelijkheid van de internationale gemeenschap. In het beginsel Responsibility to Protect (R2P), dat in 2005 door de wereldleiders werd oarmrd, hebben individuele staten nog steeds de primaire verantwoordelijkheid voor de bescherming van hun inwoners. Maar als ze die verantwoordelijkheid niet kunnen of willen nemen, komt de verantwoordelijkheid bij de internationale gemeenschap te liggen. R2P heeft de ambitie om herhaling van Rwanda, Srebrenica en Kosovo te voorkomen, maar er bestaat nog grote onduidelijkheid over inhoud en potentieel van dit beginsel. Deze bundel verkent R2P als moreel, politiek en juridisch beginsel en onderzoekt hoe de Verenigde Naties, de Europese Unie, individuele staten en NGO's R2P kunnen gebruiken om ernstige mensenrechtenschendingen te voorkomen.

This is a highly illustrated, personal account of Peter Aufschnaiter's eight-year sojourn in Tibet, characterized by his empathy for and understanding of Tibetan culture and enriched by his photographs and sketches. The text is a sensitive record of the Tibetans and their way of life and ends of the eve of the Chinese invasion that was to wreak such irreversible damage to this unique culture.

As the costs and resources of delivering health services have increased over the years, the importance of evaluating health services and interventions has become essential. An evaluation provides a systematic process of assessing the efficacy and efficiency of health services, including an assessment of their impact on beneficiaries, whether it be individuals or communities. Evaluation in the health sector includes the evaluation of burden disease where human and economic costs resulting from poor health are measured. In this book, various evaluation studies are detailed, providing an excellent resource for both evaluation practitioners and academics alike. The geographical range and variety of case studies showcase how evaluation has become integral for health service planning and assessment and to assist public health policy makers decide how to use limited resources to minimize burden and inequity. This book will act as a ready resource for both workers experienced in health service evaluation and those intending to learn about burden of disease of evaluation.

Prim and proper art gallery coordinator Elle Walser is no good at seducing men. Heck, she's been throwing hints at her boss for months, but he's completely clueless. Desperate to escape her mother's matchmaking efforts, she comes up with a plan—buy some lingerie and climb into her boss's bed. The plan goes brilliantly...until she accidentally seduces a sexy stranger instead. Bad boy nightclub mogul Gabe Schultz just had the best almost-sex of his life. Too bad the smoking hot blonde thought he was his brother and bolted before he could finish what they started. Though her holier-than-thou attitude puts a serious damper on his mood, Gabe's never been one to give up on something he wants. And he wants Elle. Now he just needs her to convince her to give him a chance... Palliative Nursing is an evidence-based practical guide for nurses working in areas of practice where general palliative care is provided. This may be in hospitals, nursing homes, dementia units, the community and any other clinical areas which are not classified as specialist palliative care. This book first explores the history and ethos of palliative care, and then looks at palliative nursing across various care settings. It then looks at palliative nursing care for people with specific illnesses, including heart failure, dementia, chronic obstructive pulmonary disease, cancer, and neurological conditions. Palliative care for children and young people is discussed, and then the book finally looks at education and research in palliative nursing. Palliative Nursing will be essential reading for all nurses working with palliative care patients in a non-specialist role, i.e. in hospitals, primary care and nursing homes, as well as nursing students. SPECIAL FEATURES Explores the palliative nursing issues related to specific disease groups Written in the context of the new national tools, i.e. the end of life initiative, preferred place of care, Liverpool care pathway and Gold standards framework. Each chapter includes practice points and cases to allow the practitioner to undertake guided reflection to improve practice Written by nurses for nurses Provides guidance for nurses working in all four countries of the UK
