Originally published in 1983, the principal object of this book is to discuss in detail the structure of finite group rings over fields of characteristic p , P -adic rings and, in some cases, just principal ideal domains, as well as modules of such group rings. The approach does not emphasize any particular point of view, but aims to present a smooth proof in each case to provide the reader with maximum insight. However, the trace map and all its properties have been used extensively. This generalizes a number of classical results at no extra cost and also has the advantage that no assumption on the field is required. Finally, it should be mentioned that much attention is paid to the methods of homological algebra and cohomology of groups as well as connections between characteristic 0 and characteristic p .

Making God Laugh follows one typical American family over the course of thirty years' worth of holidays. Starting in 1980, Ruthie and Bill's grown children -- a priest, an aspiring actress, and a former football star -- all return home, where we learn of their plans and dreams as they embark on their adult lives. The empty-nester parents contend with their own changes, too, as old family rituals are trotted out and ancient tensions flare up. As time passes, the family discovers that, despite what we may have in mind, we often arrive at unexpected destinations.

A plane carrying a supervirus searches for a place to land in this “combination of The Hot Zone and Speed” by a New York Times–bestselling author (USA Today). On a snowy road in a German forest, Ernest Helms sees a man trying to break into his car. After a scuffle, Helms escapes with only a cut on his hand. Hours later, he collapses aboard a flight from Frankfurt to New York. The pilot, Capt. James Holland, radios London to plan an emergency landing to save Helms—and then the nightmare begins. Heathrow denies Holland permission to land: Helms has been stricken with an ultracontagious pathogen that threatens the entire planet. When Germany also refuses to let him land, Holland and his passengers are prisoners of the sky, caught between a deadly disease and a world that would rather shoot them down than risk contamination. Written by a former aviator known as the master of mile-high suspense, this is a pulse-pounding thriller about infectious disease in the tradition of *Outbreak* and *The Andromeda Strain*. Threatened by hostile governments on the ground and disease in the sky, Captain Holland is in for the flight of his life.

Thesis (M.A.) from the year 2004 in the subject Business economics - Investment and Finance, grade: 1 (A), University of Graz (Institute fur Industrial Economics), 99 entries in the bibliography, language: English, abstract: This Master Thesis gives an overview of the research into the efficient market hypothesis from its first days in the 1950s to the present. "You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, *The Lonely City* is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--
Fast on the heels of the New York Times bestseller *The Book of General Ignorance* comes *The Book of Animal Ignorance*, a fun, fact-filled bestiary that is sure to delight animal lovers everywhere. Arranged alphabetically from aardvark to worm, here are one hundred of the most interesting members of the animal kingdom explained, dissected, and illustrated, with the trademark wit and wisdom of John Lloyd and John Mitchinson. Did you know, for instance, that • when a young albatross takes wing, it

may stay aloft for ten years • vampire bat saliva—unsurprisingly, when you think about it—is the source of the world’s most powerful blood thinning drug, appropriately called draculin • bombardier beetles fire a boiling chemical spray out of their rears at 300 pulses per second • a bald eagle’s feathers weigh twice as much as its bones • a giant tortoise recently died at the documented age of 255 • octopuses are dexterous enough to unscrew tops from jars • spider silk is so light that a strand long enough to circle the world would weigh as much as a bar of soap? So meet the water bears that can live in suspension for hundreds of years, the parasite carried by your cat that makes men grumpy and women promiscuous, and the woodlouse that drinks through its bottom. Marvel at elephants that walk on tiptoe, pigs that shine in the dark, and woodpeckers that have ears on the ends of their tongues. If you still think a pangolin is a musical instrument, that hyenas are dogs, or that sheep are pointless and stupid, *The Book of Animal Ignorance* has arrived just in time.

Without clearly outlined budgets, corporations are unable to predict profits or losses or create plans for the future. This handbook shows controllers and budget directors how to create any style of budget, from the traditional approach to the cutting-edge, activity-based approach. No other management tool provides the operational direction that a well-planned budget does, and no other book provides such a complete guide to preparation, presentation, analysis, and effective use. This book is supplemented annually.
