The region encompassing Afghanistan and Pakistan (Af/Pak region) is undergoing a fundamental strategic change. This book analyses the nature of this strategic change, in order to seek possible future scenarios and to examine policy options. It also undertakes a critical review of the basic elements of the Western strategic approach towards dealing with regional conflicts in all parts of the world, with special emphasis on the Af/Pak region. Dealing with the political developments in one of the most volatile regions in the world – Afghanistan and Pakistan – the volume focuses on Western strategic concerns. The withdrawal of ISAF by 2014 will change the overall political setting and the work addresses the challenges that will result for Western policymakers thereafter. It examines the cases of Afghanistan and Pakistan separately, and also looks at the broader region and tries to identify different outcomes. This book will be of much interest to students of Central and South Asian politics, strategic studies, foreign policy and security studies generally.

Management system standards have been adopted by millions of organizations around the world. With such widespread use, comes many questions on not only the standards themselves, but how to use them, and for those considering multiple standards, how to maximize and leverage their common features. In *Integrated Management Systems: Leading Strategies and Solutions*, the authors use their wealth of knowledge and practical experience in Health Safety, Environment and Quality Management System (HSEQ) Standards to profile

how best to use and integrate these management system standards into your day to day operations and business models.

Now that information has become the lifeblood of your organization, you must be especially vigilant about assuring it. The hacker, spy, or cyber-thief of today can breach any barrier if it remains unchanged long enough or has even the tiniest leak. In *Information Assurance Architecture*, Keith D. Willett draws on his over 25 years of technical, security, and business experience to provide a framework for organizations to align information assurance with the enterprise and their overall mission. *The Tools to Protect Your Secrets from Exposure* This work provides the security industry with the know-how to create a formal information assurance architecture that complements an enterprise architecture, systems engineering, and the enterprise life cycle management (ELCM). *Information Assurance Architecture* consists of a framework, a process, and many supporting tools, templates and methodologies. The framework provides a reference model for the consideration of security in many contexts and from various perspectives; the process provides direction on how to apply that framework. Mr. Willett teaches readers how to identify and use the right tools for the right job. Furthermore, he demonstrates a disciplined approach in thinking about, planning, implementing and managing security, emphasizing that solid solutions can be made impenetrable when they are seamlessly integrated with the whole of an enterprise. *Understand the Enterprise Context* This book covers many information assurance subjects, including disaster recovery and firewalls. The objective is to present security services and security mechanisms in the context of information assurance architecture, and in an enterprise context of managing business risk. Anyone who utilizes the concepts taught in these pages will find them to be a valuable weapon in the

arsenal of information protection.

The composites industry employs a method of high speed continuous reinforcement lay-down called filament winding. This is a process where resin impregnated tows, bundles of filament, are wound over a rotating mandrel. The tows, hereafter referred to as filament, are laid down over the rotating mandrel at a prescribed wind angle. Consider a cylindrical filament winding mandrel with conical features such that the filament is tangent to both the cylinder and the cone simultaneously. A gap is formed between the points of tangency. The gap distance measured along a line normal to the filament and intersecting the mandrel's axis of rotation. The maximum distance occurs between the filament and a point on the intersection of the cylinder and the cone. The problems this paper addresses are: given a cylindrical filament winding mandrel with conical features, what is the gap size for a given wind angle; conversely what is the wind angle for a given gap size; and what does the geometry need to be in the mandrel transition area between the cylinder cone such that the filament remains in contact with the mandrel at all times?

Here are the results of an audit of the FAA's mgmt. and maint. of air traffic control facilities. The FAA has invested billions of dollars in new equipment for handling increasingly higher levels of air traffic in more complex airspace. However, the facilities that house those systems are deteriorating. As FAA begins implementing plans for the Next Generation Air Transp. System, it will be critical to determine the type and number of facilities that will be needed to support the envisioned architecture. This audit determined if FAA has: (1) developed and implemented a comprehensive strategy to effectively manage the replacement, repair, and modernization of its air traffic control facilities; and (2) allocated sufficient funds to carry out those activities. Today's project managers find themselves in the dual roles of technical expert and business leader. As project management has evolved, the need has emerged for an organizational entity to manage complexities and ensure alignment with business interests. A project management office (PMO) coordinates technical and business facets of project management and achieves the goals of oversight, control, and support within the project management

environment. The Complete Project Management Office Handbook identifies the PMO as the essential business integrator of the people, processes, and tools that manage or influence project performance. This book details how the PMO applies professional project management practices and successfully integrates business interests with project goals, regardless of whether the scope of the PMO is limited to managing specific projects or expanded to the level of a full business unit. People at all levels of the project and business spectrum will benefit from this volume. The Handbook focuses on how to establish PMO functionality to meet the requirements of project stakeholders. It presents 20 pertinent PMO function models, providing guidance for developing PMO operating capability that is applicable to any organization. It also presents these functions relative to five stages of progressive PMO development along a competency continuum, demonstrating potential PMO growth from simple project control up through its alignment within a strategic business framework.

The global economic downturn marked a critical crossroad for the sales profession.

This event dramatically altered the consumer landscape and forever changed the sales model required to successfully navigate it. Today, consumers are more skeptical, price conscious, product savvy and pressure resistant than at any other time in history. They don't want to be "cold called", "up sold", or "hard sold". They don't want to be "trial closed", "tie-down closed" or "Columbo closed". They don't want "loss leaders", "red herrings" or "high pressure". These old school tactics have no place in this new consumer landscape. A fresh new "partnership" approach to selling has officially trumped the old "salesmanship" approach of years past. This book represents the transition point of the sales profession by introducing you to the "Gap Analysis Sales Model", a fresh new client-centric approach to selling that puts the client's need above all else. Bridging the SELLING Gap is three books in one: In Part 1 you'll learn how to accelerate your selling success by mastering the first phase of the Gap Analysis Sales Model -- ASSESSMENT. In this part of the book, you will discover exactly what questions to ask to fully uncover the gap between two reference points: 1. Your client's current reality condition, and 2. Your client's desired reality outcome. After all the difference between these two points constitutes the problem to which your product (or service) offering represents the solution. You'll also learn how to identify your prospect's "engagement profile" so that you'll understand what he or she needs to hear, see and know to support a favorable buying decision. In Part 2 you'll learn how to accelerate your success by mastering the second phase of the Gap Analysis Sales Model --

PRESENTATION. In fact, everything you do that opens doors and closes deals comes down to your ability to communicate yourself and your product or service offering in a way that compels your client to take action. In this part of the book you will learn how to tailor your content, structure your message and strengthen your delivery. In Part 3 you'll learn how to accelerate your success by mastering the third phase of the Gap Analysis Sales Model -- **NEGOTIATION.** It is important to know that there are only three reasons why a transaction will falter once it enters the negotiation phase. In this part of the book you will discover what these three potential deal breakers are, how to recognize them and more importantly, how to respond to them when encountered. As a point of fact, your professional success is a direct reflection of your competence in assessing client needs, presenting product (or service) solutions and negotiating collaborative outcomes. After all, this represents the value you bring to your profession and the more competent you are, the more sales success you'll experience. It's as simple as that! The Gap Analysis Sales Model is helping sales professionals "bridge their success gap" at a global level. Gerald G. Clerx is an internationally respected sales trainer who has accelerated the success of over 80,000 sales professionals from around the world, many of them now earning over 2 million dollars annually. Entire offices have reportedly "doubled their success rate", leaving their competitors in the dust, the moment they began applying the skills and insights taught in his training series. Now for the first time ever, he shares the Gap Analysis Sales Model in this landmark book. **READ IT AND**

This IBM® Redbooks® publication explains how to combine business process management (BPM) and Enterprise Architecture (EA) for better business outcomes. This book provides a unique synergistic approach to BPM and EA, based on a firm understanding of the life cycles of the enterprise and the establishment of appropriate collaboration and governance processes. When carried out together, BPM provides the business context, understanding, and metrics, and EA provides the discipline to translate business vision and strategy into architectural change. Both are needed for sustainable continuous improvement. This book provides thought leadership and direction on the topic of BPM and EA synergies. Although technical in nature, it is not a typical IBM Redbooks publication. The book provides guidance and direction on how to collaborate effectively across tribal boundaries rather than technical details about IBM software products. The primary audience for this book is leaders and architects who need to understand how to effectively combine BPM and EA to drive, as a key differentiator, continuous improvement and transformational change with enterprise scope.

The CBS has taken steps to establish important pillars of a proper policy framework for financial reporting, auditing, and internal controls by approving the Internal Audit and Audit Committee Charters and is committed to address the remaining shortcomings in these areas. The Internal Audit Department (IAD) has made progress by initiating risk assessments of the various CBS business units and recruiting an Information Technology (IT) professional to join the team. The Accounting and Finance Department (AFD) is making progress in implementing accrual accounting, and accounting for foreign exchange operations (International Accounting Standard (IAS) 21), and has

created a new role of Reconciliation Officer to ensure all cash transactions are recorded properly. However, the IAD functions without a director, which places the internal audit staff at a severe disadvantage to other departments and limits their authority to effectively implement their program. Also, while the mission team has stressed the importance of adopting International Financial Reporting Standards (IFRS) during this mission and the previous mission, the CBS has not formally indicated that it will adopt this framework.² High priority recommendations were made to address these shortcomings. See Table 1 for homework assignments and high priority tasks.³ As you read this book, you will see how you can benefit from: minimizing and overcoming resistance to change, as you understand the reasons behind employees' apprehensions higher staff morale and improved relationships across the organization, as you obtain buy-in to the change increased productivity, as time is focused on the right projects and tasks knowing how to measure and publicize your successes, thereby further improving morale and productivity learning how to manage the 'human aspect' of your project, which will enable the best possible outcome for customers, employees and the organization as a whole lower costs and a higher return on your investment, as the services provided will be perfect for the business needs minimal disruption to the business, as you implement the changes in the most cost-effective and efficient ways. additional guidance on key skills, planning, and accountability – intrinsic elements of successful project.
