****This is the chapter slice "Conservation: What We Can Do Gr. 5-8" from the full lesson plan "Conservation: Ocean Water Resources"***** The oceans contain 97% of the Earth's water, cover 71% of its surface, and hold 50-80% of all life on the planet. Our resource explores the importance of conserving this vast area. Design a board game that illustrates the effects of climate change on Earth's oceans. See how the water cycle explains why most of Earth's salt water is found in the oceans. Find out how climate change will affect ocean currents, resulting in a dramatic change to the farming and fishing industries. Explain how an increase in human population can cause some salt lakes to shrink. Conduct a case study on a container ship that lost several containers in a storm in the north Pacific Ocean. Make your own salt water to

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed.

Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

Houston, Texas, 1961 The race to the moon is on, and engineer Eugene Parsons has two enemies: danger and distraction. Nothing is more distracting than his attraction to the brilliant, beautiful computer scientist on his team, but he's determined to overcome it since he needs her to help America win. Charlie Eason is used to men underestimating her. It comes with being a woman in engineering, but it's worth it to join the space race—even if she can't figure out what's behind the intense looks one tightly wound engineer keeps sending her. But life isn't as unemotional or predictable as code, and things soon boil over with the intriguingly demanding Parsons. With every launch, their secret affair grows thornier. The lines between work and play tangle even as Parsons and Charlie try to keep them separate. But when a mission goes wrong, they'll have to put aside their pride for the greater good—and discover that matters of the heart have a logic all their own. space race romance mad men engineer hero computer scientist heroine 1960s texas moon secret affair, military, navy, astronaut romance NASA

Description What could be more innocent than a crossword puzzle? A game to while away an idle hour, a diversion for the lonely. And yet its cunning formula could still be turned to sinister purpose. The curious crossword devised by Mr. George Winterton turned out to be part of a game for high stakes - it was the creation of a man whose brother had just drowned and who feared for his own life. Yet the dog hadn't barked... When Detective-Constable Owen (B.A. Oxon, pass degree only) arrives in the picturesque village of Suffby Cove, he is faced with the mystery of an appallingly ingenious murder - one whose ramifications reach out of England to the continent, and touch the lives of many men and women. Crossword Mystery is the third of E.R. Punshon's acclaimed Bobby Owen mysteries, first published in 1934 and part of a series which eventually spanned thirty-five novels. This edition features a new introduction by crime fiction historian Curtis Evans. "What is distinction? The few who achieve it step - plot or no plot - unquestioned into the first rank. We recognized it in Sherlock Holmes, and in Trent's Last Case, in The Mystery of the Villa Rose, in the Father Brown stories and in the works of Mr. E.R. Punshon we salute it every time." Dorothy L. Sayers

This open access book addresses the question of how God can providentially govern apparently ungovernable randomness. Medieval theologians confidently held that God is provident, that is, God is the ultimate cause of or is responsible for everything that happens. However, scientific advances since the 19th century pose serious challenges to traditional views of providence. From Darwinian evolution to quantum mechanics, randomness has become an essential part of the scientific worldview. An interdisciplinary team of Muslim, Christian and Jewish scholars—biologists, physicists, philosophers and theologians—addresses questions of randomness and providence. Unlock the mysteries of energy. Our resource demonstrates how energy is more than "the ability to do work". Learn about all the different kinds of energy. Dissect mechanical energy by identifying the different points on a roller coaster as using kinetic or potential energy. Find out how an object's thermal energy is calculated from its kinetic energy. Understand that amplitude, wavelength and frequency are all part of sound waves, and
