conservative Seismic Design Category (SDC) based on any soil type and a new map reflects less conservative SDCs when Site Class A, B or D is applicable. The townhouse separation provisions now include options for using two separate fire-resistant-rated walls or a common wall. An emergency escape and rescue opening is no longer required in basement sleeping rooms where the dwelling has an automatic fire sprinkler system and the basement has a second means of egress or an emergency escape opening. The exemption for interconnection of smoke alarms in existing areas has been deleted. New girder/header tables have been revised to incorporate the use of #2 Southern Pine in lieu of #1 Southern Pine. New tables address alternative wood stud heights and the required number of full height studs in high wind areas.

The 2006 International Fuel Gas Code® (IFGC®) addresses the design and installation of fuel gas systems and gas-fired appliances through requirements that emphasize performance. This is a comprehensive, excellent reference for code officials, engineers, architects, inspectors, plans examiners, contractors and anyone who needs a better understanding of these regulations. Prescriptive- and performance-based approaches to design are emphasized. The 2006 edition is fully compatible with all the International Codes published by the International Code Council (ICC).
