"Daphne Kalmar has created a wonderfully imperfect cast of characters and gathered them into a story that will break your heart. . . and heal it again. Stealing Mt. Rushmore has it all." —Marion Dane Bauer, author of the Newberry Honor novel *On My Honor* In *Stealing Mt. Rushmore*, Daphne Kalmar brings to life the social and political upheaval of the 1970s, revealing the heart of a family on the verge of falling apart and the courage of a young girl who does all she can to bring them together. She almost always made things worse. But at least she'd be standing there. I hated her for stealing the money. But I want her back. Nellie's dad had planned on having four boys to name after the presidents on Mt. Rushmore. He got George, Nellie, Tom, and Teddy. No Abe. It's the summer of 1974. Nellie's turned thirteen. Her best friend, Maya, has a crush on a boy. President Nixon might get impeached. And her mom's run off. The money for their family road trip to see Mt. Rushmore is missing and her dad's crawled into bed and won't get up. Nellie's sure the trip out West will fix her family, and she'll do almost anything to come up with the cash. But she begins to wonder why it's always her, the girl, who's stuck with the dishes and everything else. And how can a mom just up and leave with no note, no forwarding address, no nothing?

"This book provides an insight into the mechanical behaviour and testing of metals, polymers, ceramics and composites, which are widely employed for structural applications under varying loads,

temperatures and environments. Organized in 13 chapters, this book begins with explaining the fundamentals of materials, their basic building units, atomic bonding and crystal structure, further describing the role of imperfections on the behaviour of metals and alloys. The book then explains dislocation theory in a simplified yet analytical manner. The destructive and non-destructive testing methods are discussed, and the interpreted test data are then examined critically."--Publisher's description.
