Yes, It's Possible to Build a Business around Your Expertise, Ideas, Message, and Personality. But First You Need to Realize — YOU ARE THE BRAND. It's no secret that more people than ever before are building thriving businesses around their personal brands. But why do some create six- or even seven-figure businesses while so many others strive to make a consistent income? Much of the personal brand space plays out in two ways. The first group of people sells a false version of themselves, thinking that image or perception alone will get them the results they seek. These folks don't realize that attention isn't owed, it's earned. The flip side of presenting a false version of yourself is oversharing in the name of authenticity. They talk nonstop about their issues, sometimes revealing way more than what is even comfortable to read about. It's as if these people are trying to sell their struggles, and it doesn't work in the long run. Like a car wreck, these folks garner attention, but it's short-lived. Here's a simple question that can serve as a litmus test for you: "Can I build a campfire around what I'm sharing?" Is there warmth? Are you building something that is attractive and inviting to others? Can you build a community around it? Are you someone whom others want to invite onto their stages, in front of their employees, or into their lives? In *You Are the Brand*, Mike Kim shares his proven 8-step blueprint that has helped build the brands for some of today's most influential thought leaders — as well as his own personal brand. In this practical and inspiring book, you will learn: How to identify and showcase your unique expertise How to gain clarity on your message, market, and business model Why the most effective marketing strategy is to simply tell the truth How-To-Preneur vs. Ideapreneur — Which one are you? The three kinds of personal stories that ensure you stand out in your market The simple "9-Box Grid" that shows you how to price your products and services How to cultivate "rocket ship relationships" that skyrocket your revenue, and influence No other description available.

A 2019 EDGAR AWARDS NOMINEE (BEST FACT CRIME) • A BANFF MOUNTAIN BOOK AWARDS FINALIST Two modern adventurers sought a treasure possessed by the legendary "Wild Men of Borneo." One found riches. The other vanished forever into an endless jungle. Had he shed civilization—or lost his mind? Global headlines suspected murder. Lured by these mysteries, New York Times bestselling author Carl Hoffman journeyed to find the truth, discovering that nothing is as it seems in the world's last Eden, where the lines between sinner and saint blur into one. In 1984, Swiss traveler Bruno Manser joined an expedition to the Mulu caves on Borneo, the planet's third largest island. There he slipped into the forest interior to make contact with the Penan, an indigenous tribe of peace-loving nomads living among the Dayak people, the fabled "Headhunters of Borneo." Bruno lived for years with the Penan, gaining acceptance as a member of the tribe. However, when commercial logging began devouring the Penan's homeland, Bruno led the tribe against these outside forces, earning him status as an enemy of the state, but also worldwide fame as an environmental hero. He escaped captivity under gunfire twice, but the strain took a psychological toll. Then, in 2000, Bruno disappeared without a trace. Had he become a madman, a hermit, or a martyr? American Michael Palmieri is, in many ways, Bruno's opposite. Evading the Vietnam War, the Californian wandered the world, finally settling in Bali in the 1970s. From there, he staged expeditions into the Bornean jungle to acquire astonishing art and artifacts from the Dayaks. He would become one of the world's most successful tribal-art field collectors, supplying sacred works to prestigious museums and wealthy private collectors. And yet suspicion shadowed this self-styled buccaneer who made his living extracting the treasure of the Dayak: Was he preserving or exploiting native culture? As Carl Hoffman unravels the deepening riddle of Bruno's disappearance and seeks answers to the questions surrounding both men, it becomes clear saint and sinner are not so easily defined and Michael and Bruno are, in a sense, two parts of one whole: each spent his life in pursuit of the sacred fire of indigenous people. *The Last Wild Men of Borneo* is the product of Hoffman's extensive travels to the region, guided by Penan through jungle paths traveled by Bruno and by Palmieri himself up rivers to remote villages. Hoffman also draws on exclusive interviews with Manser's family and colleagues, and rare access to his letters and journals. Here is a peerless adventure propelled by the entwined lives of two singular, enigmatic men whose stories reveal both the grandeur and the precarious fate of the wildest place on earth.

Understanding Da Vinci's Creative Genius The life and art of history's most influential mind Bestselling author Leonard Shlain explores the potential for humankind through the life, art, and mind of the first true Renaissance Man, Leonardo da Vinci. His innovations as an artist, scientist, and inventor are recast through a modern lens, with Shlain applying contemporary neuroscience to illuminate da Vinci's creative process. No other person in human history has excelled in so many areas of innovation: Shlain reveals the how and the why. Shlain theorizes that Leonardo's extraordinary mind came from a uniquely developed and integrated right and left brain, which offers a model for how we too can evolve.

Using past and current research, Leonardo's Brain presents da Vinci as the focal point for a fresh exploration of human creativity. With his lucid style and remarkable ability to discern connections among a wide range of fields, Shlain brings the reader into the world of history's greatest mind. Leonard Shlain is a bestselling author, inventor, and surgeon.

Admired among artists, scientists, philosophers, anthropologists, and educators, he authored three bestselling books. He delivered stunning visual presentations based upon his books in venues around the world, including Harvard, the New York Museum of Modern Art, CERN, Los Alamos, the Florence Academy of Art, and the European Council of Ministers. Shlain died in May 2009 at the age of 71 from brain cancer shortly after the completion of this book. Visit LeonardShlain.com and LeonardosBrain.com.

Thirteen points of entry. Locked gateways to magical realms of immense power—and danger, for the uninitiated. Within these pages are thirteen keys. Enter the Necronomicon and be forever changed. In this authentic sourcebook for magicians, occult scholar Donald Tyson uses H. P. Lovecraft's story elements and characters—alien races, ancient sorceries, the Dreamlands, deities, witches, and ghouls—as the foundation for a workable and coherent system of modern ritual magic based on the thirteen true zodiacal constellations. This authoritative guide presents the essential elements of the Necronomicon mythos for use in esoteric practices such as dream scrying, astral projection, magical rites, and invocations.

For over twenty years, psychologist Richard Wiseman has examined the quirky science of everyday life. In *Quirkology*, he navigates the oddities of human behavior, explaining the tell-tale signs that give away a liar, the secret science behind speed-dating and personal ads, and what a person's sense of humor reveals about the innermost workings of his or her mind—all along paying tribute to others who have carried out similarly weird and wonderful work. Wiseman's research has involved secretly observing people as they go about their daily business, conducting unusual experiments in art exhibitions and music concerts, and even staging fake séances in allegedly haunted buildings. With thousands of research subjects from all over the world, including enamored couples, unwitting pedestrians, and guileless dinner guests, Wiseman presents a fun, clever, and unexpected picture of the human mind.

The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

Skills in English Reading Level 1 Teacher's Book The Garnet Education Skills in English series was highly commended in the Duke of Edinburgh English Speaking Union English Language Book Award in 2004. Do you have to read texts in English as part of your studies? Then you need Skills in English Reading. This course builds the skills that help you do reading research in English. At Level 2, you learn how to: skim for the main idea; skim for the topic of paragraphs; read for an established purpose; understand non-text markers; distinguish fact from opinion; make inferences - 'read between the lines'; recognise the author's point of view; apply ideas to real-world situations; transfer information, e.g., text to outline; and react to a text. As well as preparing students for entry into English-medium study, the Skills in English Course is ideal for students who wish to improve their scores in skills-based examinations for university entry requirements, such as the International English Language Testing System (IELTS). Rather than focusing on exam preparation, Skills in English teaches the necessary skills as part of a systematic programme of language development. Skills in English courses are also available in Listening, Speaking and Writing. See the Skills in English website at skillsinenglish.com for additional materials and help. Key Features Reading texts a maximum of 500 words Listening texts a maximum of 800 words Speaking tasks up to five paragraphs, with writing assignments between five and ten well-structured paragraphs Test booklets containing theme tests, a revision test after five units, plus an end-of-course test Teacher's Book containing full answer keys, methodology notes and transcript of listening material Accompanying Teacher's Book, Student Test Pack and Teacher Test Booklet also available.

In this book, experienced Teacher's Book writers, Mike Sayer and Ros Wright, demystify the process of creating teacher's materials. The role of the Teacher's Book writer is examined, along with a detailed breakdown of all the essential elements that need to be included in an excellent Teacher's Book. The importance of this component shouldn't be underestimated - it's the key to successful delivery of the student's material, effective classroom management, and much more. This book provides: - a checklist of the type of information to cover in all types of Teacher's Books.- a discussion of the differences between a general English Teacher's Book and an ESP Teacher's Book.- a breakdown of the additional requirements when the teacher isn't a content expert in the students' field of work.- tasks, commentaries and a glossary of terms. This book forms part of the ELT Teacher 2 Writer training course. The course is designed to help you write better ELT materials, either for publication, or simply to improve the quality of your self-produced classroom materials

Heidegger and Philosophical Atheology offers an important new reading of Heidegger's middle and later thought. Beginning with Heidegger's early dissertation on the doctrine of categories in Duns Scotus, Peter S. Dillard shows how Heidegger's middle and later works develop a philosophical anti-theology or 'atheology' that poses a serious threat to traditional metaphysics, natural theology and philosophy of religion. Drawing on the insights of Scholastic thinkers such as St Thomas Aquinas and Duns Scotus, the book reveals the problematic assumptions of Heideggerian 'atheology' and shows why they should be rejected. Dillard's critique paves the way for a rejuvenation of Scholastic metaphysics and reveals its relevance to some contemporary philosophical disputes. In addition to clarifying the question of being and explaining the role of phenomenology in metaphysics, Dillard sheds light on the nature of nothingness, necessity and contingency. Ultimately the book offers a revolutionary reorientation of our understanding, both of the later Heidegger and of the legacy of Scholasticism.

A NEW YORK TIMES BESTSELLER WINNER OF THE 2019 NATIONAL BOOK AWARD FOR NONFICTION A brilliant, haunting and unforgettable memoir from a stunning new talent about the inexorable pull of home and family, set in a shotgun house in New Orleans East. In 1961, Sarah M. Broom's mother Ivory Mae bought a shotgun house in the then-promising neighborhood of New Orleans East and built her world inside of it. It was the height of the Space Race and the neighborhood was home to a major NASA plant—the postwar optimism seemed assured. Widowed, Ivory Mae remarried Sarah's father Simon Broom; their combined family would eventually number twelve children. But after Simon died, six months after Sarah's birth, the Yellow House would become Ivory Mae's thirteenth and most unruly child. A book of great ambition, Sarah M. Broom's *The Yellow House* tells a hundred years of her family and their relationship to home in a neglected area of one of America's most mythologized cities. This is the story of a mother's struggle against a house's entropy, and that of a prodigal daughter who left home only to reckon with the pull that home exerts, even after the Yellow House was wiped off the map after Hurricane Katrina. *The Yellow House* expands the map of New Orleans to include the stories of its lesser known natives, guided deftly by one of its native daughters, to demonstrate how enduring drives of clan, pride, and familial love resist and defy erasure. Located in the gap between the "Big Easy" of tourist guides and the New Orleans in which Broom was raised, *The Yellow House* is a brilliant memoir of place, class, race, the seeping rot of inequality, and the internalized shame that often follows. It is a transformative, deeply moving story from an unparalleled new voice of startling clarity, authority, and power.
