A brilliant inquiry into the origins of human nature from the author of *Rationality, The Better Angels of Our Nature*, and *Enlightenment Now*. "Sweeping, erudite, sharply argued, and fun to read..also highly persuasive." --Time Updated with a new afterword One of the world's leading experts on language and the mind explores the idea of human nature and its moral, emotional, and political colorings. With characteristic wit, lucidity, and insight, Pinker argues that the dogma that the mind has no innate traits—a doctrine held by many intellectuals during the past century—denies our common humanity and our individual preferences, replaces objective analyses of social problems with feel-good slogans, and distorts our understanding of politics, violence, parenting, and the arts. Injecting calm and rationality into debates that are notorious for ax-grinding and mud-slinging, Pinker shows the importance of an honest acknowledgment of human nature based on science and common sense.

Where does wealth come from? How is it different from money? Does division of labour mean that the best people

are hired to do the job? Does government intervention prevent or create crises? What is the most effective way to protect the environment? The great Scottish historian Thomas Carlyle dismissed economics as "the dismal science", yet it is at the heart of everything we do. Economics without the Boring Bits is a clear, comprehensive and richly anecdotal guide to debt, finance, trade, money, taxation, supply, demand and all the other big issues that worry us all yet relatively few truly understand. Oxford-trained economist Tejvan Pettinger takes readers on an enlightening tour of the powerful, counter-intuitive and frequently startling insights of economic research, showing us that middlemen are good, recycling is bad (sometimes) and why some people get rich and others don't. If you want to understand the wealth of nations without wading through *The Wealth of Nations*, this is the ideal place to start.
