GCSE 9-1 Science Practice Book \* 100s of practice questions \* Exam techniques explained \* Matches 9-1 specification

Revision guide for GCSE Physics. Use with the AQA exam board. Tested on past students.

At the time of writing Tim Prichard has nearly 30 years' experience as a science teacher in several schools both in the UK and abroad, covering the entire age and ability range, including A level Physics and Chemistry. The author has found students revise and consolidate their knowledge best if they have access to a wide variety of worked examples to study from. Physics by Example is based upon this concept with each topic having a short introduction followed by around ten example questions. Each question has a full "e;step by step"e;, easy to follow solution, including hints and tips to help the student understand the methodology for each question. At the end of each section there is a self testing exercise with answers to help the students consolidate their knowledge. Prichard Guides work best if they are used in conjunction with the student's own notes to support their own learning. These guides provide a huge resource of model questions and answers which have been tried and tested in classrooms across the UK and abroad, as they have been the basis of the author's lessons for nearly three decades, have been very successful and are still being used in lessons today.

New Grade 9-1 GCSE Chemistry for AQA: Student Book with Interactive Online Edition AQA GCSE Physics Revision Guide

For those who want the ease of not printing this yourself here it is! The extended edition includes 4 books in total, so you can buy them cheaper and have everything in one place. In here there is... Maths and Calculator skills for science students; Maths (the chemistry bits) for science students; Maths (the physics bits) for science students; knowledge checklists for each topic in easy to understand language so you can check you haven't missed anything out; links to YouTube video that explain parts you don't understand; quick fire questions for each topic with links to a YouTube video working through the answers; lists of equations and units that are essential to learn for physics; lists of ions, equations and formula that are essential to learn for chemistry; diagrams to label; key word lists and crosswords. This will be updated July 2018
