General Data Protection Regulation: First Aid What do organisations that hold or process personal data need to know? From 25th May, 2018, the European Union's General Data Protection Regulation, GDPR for short, applies. It creates a completely new basis for all data protection in the European Union. The fines for breaches have been drastically increased. In addition to large enterprises and other types of large scale organisation, small companies or free-lancers, small associations, clubs, societies and non-profit making organisations in many shapes and forms are entrusted with a lot of personal data - be it customer or client data, member data, employee data, or supplier data. Clubs and associations often have documentation that allows deep insights into the personal situation of their members. All organisations which hold or process this type of data are defined as "controllers" under the GDPR. It is therefore essential for the respective "controllers" to know the requirements of the GDPR. This publication informs you concisely and clearly regarding the content and the mandatory requirements relating to data processing in the GDPR. In particular it answers the following questions: - Which data is covered by data protection? - Is it necessary to nominate a Data Protection Officer? - Which obligations to provide information must be fulfilled proactively? - What information needs to be included in the records of data processing activities? - When is it permissible to forward data to other persons or organisations? - Which special requirements are there for photographs on your own website? Templates and check lists help you prepare and implement the legal requirements of the General Data Protection Regulation. Numerous examples demonstrate legal pitfalls and how to avoid them. This publication is aimed at owners of small companies, those responsible for data protection within small companies, chairpersons and members of clubs or associations and many other types of non-profit making organisation, as well as anyone else who wishes to gain a quick overview of the requirements of the data protection legislation. About the authors This publication was created by data protection experts. Dr. Eugen Ehmann is Vice-President of Central Franconia (Bavaria) and co-author of Ehmann/Selmayr, Kommentar zur DS-GVO (Commentary on the GDPR). Thomas Kranig is President of the Data Protection Authority of Bavaria for the Private Sector.

In this training, you will learn how a single staff member should protect personal data at work. Next to industry, country or

even culture-specific norms on privacy, there is a universal standard to follow when you are at work. This standard is now being set by the GDPR, the European Union's regulation that is increasingly followed all over the world. The regulation and similar laws in different states require to train employees and associates, as the level of data protection depends on all staff members, including you. We will start from scratch to clarify your understanding of what are personal data, what it means to process them and on whose behalf you act. You will learn what principles to apply, how to secure information and how to act in case a breach occurs. I will also cover providing information, collecting consents and handling data subject requests. Having worked at the supervisory authority and carried out many data protection projects in national and international firms, now I tell what an every single staff member needs to know and follow in daily work. There is no time for theory and data protection is probably not the most important part of your job. But it is a part you want to approach efficiently, so privacy is respected and breaches are not likely to happen. In case of legal proceedings or an inspection, the authority examines if you and your organization applied adequate measures to protect data. Also your clients might require your company to provide them with guarantees. Complete this training and start taking right steps. The COVID-19 pandemic has increased the focus on health informatics and healthcare technology for policy makers and healthcare professionals worldwide. This book contains the 110 papers (from 160 submissions) accepted for the 18th annual International Conference on Informatics, Management, and Technology in Healthcare (ICIMTH 2020), held virtually in Athens, Greece, from 3 – 5 July 2020. The conference attracts scientists working in the field of Biomedical and Health Informatics from all continents, and this year it was held as a Virtual Conference, by means of teleconferencing, due to the COVID-19 pandemic and the consequent lockdown in many countries around the world. The call for papers for the conference started in December 2019, when signs of the new virus infection were not yet evident, so early submissions were on the usual topics as announced. But papers submitted after mid-March were mostly focused on the first results of the pandemic analysis with respect to informatics in different countries and with different perspectives of the spread of the virus and its influence on public health across the world. This book therefore includes papers on the topic of the COVID-19 pandemic in relation to informatics reporting from hospitals and institutions from around the world, including South Korea, Europe, and the USA. The book encompasses the field of biomedical and health informatics in a very broad framework, and the timely inclusion of papers on the current pandemic will make it of particular interest to all those involved in the provision of healthcare everywhere.

The growth of data-collecting goods and services, such as ehealth and mhealth apps, smart watches, mobile fitness and dieting apps, electronic skin and ingestible tech, combined with recent technological developments such as increased capacity of data storage, artificial intelligence and smart algorithms, has spawned a big data revolution that has reshaped how we understand and approach health data. The GDPR is a complex and evolving body of law that aims to deal with several technological and societal health data privacy problems, while safeguarding public health interests and addressing its internal gaps and uncertainties. The book answers a diverse range of questions including: What role can the GDPR play in regulating health surveillance and big (health) data analytics? Can it catch up with internet-age developments? Are the solutions to the challenges posed by big health data to be found in the law? Does the GDPR provide adequate tools and mechanisms to ensure public health objectives and the effective protection of privacy? How does the GDPR deal with data that concern children's health and academic research? By analysing a number of diverse questions concerning big health data under the GDPR from various perspectives, this book will appeal to those interested in privacy, data protection, big data, health sciences, information technology, the GDPR, EU and human rights law.

To execute and guarantee the right to privacy and data protection within the European Union (EU), the EU found it necessary to establish a stable, consistent framework for personal data protection and to enforce it in a decisive manner. This book, the most comprehensive guide available to the General Data Protection Regulation (GDPR), is the first English edition, updated and expanded, of a bestselling book published in Poland in 2018 by a renowned technology lawyer, expert to the European Commission on cloud computing and to the Article 29 Working Party (now: the European Data Protection Board) on data transfers who in fact contributed ideas to the GDPR. The implications of major innovations of the new system – including the obligation of businesses to consult the GDPR first rather than relevant Member State legislation and the extension of the GDPR to companies located outside of the European Economic Area – are fully analysed for the benefit of lawyers and companies worldwide. Among the specific issues and topics covered are the following: insight into the tricky nature of the GDPR; rules relating to free movement of personal data; legal remedies, liability, administrative sanctions; how to prove compliance with GDPR; direct liability of subcontractors (sub-processors); managing incidents and reporting data breaches; information on when and under what conditions the GDPR rules may apply to non-EU parties; backups and encryption; how to assess risk and adjust security accordingly and document the process; guidelines of the European Data Protection Board; and the GDPR's digest for obligated parties in a form of a draft data protection policy. The Guide often breaks down GDPR articles into checklists of specific requirements. Of special value are the numerous ready-to-adapt template compliance documents presented in Part II. Because the GDPR contains a set of new obligations and a perspective of severe administrative fines for non-compliance, this guide is an indispensable practical resource for corporate data protection officers, in-house counsel, lawyers in data protection practice, and e-commerce start-ups worldwide.

This book provides expert advice on the practical implementation of the European Union's General Data Protection Regulation (GDPR) and systematically analyses its various provisions. Examples, tables, a checklist etc. showcase the practical consequences of the new legislation. The handbook examines the GDPR's scope of application, the organizational and material requirements for data protection, the rights of data subjects, the role of the Supervisory Authorities, enforcement and fines under the GDPR, and national particularities. In addition, it supplies a brief outlook on the legal consequences for seminal data processing areas, such as Cloud Computing, Big Data and the Internet of Things.Adopted in 2016, the General Data Protection Regulation will come into force in May 2018. It provides for numerous new and intensified data protection obligations, as well as a significant increase in fines (up to 20 million euros). As a result, not only companies located within the European Union will have to change their approach to data security; due to the GDPR's broad, transnational scope of application, it will affect numerous companies worldwide.

This report traces and evaluates donor and African government strategies for agricultural and rural development in Sub-Saharan Africa over the past 30 years. The author reviews the history and effects of the failed strategies of the 1970s and 1980s (for example, integrated rural development, single-crop development, agricultural credit projects, irrigation projects, and support for social and agricultural services) and analyzes why they were unsuccessful. He also looks at recent approaches to agricultural and rural development in Africa and makes recommendations regarding the World Bank's role in these areas. The book concludes with a summary of comments by African government leaders and nongovernmental organizations. A detailed set of tables from the World Bank's Africa database is provided.

Nach einem umfassenden Überblick über die DSGVO untersucht diese Arbeit das neue Recht auf Vertretung, das in Art. 80 Abs. 1 DSGVO verankert ist. Dieses Recht ermöglicht es den betroffenen Personen, einen zuständigen Verband zu benennen, der ihre Durchsetzungsrechte ausübt, einschließlich des Rechts auf Entschädigung, vorausgesetzt, dass das Recht der Mitgliedstaaten dies zulässt. Da dieses Recht vom nationalen Recht abhängig ist, wird in dieser Arbeit untersucht, wie in den wichtigsten europäischen Gerichtsbarkeiten mit kollektiven Rechtsbehelfen gegen Massenschäden beim Datenschutz umgegangen wird, bevor ein Überblick über die allgemeine Situation in der EU und die damit verbundenen Herausforderungen gegeben wird.

The definitive guide for ensuring data privacy and GDPR compliance Privacy regulation is increasingly rigorous around the world and has become a serious concern for senior management of companies regardless of industry, size, scope, and geographic area. The Global Data Protection Regulation (GDPR) imposes complex, elaborate, and stringent requirements for any organization or individuals conducting business in the European Union (EU) and the European Economic Area (EEA)—while also addressing the export of personal data outside of the EU and EEA. This recently-enacted law allows the imposition of fines of up to 5% of global revenue for privacy and data protection violations. Despite the massive potential for steep fines and regulatory penalties, there is a distressing lack of awareness of the GDPR within the business community. A recent survey conducted in the UK suggests that only 40% of firms are even aware of the new law and their responsibilities to maintain compliance. The Data Privacy and GDPR Handbook helps organizations strictly adhere to data privacy laws in the EU, the USA, and governments around the world. This authoritative and comprehensive guide includes the history and foundation of data privacy, the framework for ensuring data privacy across major global jurisdictions, a detailed framework for complying with the GDPR, and perspectives on the future of data collection and privacy practices. Comply with the latest data privacy regulations in the EU, EEA, US, and others Avoid hefty fines, damage to your reputation, and losing your customers Keep pace with the latest privacy policies, guidelines, and legislation Understand the framework necessary to ensure data privacy today and gain insights on future privacy practices The Data Privacy and GDPR Handbook is an indispensable resource for Chief Data Officers, Chief Technology Officers, legal counsel, C-Level Executives, regulators and legislators, data privacy consultants, compliance officers, and audit managers.

Now in its fourth edition, this bestselling guide is the ideal companion for anyone carrying out a GDPR (General Data Protection Regulation) compliance project. It provides comprehensive guidance and practical advice on complying with the Regulation.

The aim of this handbook is to raise awareness and improve knowledge of data protection rules in European Union and Council of Europe member states by serving as the main point of reference to which readers can turn. It is designed for non-specialist legal professionals, judges, national data protection authorities and other persons working in the field of data protection.

Personal data protection has become one of the central issues in any understanding of the current world system. In this connection, the European Union (EU) has created the most sophisticated regime currently in force with the General Data Protection Regulation (GDPR) of 2016. This book on this major data protection reform offers a comprehensive discussion of all principles of personal data processing, obligations of data controllers and rights of data subjects. This is the core of the personal data protection regime. GDPR is applicable directly in all Member States, providing for a unification of data protection rules within the EU. However, it poses a problem in enabling international trade and data transfers outside the EU between economies which have different data protection models in place. Among the broad spectrum of aspects of the subject covered are the following: – summary of the changes introduced by the GDPR; – new territorial scope; – key principles of personal data processing; – legal bases for the processing of personal data; – marketing, cookies and profiling; – new information clauses; – new Subject Access Requests (SARs), including the 'right to be forgotten' on the Internet, the right to data portability and the right to object to profiling; – new data protection by design and by default; – benefits from implementing a data protection certificate; and – data transfers outside the EU, including BCRs, SCCs and special features of EU–US arrangements. This book references many rulings of European courts, as well as interpretations and guidelines formulated by European data protection authorities, examples and best practices, making it of great practical value to lawyers and business leaders. Because of the increase in legal certainty in this area guaranteed by the GDPR, multinational corporations and their customers and contractors will benefit enormously from consulting and using this book. For practitioners and academics, researching or advising clients on this area, and government policy advisors, this book provides an indispensable source of guidance and information for many years to come.

This book constitutes extended, revised and selected papers from the 22nd International Conference on Enterprise Information Systems, ICEIS 2020, held online during May 5-7, 2020. They were organized in topical sections as follows: database and information systems integration;

artificial intelligence and decision support systems; information systems analysis and specification; software agents and internet computing; human-computer interaction; and enterprise architecture.

Information about people is becoming increasingly valuable. Enabled by new technologies, organizations collect and process personal data on a large scale. Free flow of data across Europe is vital for the common market, but it also presents a clear risk to the fundamental rights of individuals. This issue was addressed by the Council of the European Union and the European Parliament with the introduction of the General Data Protection Regulation (GDPR). For many organizations processing personal data, the GDPR came as a shock. Not so much its publication in the spring of 2016, but rather the articles that appeared about it in professional journals and newspapers leading to protests and unrest. "The heavy requirements of the law would cause very expensive measures in companies and organizations", was a concern. In addition, companies which failed to comply "would face draconian fines". This book is intended to explain where these requirements came from and to prove that the GDPR is not incomprehensible, that the principles are indeed remarkably easy to understand. It will help anyone in charge of, or involved in, the processing of personal data to take advantage of the innovative technologies in processing without being unduly hindered by the limitations of the GDPR. The many examples and references to EDPB (European Data Protection Board) publications, recent news articles and case law clarify the requirements of the law and make them accessible and understandable. "Leo's book can provide very effective support to you and your colleagues in reaching this understanding and applying it in practice." Fintan Swanton, Managing Director of Cygnus Consulting Ltd., Ireland.
