General Data Protection Regulation: First Aid for Companies and Associations the Data Protection Authority of Bavaria for the Private Sector, 2018-07-02 General Data Protection Regulation: First Aid What do organisations that hold or process personal data need to know? From 25th May, 2018, the European Union's General Data Protection Regulation, GDPR for short, applies. It creates a completely new basis for all data protection in the European Union. The fines for breaches have been drastically increased. In addition to large enterprises and other types of large scale organisation, small companies or free-lancers, small associations, clubs, societies and non-profit making organisations in many shapes and forms are entrusted with a lot of personal data - be it customer or client data, member data, employee data, or supplier data. Clubs and associations often have documentation that allows deep insights into the personal situation of their members. All organisations which hold or process this type of data are defined as controllers under the GDPR. It is therefore essential for the respective controllers to know the requirements of the GDPR. This publication informs you concisely and clearly regarding the content and the mandatory requirements relating to data processing in the GDPR. In particular it answers the following questions: - Which data is covered by data protection? - Is it necessary to nominate a Data Protection Officer? - Which obligations to provide information must be fulfilled proactively? - What information needs to be included in the records of data processing activities? - When is it permissible to forward data to other persons or organisations? - Which special requirements are there for photographs on your own website? Templates and check lists help you prepare and implement the legal requirements of the General Data Protection Regulation. Numerous examples demonstrate legal pitfalls and how to avoid them. This publication is aimed at owners of small companies, those responsible for data protection within small companies, chairpersons and members of clubs or associations and many other types of non-profit making organisation, as well as anyone else who wishes to gain a quick overview of the requirements of the data protection legislation. About the authors This publication was created by data protection experts. Dr. Eugen Ehmann is Vice-President of Central Franconia (Bavaria) and co-author of Ehmann/Selmayr, Kommentar zur DS-GVO (Commentary on the GDPR). Thomas Kranig is President of the Data Protection Authority of Bavaria for the Private Sector.

Data Protection Implementation Guide Brendan Quinn, 2021-09-02 The complexities of implementing the General Data Protection Regulation (GDPR) continue to grow as it progresses through new and ever-changing technologies, business models, codes of conduct, and decisions of the supervisory authorities, and the courts. This eminently practical guide to implementing the GDPR - written in an original, problem-solving style by a highly experienced data protection expert with equal knowledge of both law and technology - provides a step-by-step project management approach to building a GDPR-compliant data protection system, assessing, and documenting the risks and then implementing these changes through

processes at the operational level. With detailed attention to case law (Member State, ECJ, and ECHR), especially where affecting high-risk areas that have attracted scrutiny, the guidance proceeds systematically through such topics and issues as the following: required documentation, policies, and procedures; risk assessment tools and analysis frameworks; children's data; employee and health data; international transfers post-Schrems II; data subject rights including the right of access; data retention and erasure; tracking and surveillance; and effects of technologies such as artificial intelligence, biometrics, and machine learning. With its practical examples derived from the author's experience in building GDPR-compliant software, as well as its analysis of case law and enforcement priorities, this incomparable guide enables company data protection officers and compliance staff to advise on key issues with full awareness of the legal and reputational risks and how to mitigate them. It is also sure to be of immeasurable value to concerned regulators and policymakers at all government levels. "...it's going to be the go to resource for practitioners." Tom Gilligan, Data Protection Consultant, September 2021 I purchased this book recently and I'm very glad I did. It's the textbook I have been waiting for. As someone relatively new to data protection, I was finding it very difficult to find books on the practical side of data protection. This book is very clearly laid out with practical examples and case law given for each topic, which is immensely helpful. I would recommend it to any data protection practitioners. GDPR: Personal Data Protection in the European Union Mariusz Krzysztofek,2021-04-07 GDPR: Personal Data Protection in the European Union Mariusz Krzysztofek Personal data protection has become one of the central issues in any understanding of the current world system. In this connection, the European Union (EU) has created the most sophisticated regime currently in force with the General Data Protection Regulation (GDPR) (EU) 2016/679. Following the GDPR's recent reform - the most extensive since the first EU laws in this area were adopted and implemented into the legal orders of the Member States - this book offers a comprehensive discussion of all principles of personal data processing, obligations of data controllers, and rights of data subjects, providing a thorough, up-to-date account of the legal and practical aspects of personal data protection in the EU. Coverage includes the recent Court of Justice of the European Union (CJEU) judgment on data transfers and new or updated data protection authorities' guidelines in the EU Member States. Among the broad spectrum of aspects of the subject covered are the following: - right to privacy judgments of the CJEU and the European

Court of Human Rights; - scope of the GDPR and its key definitions, key principles of personal data processing; - legal bases for the processing of personal data; - direct and digital marketing, cookies, and online behavioural advertising; - processing of personal data of employees; - sensitive data and criminal records; - information obligation & privacy notices; - data subjects rights; - data controller, joint controllers, and processors; - data protection by design and by default, data security measures, risk-based approach, records of personal data processing activities, notification of a personal data breach to the supervisory authority and communication to the data subject, data protection impact assessment, codes of conduct and certification; - Data Protection Officer; - transfers of personal data to non-EU/EEA countries; and - privacy in the Internet and surveillance age. Because the global scale and evolution of information technologies have changed the data processing environment and brought new challenges, and because many non-EU jurisdictions have adopted equivalent regimes or largely analogous regulations, the book will be of great usefulness worldwide. Multinational corporations and their customers and contractors will benefit enormously from consulting and using this book, especially in conducting case law, guidelines and best practices formulated by European data protection authorities. For lawyers and academics researching or advising clients on this area, this book provides an indispensable source of practical guidance and information for many years to come.
