For every transnational lawyer, it is vital to know the differences between national secured transactions laws. Since the applicable law is determined by the place where the collateral is situated, it may change when movables are brought from one state to another. Introductory essays from comparative lawyers set the scene. The book then presents a survey of the law relating to secured transactions in the member states of the European Union. Following the Common Core approach, the national reports are centred around fifteen hypothetical cases dealing with the most important issues of secured transactions law, such as the creation of security rights in different business situations, the relationship between debtor and secured creditor, the nature of the creditor's rights and their enforcement as against third parties. Each case is followed by a comparative summary. A general report evaluates the possibilities of European harmonisation in the field of secured transactions law.

This is the first book to offer a systematic and analytical overview of the legal framework for residential construction. In doing so, the book addresses two fundamental questions: Prevention: What assurances can the law give buyers (and later owners and occupiers) of homes that construction work – from building of a complete home to adding an extension or replacing a shower unit – will comply with minimum standards of design, safety and build quality? Cure: What forms of redress - from whom, and by what route - can residents expect, when, often long after completion of construction, they discover defects? The resulting problems pose some big and difficult questions of principle and policy about standards, rights and remedies, which in turn concern justice more generally. This book addresses these key issues in a comparative context across the United Kingdom, Ireland, Australia and New Zealand. It is an accessible guide to the existing law for residents and construction professionals (and their legal advisers), but also charts a course to further, meaningful reforms of the legal landscape for residential construction around the world. The book's two co-authors, Philip Britton and Matthew Bell, have taught in the field in the UK, Australia and New Zealand; both have been active in legal practice, as have the book's two specialist contributors, Deirdre Ní Fhloinn and Kim Vernau.

Celebrating the scholarship of Andrew Ashworth, Vinerian Professor of English Law at the University of Oxford, this collection brings together leading

international scholars to explore questions of principle and value in criminal law and criminal justice. Internationally renowned for elaborating a body of principles and values that should underpin criminalization, the criminal process, and sentencing, Ashworth's contribution to the field over forty years of scholarship has been immense. Advancing his project of exploring normative issues at the heart of criminal law and criminal justice, the contributors examine the important and fascinating debates in which Ashworth's influence has been greatest. The essays fall into three distinct but related areas, reflecting Ashworth's primary spheres of influence. Those in Part 1 address the import and role of principles in the development of a just criminal law, with contributions focusing upon core tenets such as the presumption of innocence, fairness, accountability, the principles of criminal liability, and the grounds for defences. Part 2 addresses questions of human rights and due process protections in both domestic and international law. In Part 3 the essays are addressed to core issues in sentencing and punishment: they explore questions of equality, proportionality, adherence to the rule of law, the totality principle (in respect of multiple offences), wrongful acquittals, and unduly lenient sentences. Together they demonstrate how important Ashworth's work has been in shaping how we think about criminal law and criminal justice, and make their own invaluable contribution to contemporary discussions of criminalization and punishment. volume offers an in-depth study of 'mixed jurisdictions' - legal systems which combine elements of the Anglo-American Common Law and the European Civil Law traditions. This new collection of essays compares key areas of private law in Scotland and Louisiana. In thirteen chapters, written by distinguished scholars on both sides of the Atlantic, it explores not only legal rules but also the reasons for the rules, discussing legal history, social and cultural factors, and the law in practice, in order to account for patterns of similarity and difference. Contributions are drawn from the Law Schools of Tulane University, Louisiana State University, Loyola University New Orleans, the American University Washington DC, and the Universities of Aberdeen, Strathclyde and Edinburgh.

This updated third edition gives you a clear and concise guide to the basics of the law of contract as it pertains to Scotland, from what a contract is to how they are formed, terminated and breached, and from third-party rights to

It is now trite knowledge that corporate criminal liability is laced with a large number of contradictions that seriously threaten its legitimacy. This book demonstrates that these contradictions may be avoided if courts consistently refer to an adequate mechanism of imputation. It proposes parameters for evaluating mechanisms of imputation and shows how an adequate mechanism may be determined. This distinctive book provides students and practitioners with an exposition of the current substantive and procedural corporate criminal law and considers other ways of regulating the activities of corporations than using the criminal law. It also addresses the distinction between internal knowledge and external knowledge with reference to pedigreed and non-pedigreed rules and shows how the concept of discursive dilemma may be employed to aggregate the acts and intents of agents for the purposes of imputing these acts and intents to accused corporations and holding them liable. This book is highly recommended for students of criminology, law and business. It should also be of interest to defence counsels, prosecutors and regulatory agencies that either represent and advise corporate defendants or seek to hold corporations accountable for the breach of criminal law standards.

Excerpt from The Law of Horses MY object in undertaking the following work has been to bring within a volume of moderate size a view of the principles, enactments, and cases in Scots Law that relate to horses. In endeavouring to do this to the full, I have thought it right to go, when necessary, beyond the narrow limitation of the subject; to refer, for example, to English authorities in illustration of the law of Scotland; to point out differences between the legal systems of the two countries; and to cite cases relating to other subjects than horses as authority for the general principles of contract, fraud, and negligence which emerge in transactions about horses. The work thus aims, while dealing with a restricted subject, at treating it completely. I desire to acknowledge the obligations I am under to Mr. A. Orr Deas, advocate, who has kindly revised the proof sheets, and to him and other friends for many valuable and practical suggestions.
